Britool – Professional Quality Designed For Experts

Over one hundred years have passed since the British Tool and Engineering company started manufacturing tools. A lot has changed in that time – but Britools reputation for supplying high quality tools that stand up to the toughest challenges has stayed constant. Experts in all areas of engineering choose Britool – confident in the knowledge that it will perform to their highest expectations. To recognize the support of these generations of hardworking professionals that have helped maintain Britool at the cutting edge of industry for over a century Britool is becoming Britool Expert – in honour of their efforts.

The Britool Expert range is part of the Expert range developed by the world leader in handtools and offers a competitive, worldwide answer dedicated to professional industrial and automotive needs. The entire Expert range of tools is designed and tested to exacting specifications and achieves or exceeds ISO and DIN Standards. The Expert range will allow us to deliver an ever broadening range of products which will be constantly updated to deliver the highest levels of performance.

CONDITIONS OF SALE

Your attention is drawn to our Trading Terms and Conditions and Conditions of Sale which are printed at the back of this price list.
All registered trade marks are acknowledged. Prices do not include VAT.

CONDITIONS OF SALE

These conditions are written mainly in plain English. In these conditions “we” means Stanley UK Sales Ltd or Stanley UK Limited, subsidiaries of Stanley UK Holding Ltd, and “you” means the person who accepts a quotation for the sale of the goods and whose order for the goods is accepted by Stanley UK Sales Ltd or Stanley UK Limited.

CATALOGUE ITEMS

1. Quotations and Orders

- a) All quotations are made and orders accepted under the following conditions. We must give written agreement to new or altered conditions. All orders accepted by us are under these conditions and not your conditions.
- b) Orders must be for boxes or cartons of items. We can vary order quantities to meet this condition.
- c) You cannot return any goods unless you have our permission.
- d) Each order will be delivered to one address. We will only deliver to your address and not a third party.
- e) Once we have processed an order you cannot cancel or change it. As we continuously improve our products we can alter specifications without telling you and in these circumstances you have no right to cancel any order to claim damages.
- f) The price we charge you for the goods is the price of them on the date we send them, not the price on the date of your order. We will add V.A.T. to our prices at the proper rate on the date we send the goods.
- g) Any goods shall be sold subject only to these terms and conditions and, for the avoidance of doubt, shall not be sold upon any sale or return basis.

2. Delivery

- a) We will try to meet all delivery dates, but we are not legally liable for any delay in delivering or any losses caused by a delay. Time shall not be of the essence for delivery.
- b) Unless we agree otherwise we will deliver goods by our standard delivery service, choosing the most convenient and economical method available at the time of delivery. We will only make deliveries by other means if you ask us to and you pay.
- c) We will deliver and collect goods in normal working hours unless we have agreed otherwise. If this is inconvenient and you ask us to deliver or collect goods at a different time you will have to pay.
- d) Carriage charges are paid on all orders of a minimum nett value of £50. All orders below £50 net will be subject to a handling charge of £10.

3. Risk of Loss

- a) Once the goods have been delivered to your premises you are responsible for any loss or damage caused to the goods after you have received them.
- b) You must examine the goods immediately when they are delivered and tell us about any damage to, or shortages of, cartons within two working days. If the contents of any cartons are missing or damaged you should tell us within fifteen working days of the date of the invoice. When the goods are delivered you must also write details of any visible damage to the goods on the carrier's delivery sheet.

4. Accepting Goods

We will assume you have accepted the goods fifteen business days after they have been delivered unless you tell us about any complaints within that period. Also, if you, your agents, employees or licensees have used the goods, we will count this as accepting the goods.

5. Guarantees

- a) We only guarantee that when we deliver the goods they will not be damaged or have any faults. We are not liable for fair wear and tear.
- b) If you think that the goods are faulty you should tell us and wait for an instruction to either return the goods to a place we tell you or keep the goods for us to inspect. If we accept that there is a fault we will either repair or replace the faulty part or parts or refund the original price of the goods.
- c) The situation described in 5(b) above shall not apply to the following:
 - 1) any goods which have been repaired or altered by somebody who isn't an employee of ours.
 - 2) goods which have been mixed with other goods or used to create other products.
 - 3) any goods which, in our opinion, have been subject to any accident or to damage or which have been improperly stored, maintained or used.
- d) We are not liable for the following:
 - 1) any direct loss or damage except the liabilities we have already mentioned.
 - 2) any indirect, consequential or incidental loss or damage of any kind (including loss of profits, revenue or contracts) or for any damage to or destruction of any property.
 - 3) injury to, or the death of, any person unless that injury or death is caused by our carelessness or that of our employees.
- e) Our only guarantees, conditions and liabilities are those given in this document.
- f) You must indemnify us against all claims, actions, costs, losses, damages or expenses caused by or in connection with the goods unless we are liable under these conditions.
- g) If we repair or replace any goods under 5(b) we will take the date that the repair is finished or the goods are replaced to be the date on which the goods were delivered.

6. 'Force Majeure'

Without prejudice to any other terms of this agreement we are not liable for any act or omission or if we do not enforce, or we delay enforcing any condition in this Agreement because of any circumstances or causes beyond our control.

7. Payment

- a) Payment is due within 30 days from the date of Invoice.
- b) If you delay paying for no good reason we may choose to suspend all deliveries to you until we have received all payments which are due.
- c) If you are late with any payment we can charge interest at the rates provided in the Late Payment of Commercial Debts Act 1998.
- d) If you disagree with an invoice you must tell us about this within 7 days of receiving the goods, and that if our investigation confirms that your query is justified you do not need to pay for the amounts disputed on the invoice or any interest due.

8. Owning the Goods

- a) We own the goods until you have paid for them in full. If you pay by cheque, bill of exchange or a promissory note, we own the property until the same has been honoured. We may apply any payments you make to any of your invoices which we see fit.
- b) Until you have paid for the goods you will be acting as our fiduciary agent and bailee. You must keep records of the goods and store the goods in a way that makes them clearly identifiable as being our property. These goods should be insured by you or as part of your general insurance cover. We will assume that any goods you have which we supplied belong to us (unless you can prove otherwise).
- c) If you:
 - 1) make any arrangement with your creditors;
 - 2) go into liquidation;
 - 3) appoint a receiver to manage all or part of your assets;
 - 4) fail to make payment for the goods; or
 - 5) cannot, in our opinion pay your debts; then, we have the following rights:
 - 1) to enter any property and repossess the goods without giving you notice.
 - 2) to give you written notice that you must not sell or get rid of the goods until we have received full payment for them.
 - 3) to cancel any undelivered goods and stop any goods that are being transported to you.
- d) At any time we may give you the ownership of the goods if we give you notice of our intention to do so. Under condition 8(c) ownership of the goods will pass to you when you sell or get rid of goods which we own immediately before you sold or got rid of them.
- e) We may sue you for the price of the goods when the payment is due even though the ownership of the goods may not have passed to you.

9. We may impose restrictions on the reselling of goods, subject to U.K. and E.E.C. trading laws.

10. If any condition or part of condition in this Agreement is not valid or cannot be enforced this will not affect any part of the condition or Agreement.

11. If the ownership of your company changes we will automatically cancel this Agreement and negotiate a new one.

12. These conditions of sale only apply to your company and your own branch companies which carry out similar trade. They are not offered to your associate companies, either within or outside its trade unless we agreed this when we were negotiating this Agreement.

13. Governing Law

This Agreement, for all purposes, is governed and construed by the laws of England.

THE BRITool GUARANTEE

All Britool products are manufactured to the highest standards and are guaranteed against defective materials and workmanship when used for the purpose for which they are designed. In the unlikely event that a product fails in normal use, it will be replaced or repaired (for a full listing of the Britool guarantee, please see the listing on page 68).

Toolkits & Storage

The Britool storage range includes boxes for all applications. All are manufactured under the strictest quality control environment to offer the highest standards of performance. We are confident that whatever model you select, it will provide a high quality storage solution. All Britool toolboxes featured in this section offer a number of common features:

Drawer Slides

All drawers feature high specification ball bearing drawer slides – a sure sign of quality. These allow loads of up to 30kg per drawer, and give a smooth drawer action even when fully loaded.

Rear Locking Bars

The locking mechanism activates securing bars at the rear of the drawer – making it almost impossible to force drawers open by prying.

Fully lockable

All Britool toolboxes feature high quality locks, enabling all drawers to be secured.

Full drawer extension

100% opening gives easy access – even to products stored at the very back of a drawer.

Drawer liners

All Britool toolboxes featured include high density, pre-cut drawer liners.

Manoeuvrability

All roller cabinets have heavy duty 5x2" castors. This cushions the motion of the cabinet when moved over a non smooth surface. This makes movement easier and reduces stress on the cabinet.

Side handles

All tool chests feature cushion grip side handles. Heavy duty models feature twin handles at each end.

Hinged Lids

All tool chest lids have a full width piano hinge – giving a smooth action with increased security.

Twin lid stays

For safety and durability all tool chests are fitted with two lid stays. This removes unnecessary stress from both lid and hinge whilst the lid is open – significantly increasing the life of the tool chest. Heavy duty models feature twin gas struts.

All fixings

Wheels & handles are attached using reinforced holes containing high strength precision cut threaded inserts. This simplifies the attaching or removing of components and also makes a significant contribution to units overall structural strength.

All Britool toolboxes are constructed from heavy gauge steel – giving unrivaled durability.

- Heavy duty construction designed for heavy use
- Heavy duty ball bearing drawer slides
- Powder coat finish – for improved corrosion resistance
- Heavy duty castors
- Double wall construction – for increased strength and reliability
- Drawer liners included
- Storage compartment

Socketry

Specification

Britool sockets and accessories are manufactured from the highest quality materials using the latest techniques. All areas of the production process are subject to the highest quality control standards.

All Britool sockets and accessories should meet the highest performance expectations and are manufactured to the latest international standards.

Innovative features have been incorporated into product design wherever possible in order to give the greatest levels of functionality and ensure optimum performance.

Stress Relief Drive

Britool's advanced socket profile configuration increases the contact area between the socket and the fastener, minimising stress, and reducing the chance of damage to the fastener.

The load is applied to the fastener's flat edge rather than the corners: even if the fastener is already damaged, performance will be superior to that of a standard-profile socket.

Conventional Profile

Corner point contact gives high stress areas – highlights show contact points on the corner of the fastener

SRD Profile

Distributed surface loads relieves possible stress area – highlights show contact points away from the corner of the fastener

Forging Technology

Where possible, Britool products are forged from a single piece of steel, using the most appropriate technology.

The best forging solution gives the most uniform, linear grain flow—only this will give the highest levels of strength and durability.

This can be compared to the grain flow in wood—a shape with uninterrupted grain, grown into a shape, will always be stronger than one that has been cut, and liable to split across the grain.

To achieve high levels of grain flow uniformity, Britool uses several different methods dependant on the shape required—traditional drop forging, upset forging and cold forging.

Ratchets

In order to offer outstanding choice and ensure that the correct tool is always available, Britool offers a variety of ratchet styles and mechanisms:

Lever Reversible Ratchet

This extremely strong mechanism is available in 1/4", 3/8" and 1/2" drive. The 72 tooth design offers a minimum working arc of 5°. The mechanism is extremely smooth, and gives an almost negligible reverse torque—removing the risk of accidentally undoing the fastener on the reverse stroke. The twin pawl mechanism of this ratchet uses a different pawl for each direction of travel. This means that each is ideally positioned to take the greatest possible load—making it almost impossible to overload this ratchet design in normal use. Thumb lever controlled reversible action.

Clutch Ratchet

A highly innovative, simple, robust design, this roller bearing mechanism is available in 1/4", 3/8" and 1/2" square drive. The toothless nature of this ratchet gives a silent and smooth action with a minimum working arc of less than 1°—this is the ultimate ratchet for use where access is restricted. The design features a push through square drive to change direction.

Swivel Head Ratchet

This ratchet design is available in 1/4", 3/8" and 1/2" square drive. It features a 72 tooth mechanism – offering a minimum working arc of 5°. Despite its compact size, the mechanism offers extremely good load characteristics – 17 teeth are engaged during loading, giving 45% more strength than most conventional ratchets. The swivel head design offers unrivalled access.

Flexi-Head Ratchet

Available in 3/8" and 1/2", this high strength design features the same mechanism as the lever reversible ratchet, coupled with a long handle and a flexible head – giving great access characteristics and allowing high torque loads.

Lock-on Quick Release Mechanism

The lever-reversible ratchet design is also available with a quick release mechanism which locks the socket in place, making accidental loss of the socket virtually impossible.

1/4" Square Drive Accessories

D46

1/4" SD Lock-On Reversible Ratchet

Ref	Description
D46	Polypropylene handle – resistant to hydrocarbons, 72 Tooth mechanism - 5° minimum working arc, Lock-On design, Thumb reversible

Specification

Designed to exacting standards and manufactured from the highest quality alloy steel, Britool impact sockets are heat treated to ensure that they conform to the highest standards of reliability and durability.

Britool impact sockets are suitable for use with all air and power tools.

All Britool impact sockets incorporate Stress Relief Drive, increasing the maximum applicable torque and reducing fastener damage.

Manufactured to ISO 1174-2

WARNING!

Do not use chrome finished sockets on impact and power tools.

9 Piece 3/8" Square Drive Metric Impact Socket Set

Torque Wrenches

The torque wrench is an essential hand tool that is now fundamental in all garages and workshops.

The Britool torque wrench range has been carefully designed to provide a range of solutions to meet the needs of the torque-tightening user.

What is Torque ?

- Torque is a turning or twisting force, the result of a force applied at a given distance about a known centre
- It is recorded in units of force x distance

i.e. **Nm = Newtons (force) x metres (distance) or**

lbf/ft = lbf (force) x feet (distance) (1 Newton = 1kg m/s²)

Classic Mechanical Torque Wrenches

The Britool Classic torque wrench has won a reputation for reliability and quality established over 50 years. The unique mechanism has distinct advantages which ensure it remains a firm favourite with users worldwide.

Unique 3-phase Mechanism

A progressive torque build-up to the selected setting is easily detected by three clear signals:

- 1 **SIGHT** see the mechanism progressively move towards the point of break as the load is applied
- 2 **TOUCH** feel the point of torque
- 3 **SOUND** unmistakable CLICK
This makes it ideal for use in noisy environments

ACCESSIBILITY

Compact design ideal for restricted access

DURABILITY

Proven to be one of the most robust products in the market, the first choice for arduous conditions

ACCURACY

Exceeds requirements of ISO 6789

SCALE

Multiple scales – Nm, kg.m, lbf.in and lbf.ft are branded into steel tube, giving readability for the life of the product

FLEXIBILITY

Push-through square drive for left and right hand operation

SETTING

Retractable adjuster knob cannot be altered by accident

SERVICE

Fully repairable with dedicated service kits

Classic Mechanical Torque Wrench – Non-Length Dependant

Unlike most other torque wrenches, the mechanism pivots around the square drive. This gives the major advantage in that the torque wrench is not length dependant. As a result there is no variation to the application of the preset torque value, no matter where the handle is grasped.

Classic Torque Wrench Ranges

Wrenches

Combination Wrenches

Britool combination wrenches feature Stress Relief Drive on the ring end. All open jaw ends feature a constant radius of curvature – reducing stress concentrations and jaw flexing. Both of these features enhance fastener grip and prolong both tool and fastener life. All Britool combination wrenches are manufactured to ISO 7738.

Britool combination wrenches are supplied in four different length variants – short, standard, long and extra long.

Britool combination wrenches are clearly marked with the wrench size on the open jaw head for ease of identification.

Open Jaw Wrenches

All open jaw ends feature a constant radius of curvature – reducing stress concentrations and flexing of the jaws.

Ring Wrenches

Britool Ring Wrenches are offset at 45° for ease of access and feature Stress Relief Drive.

Britool wrenches are manufactured to the latest ISO standards. All are forged from the highest quality steel and precision machined to exacting standards. They fulfil the needs of the professional engineer.

- Drop forged to ensure uniform grain structure, giving increased strength and reliability
- Heat treated in carefully controlled conditions to ensure optimum performance for every wrench
- Chrome plated for maximum corrosion protection

Britool's advanced Stress Relief Drive (SRD) is standard on all 12 point rings. This reduces fastener wear, assists in the removal of worn fasteners, and enables higher torque loads to be applied.

Britool's advanced ring configuration increases the contact area between the socket and the fastener, minimising stress and reducing the chance of fastener damage.

Because the load is applied to the flat of the fastener, rather than the corners – even if the fastener is already damaged – the drive is superior to a standard profile socket.

Conventional Profile

Corner point contact gives high stress areas – highlights show contact points on the corner of the fastener

SRD Profile

Distributed surface loads relieves possible stress area – highlights show contact points away from the corner of the fastener

SAFETY MEASURES

Never grind or alter the shape of the wrench

Never hammer or strike a wrench unless it is designed for this purpose

Never work with damaged or chipped tools

Always ensure there is a positive fit onto the fastener

Do not extend length of wrench by locking two together

Ratcheting Wrenches

- 72 tooth mechanism for 5° minimum working arc
- Manufactured from chrome vanadium steel and heat treated for maximum strength
- Precision machined and hardened mechanism
- Flexi head design for ease of access

Flexible Metric Ratcheting Combination Wrench Set

- Designed for scaffolding and steel work applications • Heavy duty 32 tooth ratchet mechanism
- Zinc plated • Stress relief drive on all socket heads • Double sided mechanism gives two sizes per wrench

Ratcheting Podger Wrenches

Ref.	Description
RRPM1719	17 x 19
RRPM1921	19 x 21
RRPM2427	24 x 27

Screwdrivers & Insert Bits

Screwdrivers Technical Information

The performance of Britool screwdrivers exceeds ISO standards. This comprehensive range gives outstanding performance, providing optimum torque with a minimum of user fatigue.

Range

Britool screwdrivers are available with a full range of tips including long reach versions.

Screwdriver Blades

All Britool screwdriver blades have shot blasted tips to give increased grip—ensuring positive fastener location, and reducing slippage and possible damage or injury.

Heat treatment gives the correct balance of hardening and tempering—for optimum hardness without being brittle.

Blades designed to fit large fasteners incorporate a hexagon bolster, allowing a wrench to be used if extra torque is required.

Screwdriver Handles

Britool screwdriver handles are ergonomically designed with a two piece construction combining comfort in use with durability. A soft, textured rubber grip allows maximum torque to be applied without discomfort.

The tough bi-material handle is moulded directly onto the flanged blade, preventing the blade from twisting or pulling out of the handle.

- Colour coded for easy identification
- Textured finish ensures a firm grip even when greasy
- Large diameter handle gives a positive grip when applying high torque loads
- Small diameter area aids accurate location and fast screw turning
- Holed handle allows easy and safe storage

Ratcheting Screwdrivers

- Robust gearless mechanism – gives less than 1° minimum working arc
- Negligible reverse torque
- Magnetic bit retention
- Complete with bits: Pozidriv 1, 2, Phillips 1, 2 Slotted 4 & 6.5mm

Gearless Ratcheting Screwdrivers

Ref.	Description	Insert Bits	Length mm
BCSD1	Gearless ratcheting screwdriver	Phillips® PH1, 2 Pozidriv® PZ1, 2 Slotted 4, 6.5mm	225
BCSD2	Stubby gearless ratcheting screwdriver	Phillips® PH1, 2 Pozidriv® PZ1, 2 Slotted 4, 6.5mm	115
BCSD3	Long reach gearless ratcheting screwdriver	Phillips® PH1, 2 Pozidriv® PZ1, 2 Slotted 4, 6.5mm	310

Professional 35 Piece Ratcheting Screwdriver Set

Ref	Contents
BRSDSET1	• Fine tooth ratcheting screwdriver handle • 1/4" hexagon screwdriver blades - 150mm, 250mm • 1/4" square drive screwdriver blade - 250mm • 1/4" flexible screwdriver blade - 290mm • Hexagon bits: 3,4,5,6,7 & 8mm • Slotted bits: 4,5,5 & 7mm • Pozidriv® bits: #1,2 & 3 • Phillips® bits: #1,2 & 3 • Torx® bits: TX10,15,20,25,27,30 & 40 • Tamperproof Torx® bits: TTX10,15,20,25,27,30 & 40 • 1/4" hex - 1/4" square drive adaptor

- Handle can be adjusted to give an ergonomic pistol grip design allowing much higher torque loads to be applied
- Adjustable grip ratcheting screwdriver with 1/4" hexagon drive and interchangeable blade
- Cartridge style 6 bit holder
- Fine tooth high load reversible ratchet mechanism

Adjustable Grip Ratcheting Screwdriver

- The Britool HS212 hacksaw has a unique design which features a reversed bow. This allows extremely high blade tension levels up to 80kg to be applied progressively
- Blade tension levels of this magnitude are essential to gain the maximum benefit from bi-metal blades

Reversed Bow Hacksaw

Ref.	Length mm	Height mm	Thickness mm	Blade Length mm
HS212	385	145	26	300

Front hand rest

Tensioning system

Two blade positions—45° and 90°

Minimum clearance needed to start cutting

Britool Professional Vices

- All forged, heavy duty steel construction for maximum longevity
- Precision machined for smooth fault free operation
- Integral anvil design
- Interchangeable jaws (excludes EV3)

Britool Professional Vices

TRADING TERMS AND CONDITIONS

Prices

- All goods are supplied at prices ruling on the date of receipt of orders. All prices are subject to VAT at the rate ruling on the date of despatch
- All prices quoted are published list prices, in GBP

Minimum Order Value (excl. Spare Parts)

- All orders over £50 net, will be delivered carriage paid to most UK mainland addresses
- All orders received with a net value below £50, will be subject to a surcharge of £10, to cover picking, packing and despatch costs
- All orders above £150 net will be delivered carriage paid for offshore and Scottish Highland regions
- Spare parts, as defined in our published price lists, are subject to separate terms and conditions, which are detailed in the Spare Parts Section of our price lists
- Special delivery instructions (eg. overnight, next day, or direct to the distributor's customer) will be subject to a separate, supplementary charge. For details of the scale of charges, please refer to the Sales Office
- **N.B.** Special supplementary charges are in addition to normal minimum order charges
- Any order requiring split deliveries will be subject to the carriage paid conditions for each component of the order

Additional Export Conditions

- For mainland Europe a minimum nett order value of £200 will be applied.
- For countries outside mainland Europe a minimum nett order of £300 will be applied
- For orders below the minimum order value, a £20 surcharge will be applied to cover export packaging and documentation
- EEC euro zone countries will be invoiced in euros
- For all other countries, invoicing will be in GBP unless specially agreed prior to acceptance of order

Returns

- It is our policy not to accept unauthorised returns (other than repairs or warranty claims)
- All requests for returns must be authorised by a representative of the company prior to return
- All returns which have been authorised (other than returns under guarantee), will be subject to a re-stocking charge of 15%. Where goods require re-packaging, prior to re-stocking the charge will be 25%. The application of this charge will be at the discretion of the company, based upon full and final inspection of the goods as received

Warranty

- Goods accepted against warranty claims will be replaced by the same or an equivalent product, or repaired at the Company's discretion. Credit will not be given except for claims where an equivalent product is no longer available
- The Company reserves the right to accept, or reject all warranty returns, based upon full and final inspection of the goods as received by the Company, or a representative of the Company

GUARANTEE

All Britool products are manufactured to the highest standards and guaranteed against defective materials and workmanship when used for the purpose for which they were designed. All registered trade marks are acknowledged. Prices do not include VAT.

Guarantee Terms and Conditions

General Terms:-

- 1) All products are guaranteed to perform the task for which they were designed, providing they are used under normal working conditions
- 2) This guarantee is supplementary to the legal statutory guarantee
- 3) The guarantee is without time limit, except in cases of:
 - a) Fair wear and tear
 - b) Wilful damage or misuse
 - c) Negligence (inc. failure to adhere to instructions for use, or other recommendations made by the company)
 - d) Alterations and unauthorised repairs
 - e) Where products have a specified fixed period of guarantee, as indicated in the published price list, or in documentation supplied with the product.
 - f) Consumables, which are subject to the legal statutory guarantee only.
- 4) The guarantee offers a free of charge exchange, or repair, limited to defective parts only
- 5) Products no longer in the range will be replaced by an equivalent product, or refunded if there is no equivalent available, at the Company's discretion
- 6) The guarantee gives no right to damages for loss, or consequential loss, under any circumstances

Specific Terms (application of the guarantee):-

- a) Moving parts (eg. ratchet mechanisms) which are subject to wear and tear, have a fixed period of guarantee. Products containing moving parts will be replaced during the guarantee period only. Thereafter, a chargeable repair or reconditioned unit will be offered
- b) Electronic products, which have a fixed period of guarantee, will be replaced or repaired, at the Company's discretion, during the guarantee period only. Thereafter, a chargeable repair or reconditioned unit will be offered. The guarantee does not include upgrades to software based products
- c) Toolboxes and roller cabinets unless stated otherwise are subject to the legal statutory guarantee, and will have moving parts only repaired or replaced under the terms of the guarantee
- d) Products with valves, seals, "O" rings, etc. are subject to a specified fixed period guarantee, outside of which, standard repair charges will apply
- e) For products issued with a Certificate of Calibration, the maintenance of the accuracy of such calibration, is outside the scope of the guarantee
- f) All repairs and refurbished products have a guarantee of 3 months only, against parts and labour

Conditions of Sale:-

Your attention is drawn to our Conditions of Sale which are printed at the back of this price list

It is important to follow the Health and Safety warnings supplied with each product

The Britool Guarantee

General Terms

1. All products are guaranteed to perform the task for which they were designed, provided they are used under normal working conditions.
2. This guarantee is in addition to your statutory rights.
3. This guarantee is without time limit, except in cases of:
 - a. Fair wear and tear.
 - b. Wilful damage or misuse.
 - c. Negligence (including failure to adhere to instructions for use or other recommendations made by the Company).
 - d. Alterations and unauthorized repairs.
- e. Where products have a specified fixed period of guarantee, as indicated in the published price list, or in documentation supplied with the product.
- f. Consumables, which are subject to the legal statutory guarantee only.
4. The guarantee offers a free of charge exchange or repair, limited to defective parts only.
5. Products no longer in the range will be replaced by an equivalent product or refunded if there is no equivalent available, at the Company's discretion.
6. The guarantee gives no right to damages for loss, or consequential loss under any circumstances.

Specific Terms Applicable To The Guarantee

1. Moving parts (eg ratchet mechanisms) which are subject to wear and tear have a fixed period of guarantee. Products containing moving parts will be replaced during the guarantee period only. Thereafter, a chargeable repair or reconditioned unit will be offered.
2. Electronic products, which have a fixed period of guarantee will be replaced or repaired at the company's discretion, during the guarantee period only. Thereafter a chargeable repair or reconditioned unit will be offered. The guarantee does not include upgrades to software based products.
3. Toolboxes, roller cabinets and workbenches, unless otherwise stated are subject to the statutory guarantee. Moving parts will only be replaced or repaired under the terms of the guarantee.
4. Products with valves, seals, O-rings, etc are subject to a specified fixed period guarantee, outside of which standard repair charges will apply.
5. For products issued with a Certificate of Calibration, the maintenance of the accuracy of such calibration is outside the scope of the guarantee.
