

Important notice

Dear Customer,

On 7 February 2017 the former NXP Standard Product business became a new company with the tradename **Nexperia**. Nexperia is an industry leading supplier of Discrete, Logic and PowerMOS semiconductors with its focus on the automotive, industrial, computing, consumer and wearable application markets

In data sheets and application notes which still contain NXP or Philips Semiconductors references, use the references to Nexperia, as shown below.

Instead of <http://www.nxp.com>, <http://www.philips.com/> or <http://www.semiconductors.philips.com/>, use **<http://www.nexperia.com>**

Instead of sales.addresses@www.nxp.com or sales.addresses@www.semiconductors.philips.com, use **salesaddresses@nexperia.com** (email)

Replace the copyright notice at the bottom of each page or elsewhere in the document, depending on the version, as shown below:

- © NXP N.V. (year). All rights reserved or © Koninklijke Philips Electronics N.V. (year). All rights reserved

Should be replaced with:

- © **Nexperia B.V. (year). All rights reserved.**

If you have any questions related to the data sheet, please contact our nearest sales office via e-mail or telephone (details via **salesaddresses@nexperia.com**). Thank you for your cooperation and understanding,

Kind regards,

Team Nexperia

BUK1M200-50SGTD

Quad channel logic level TOPFET

Rev. 01 — 31 March 2003

Product data

1. Product profile

1.1 Description

Quad temperature and overload protected power switch based on TOPFET™ Trench technology in a 20-pin surface mount plastic package.

Product availability:

BUK1M200-50SGTD in SOT163-1 (SO20).

1.2 Features

- Power TrenchMOS™
- Overtemperature protection
- Overload protection
- Input-source voltage resets latched protection circuitry.
- Control of output stage and supply of overload protection circuits derived from input
- 5V logic compatible
- Current trip protection
- ESD protection for all pins
- Overvoltage clamping for turn off of inductive loads
- Low operating input current permits direct drive by micro-controller.

1.3 Applications

- Low-side driver
- Pulse Width Modulation
- DC switching
- General purpose switch for driving lamps, motors, solenoids and heaters.

1.4 Quick reference data

Table 1: Quick reference data

Symbol	Parameter	Min	Max	Unit
R_{DSon}	drain-source on-state resistance	-	200	mΩ
I_D	drain current	-	2.7	A
P_{tot}	total power dissipation	[1]	9.4	W
T_j	junction temperature	-	150	°C
V_{DS}	drain-source voltage	-	50	V

[1] All devices active.

PHILIPS

2. Pinning information

2.1 Pin description

Table 2: Pin description

Symbol	Pin	Description
n.c.	1, 11, 10, 20	not connected
D1	2,19	drain 1
I1	3	input 1
D2	4,17	drain 2
I2	5	input 2
D3	6,15	drain 3
I3	7	input 3
D4	8, 13	drain 4
I4	9	input 4
S4	12	source 4
S3	14	source 3
S2	16	source 2
S1	18	source 1

3. Block diagram

Fig 3. Elements of the quad channel TOPFET switch.

4. Limiting values

Table 3: Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134).

Symbol	Parameter	Conditions		Min	Max	Unit
V_{DS}	drain-source voltage		[1]	-	50	V
I_D	drain current	$T_{sp} = 25\text{ °C}$; Figure 5	[2][3]	-	2.7	A
I_I	input current	clamping		-	3	mA
I_{IMS}	non-repetitive peak input current	$t_p \leq 1\text{ ms}$		-	10	mA
P_{tot}	total power dissipation	$T_{sp} = 25\text{ °C}$; Figure 4	[4]	-	9.4	W
T_{stg}	storage temperature			-55	+150	°C
T_j	junction temperature	normal operation	[5]	-	150	°C
Overvoltage clamping [6]						
$E_{DS(CL)S}$	non-repetitive drain-source clamping energy	$T_{amb} = 25\text{ °C}$; $I_{DM} \leq I_{D(th)(trip)}$; inductive load	[3]	-	100	mJ
$E_{DS(CL)R}$	repetitive drain-source clamping energy	$T_{sp} \leq 125\text{ °C}$; $I_{DM} = 1\text{ A}$; $f = 250\text{ Hz}$	[3]	-	5	mJ
Overload protection [7]						
$V_{DS(prot)}$	protected drain-source voltage	$V_{IS} \geq 4\text{ V}$		-	35	V
Reverse diode						
I_S	source (diode forward) current	$T_{sp} \leq 25\text{ °C}$; $V_{IS} = 0\text{ V}$		-	2	A
Electrostatic discharge						
V_{esd}	electrostatic discharge voltage	$C = 250\text{ pF}$; $R = 1.5\text{ k}\Omega$		-	2	kV

- [1] Prior to the onset of overvoltage clamping. For voltages above this value, safe operation is limited by the overvoltage clamping energy.
- [2] Refer to overload protection characteristics in **Table 5**.
- [3] For a single active device.
- [4] For all devices active.
- [5] Not in an overload condition with drain current limiting.
- [6] At a drain-source voltage above 50 V the power MOSFET is actively turned on to clamp overvoltage transients.
- [7] With the protection supply provided via the input pin, the TOPFET is protected from short circuit loads. Overload protection operates by means of drain current trip or by activating the overtemperature protection.

$$P_{der} = \frac{P_{tot}}{P_{tot(25^{\circ}C)}} \times 100\%$$

Fig 4. Normalized total power dissipation as a function of solder point temperature.

Fig 5. Continuous drain current as a function of solder point temperature.

5. Thermal characteristics

Table 4: Thermal characteristics

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
$R_{th(j-sp)}$	thermal resistance from junction to solder point.	mounted on thermo clad board				
		one device active	-	-	45	K/W
		all devices active	-	-	13.3	K/W

6. Static characteristics

Table 5: Static characteristics

Limits are valid for $-40\text{ }^{\circ}\text{C} \leq T_{sp} \leq +150\text{ }^{\circ}\text{C}$ and typical values for $T_{sp} = 25\text{ }^{\circ}\text{C}$ unless otherwise specified.

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
Off-state output characteristics						
V _{DS(CL)}	drain-source clamping voltage	V _{IS} = 0 V; I _D = 10 mA	50	-	-	V
		V _{IS} = 0 V; I _D = 200 mA; t _p ≤ 300 μs; δ ≤ 0.01; Figure 18	50	62	70	V
I _{DSS}	drain-source leakage current	V _{IS} = 0 V; V _{DS} = 40 V	-	-	100	μA
		T _{sp} = 25 °C; Figure 19	-	0.05	10	μA
On-state output characteristic						
R _{DSon}	drain-source on-state resistance	V _{IS} ≥ 4 V; t _p ≤ 300 μs; δ ≤ 0.01; I _D = 100 mA	-	-	380	mΩ
		T _{sp} = 25 °C; Figure 8 and 9	-	150	200	mΩ
Input characteristics ^[1]						
V _{IS(th)}	input-source threshold voltage	V _{DS} = 5 V; I _D = 1 mA	0.6	-	2.4	V
		T _{sp} = 25 °C; Figure 13	1.1	1.6	2.1	V
I _{IS}	input supply current	normal operation				
		V _{IS} = 5 V	100	220	400	μA
		V _{IS} = 4 V	80	195	330	μA
		protection latched				
		V _{IS} = 5 V	1.4	2	2.5	mA
		V _{IS} = 3 V; Figure 14 and 16	0.7	1.1	1.5	mA
V _{IS(rst)}	input-source reset voltage	t _{rst} ≥ 100 μs; Figure 17	^[2] 1.5	2	2.5	V
t _{rst(latch)}	latch reset time		^[3] 10	40	100	μs
V _{IS(CL)}	input-source clamping voltage	I _I = 1.5 mA; Figure 15	5.5	-	8.5	V
R _{IG}	input-gate resistance		^[4] -	2.5	-	kΩ
Overload protection characteristic ^[5]						
I _{D(th)(trip)}	drain current trip threshold	4 V ≤ V _{IS} ≤ 5.5 V				
		T _{sp} = 25 C; Figure 11	4	6.1	8	A
		Figure 10	3	6.1	9	A
Overtemperature protection characteristic						
T _{J(th)}	threshold junction temperature	4 V ≤ V _{IS} ≤ 5.5 V; Figure 12	150	170	-	°C
Source drain diode characteristic						
V _{SD}	source-drain (diode forward) voltage	I _S = 2 A; V _{IS} = 0 V; t _p = 300 μs	-	0.83	1.1	V

[1] The supply for the logic and overload protection is taken from the input.

[2] The input voltage below which the overload protection circuits will be reset.

[3] To reset the protection circuitry from the latched state, V_{IS} is reduced from 5 V to 1 V.

[4] Not directly measurable from device terminals.

[5] The TOPFET switches off to protect itself when one of the overload thresholds is exceeded. It remains latched off until reset by the input.

$$a = \frac{R_{DSon}}{R_{DSon(25^{\circ}C)}}$$

Fig 6. Normalized drain-source on-state resistance factor as a function of junction temperature.

10. Data sheet status

Level	Data sheet status ^[1]	Product status ^{[2][3]}	Definition
I	Objective data	Development	This data sheet contains data from the objective specification for product development. Philips Semiconductors reserves the right to change the specification in any manner without notice.
II	Preliminary data	Qualification	This data sheet contains data from the preliminary specification. Supplementary data will be published at a later date. Philips Semiconductors reserves the right to change the specification without notice, in order to improve the design and supply the best possible product.
III	Product data	Production	This data sheet contains data from the product specification. Philips Semiconductors reserves the right to make changes at any time in order to improve the design, manufacturing and supply. Relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN).

[1] Please consult the most recently issued data sheet before initiating or completing a design.

[2] The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL <http://www.semiconductors.philips.com>.

[3] For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

11. Definitions

Short-form specification — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

Limiting values definition — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

Application information — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

Right to make changes — Philips Semiconductors reserves the right to make changes in the products - including circuits, standard cells, and/or software - described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no licence or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.

13. Trademarks

TOPFET — is a trademark of Koninklijke Philips Electronics N.V.

TrenchMOS — is a trademark of Koninklijke Philips Electronics N.V.

12. Disclaimers

Life support — These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors
