

SPREAD SPECTRUM CLOCK SYNTHESIZER

IDT5P50901/2/3/4

Description

The IDT5P50901/2/3/4 is a family of 1.8V low power, spread spectrum clock generators capable of reducing EMI radiation from an input clock. Spread spectrum technique is capable of reducing the harmonic frequency amplitude peaks by several dB.

Ordering Information

Input Frequency

10 to 25 MHz - 5P50901NBGI/5P50901DVGI
 20 to 50 MHz - 5P50902NBGI/5P50902DVGI
 40 to 100 MHz - 5P50903NBGI/5P50903DVGI
 80 to 170 MHz - 5P50904NBGI/5P50904DVGI

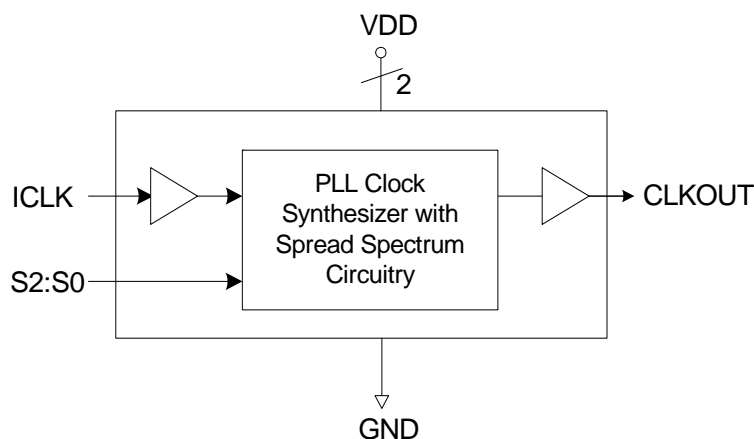

Features

- 8-pin DFN package (2x2mm)
8-pin MSOP package (3x4.9mm)
- Provides a spread spectrum output clock
- Input frequency range of 10 to 170 MHz
- Output frequency range of 10 to 170 MHz
- Center and down spread
- Peak reduction by 8 dB to 16 dB typical on 3rd through 19th odd harmonics
- Low EMI feature can be disabled
- Operating voltage of 1.8 V, 2.5 or 3.3V
- RoHS 6 compliant package

Spread Modulation Frequency Table

Part Number	Input (MHz)	Modulation (kHz)	Input (MHz)	Modulation (kHz)	Modulation Frequency (kHz)
5P50901	10	27	25	67.5	$ICLK * 27 / 10000$
5P50902	20	27	50	67.5	$ICLK * 27 / 20000$
5P50903	40	27	100	67.5	$ICLK * 27 / 40000$
5P50904	80	27	170	57.4	$ICLK * 27 / 80000$

Spread Direction and Percentage Select Table

S2	S1	S0	Spread Direction	Spread Percentage
0	0	0	OFF	--
0	0	1	Center	± 0.25
0	1	0	Center	± 0.5
0	1	1	Center	± 1.0
1	0	0	Center	± 1.5
1	0	1	Center	± 2.0
1	1	0	Down	-0.5
1	1	1	Down	-1.0

Pin Description

Pin Number	Pin Name	Pin Type	Pin Description
1	ICLK	Input	Input clock.
2	VDD	Power	Voltage supply. Connect to 1.8 V ± 0.1 V, 2.5 V $\pm 10\%$ or 3.3 V $\pm 10\%$,
3	S0	Input	Function select 0 input. Selects spread amount and direction per table above. Internal pull-down resistor.
4	S1	Input	Function select 1 input. Selects spread amount and direction per table above. Internal pull-down resistor.
5	S2	Input	Function select 2 input. Selects spread amount and direction per table above. Internal pull-down resistor.
6	GND	Power	Connect to ground.
7	CLKOUT	Output	Clock output.
8	VDD	Power	Voltage supply. Connect to 1.8 V ± 0.1 V, 2.5 V $\pm 10\%$ or 3.3 V $\pm 10\%$

External Components

Decoupling Capacitor

As with any high-performance mixed-signal IC, the IDT5P50901/2/3/4 must be isolated from system power supply noise to perform optimally.

A decoupling capacitor of $0.01\mu\text{F}$ must be connected between each VDD and the PCB ground plane.

Series Termination Resistor

Clock output traces over one inch should use series termination. To series terminate a 50Ω trace (a commonly used trace impedance), place a 33Ω resistor in series with the clock line, as close to the clock output pin as possible. The nominal impedance of the clock output is 20Ω .

External Clock Input

This device operates from an external clock input and as such does not have a on chip oscillator circuit.

Spread Spectrum Profile

The IDT5P50901/2/3/4 is a low EMI clock generator using an optimized frequency slew rate algorithm to facilitate down stream tracking of zero delay buffers and other PLL devices.

The modulation rate is directly relate to the input clock frequency.

For input frequency ICLK, then use the modulation frequency indicated for the part below.

PCB Layout Recommendations

For optimum device performance and lowest output phase noise, the following guidelines should be observed.

- 1) The $0.01\mu\text{F}$ decoupling capacitors should be mounted on the component side of the board as close to the VDD pin as possible. No vias should be used between the decoupling capacitors and VDD pins. The PCB trace to VDD pins should be kept as short as possible, as should the PCB trace to the ground via.
- 2) To minimize EMI, the 33Ω series termination resistor (if needed) should be placed close to the clock output.
- 3) An optimum layout is one with all components on the same side of the board, minimizing vias through other signal layers. Other signal traces should be routed away from the IDT5P50901/2/3/4. This includes signal traces just underneath the device, or on layers adjacent to the ground plane layer used by the device.

Absolute Maximum Ratings

Stresses above the ratings listed below can cause permanent damage to the IDT5P50901/2/3/4. These ratings, which are standard values for IDT commercially rated parts, are stress ratings only. Functional operation of the device at these or any other conditions above those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods can affect product reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.

Item	Rating
Supply Voltage, VDD	-0.5 V to 5.0 V
All Inputs	-0.5 V to VDD +0.5 V
Ambient Operating Temperature	-40 to +85° C
Storage Temperature	-50 to +150° C
Junction Temperature	125° C
Soldering Temperature	260° C

Recommended Operation Conditions

Parameter	Min.	Typ.	Max.	Units
Ambient Operating Temperature	-40		+85	°C
Power Supply Voltage VDD (measured in respect to GND)	+1.7	+1.8	+1.9	V
	+2.25	+2.5	+2.75	V
	+2.97	+3.3	+3.63	V

DC Electrical Characteristics

Unless stated otherwise, **VDD = 1.8 V ±0.1 V**. Ambient Temperature -40 to +85°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		1.7	1.8	1.9	V
Input High Voltage	V _{IH}	ICLK, S2:S0	VDD x 0.8		VDD + 0.3	V
Input Low Voltage	V _{IL}	ICLK, S2:S0	GND		VDD x 0.2	V
Output High Voltage	V _{OH}	I _{OH} = -12 mA	VDD x 0.75	VDD		V
Output Low Voltage	V _{OL}	I _{OL} = 12 mA		GND	VDD x 0.25	V
IDD		No load	See table page 6			
Input Capacitance				5		pF
Load Capacitance				5		pF
Internal Pull-down Resistor	R _{PD}	S1:S0		200	260	kΩ

Unless stated otherwise, **VDD = 2.5 V ±10%**. Ambient Temperature -40 to +85°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		2.25	2.5	2.75	V
Input High Voltage	V _{IH}	ICLK, S2:S0	VDD x 0.8		VDD + 0.3	V
Input Low Voltage	V _{IL}	ICLK, S2:S0	GND		VDD x 0.2	V
Output High Voltage	V _{OH}	I _{OH} = -25 mA	VDD x 0.9	VDD		V
Output Low Voltage	V _{OL}	I _{OL} = 25 mA		GND	VDD x 0.1	V
IDD		No load	See table page 6			
Input Capacitance				5		pF
Load Capacitance				5		pF
Internal Pull-down Resistor	R _{PD}	S1:S0		200	260	kΩ

Unless stated otherwise, **VDD = 3.3 V ±10%**. Ambient Temperature -40 to +85°C

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Operating Voltage	VDD		2.97	3.3	3.63	V
Input High Voltage	V _{IH}	ICLK, S2:S0	VDD x 0.8		VDD + 0.3	V
Input Low Voltage	V _{IL}	ICLK, S2:S0	GND		VDD x 0.2	V
Output High Voltage	V _{OH}	I _{OH} = -33 mA	VDD x 0.9	VDD		V
Output Low Voltage	V _{OL}	I _{OL} = 33 mA		GND	VDD x 0.1	V
IDD		No load	See table page 6			
Input Capacitance				5		pF
Load Capacitance				5		pF
Internal Pull-down Resistor	R _{PD}	S1:S0		200	260	kΩ

Operational IDD

AC Electrical Characteristics

Unless stated otherwise, $V_{DD} = 1.8\text{ V} \pm 0.1\text{ V}$, $2.5\text{ V} \pm 10\%$ or $3.3\text{ V} \pm 10\%$. Ambient Temperature -40 to $+85^\circ\text{C}$

Parameter	Symbol	Conditions	Min.	Typ.	Max.	Units
Output Clock Duty Cycle			45	50	55	%
		$1.8\text{ V} \pm 0.1\text{ V}$, $>130\text{ MHz}$	40	50	60	
Output Rise Time	t_{OR}	20% to 80%, Note 1		1.2		ns
Output Fall Time	t_{OF}	80% to 20%, Note 1		1.2		ns
Spread Spectrum Modulation Rate		10 to 25 MHz input (IDT5P50901)	27		67.5	kHz
		20 to 50 MHz input (IDT5P50902)	27		67.5	
		40 to 100 MHz input (IDT5P50903)	27		67.5	
		80 to 170 MHz input (IDT5P50904)	27		57.3	
Jitter Cycle to Cycle		Cycle to cycle jitter		150		ps
Output Settling Time		Note 2			3.0	ms

Note 1: Measured with 5 pF load

Note 2: Time between V_{DD} rising above minimum operating voltage and stable frequency output

"G" after the two-letter package code denotes Pb-Free configuration, RoHS compliant.

While the information presented herein has been checked for both accuracy and reliability, Integrated Device Technology (IDT) assumes no responsibility for either its use or for the infringement of any patents or other rights of third parties, which would result from its use. No other circuits, patents, or licenses are implied. This product is intended for use in normal commercial applications. Any other applications such as those requiring extended temperature range, high reliability, or other extraordinary environmental requirements are not recommended without additional processing by IDT. IDT reserves the right to change any circuitry or specifications without notice. IDT does not authorize or warrant any IDT product for use in life support devices or critical medical instruments.

Revision History

Rev.	Date	Originator	Description of Change
A	6/28/11	R. Willner	Initial release.
B	6/30/11	R. Willner	Correct modulation rate on 5P50904, rise/fall time definition.
C	07/29/11	R. Willner	Added "Internal Pull-down Resistor" spec to DC char tables
D	10/07/11	R. Willner	Correct typographical errors.
E	05/14/12	R. Willner	Changed max Supply Voltage VDD rating from 7.0V to 5.0V
F	08/21/12	R. Willner	1. Changed "Output High/Low Voltage" specs; conditions and min/max values for 1.8V DC electrical characteristics 2. Added an additional line for "Output Clock Duty Cycle" in AC char table to include conditions and values for 1.8V

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.

"Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.

"High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.

Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.

6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
