

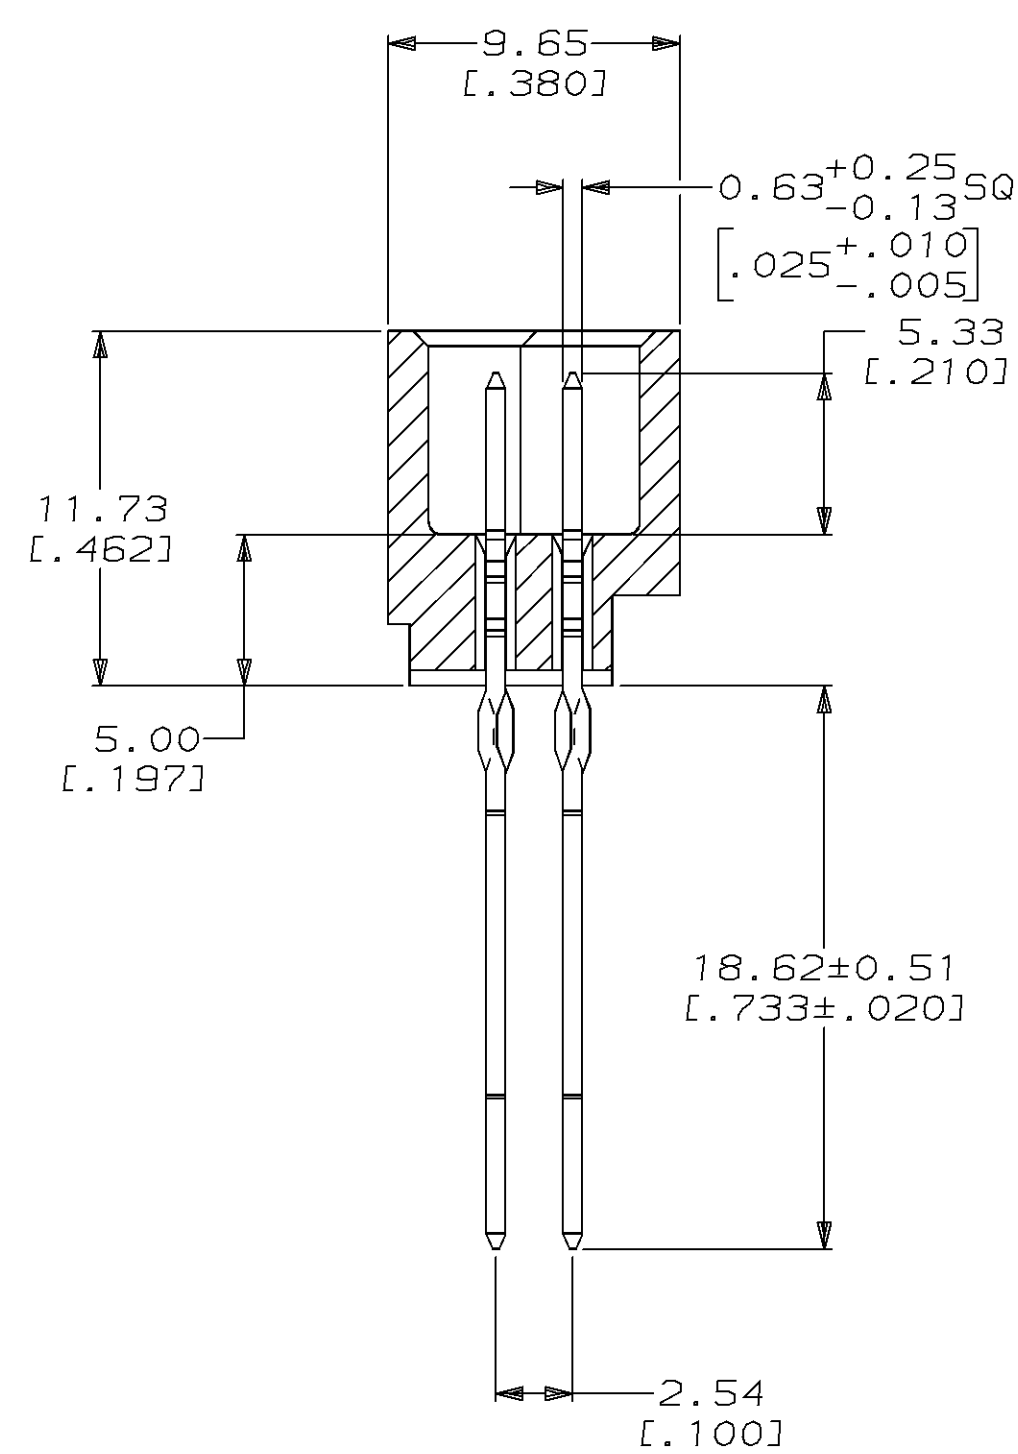

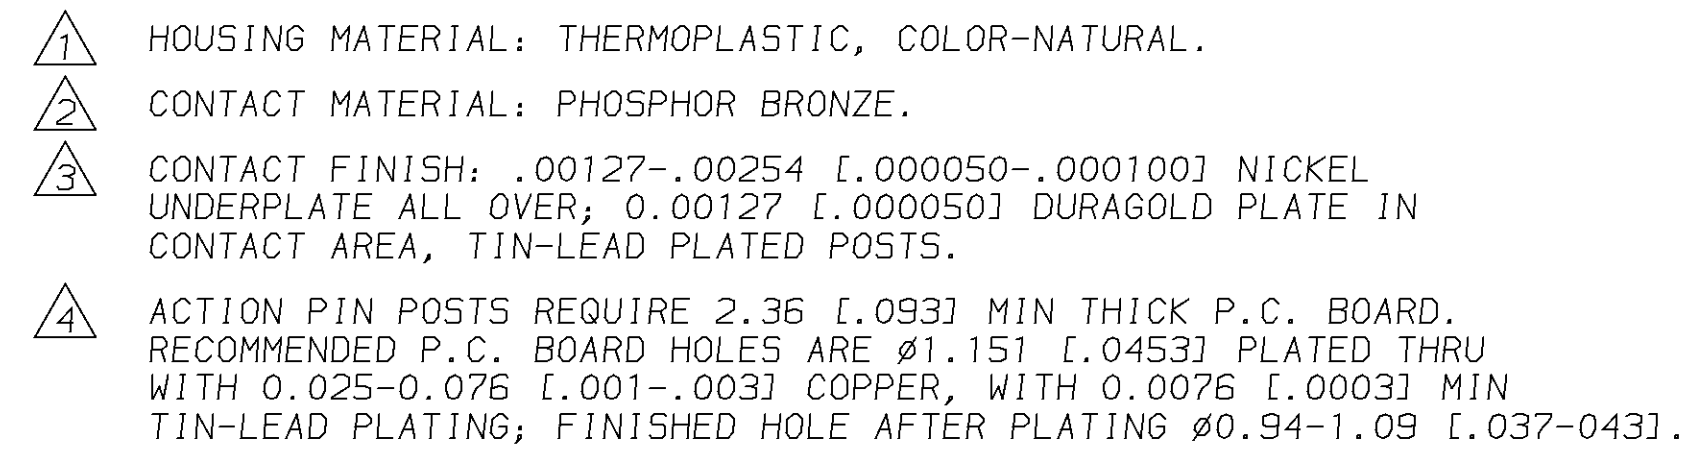

Diagram illustrating the recommended P.C. board layout for the 68000 microprocessor. The layout shows a central horizontal strip of components, including a 68000 microprocessor (U1) and various support components like resistors, capacitors, and a crystal. Dimensions are provided in inches and millimeters. Key dimensions include a total width of 201.93 inches [7.950], a central section of 74 spaces, and a total length of 187.96 inches [7.400]. The layout is symmetrical around a central vertical axis.
