

Compact wireless alarm system - 3400080-434

A superbly styled 4 zone compact alarm system utilising the latest wireless sensor technology and a traditional hard wired siren.

- Available in 418MHz and 4334MHz
- Full installation instructions enclosed.
- The alarm system can be expanded using any number of additional wireless detectors
- Operated by simple remote control or via the keypad.
- Suitable for the protection of home, office, garage, boat or caravan.
- New product for 2004!

Because the system has no complex wiring and all the fittings are included it can be working and protecting your home in a matter of hours and moved again very easily when decorating or moving house.

The use of digital wireless technology makes this system easy to install and simple to operate with no complicated programming or setting up.

The system can be easily set to any one of over 500 different frequency channels called 'site codes' thereby virtually eliminating any possible duplication with a similar system.
