Matrix

Weller brings to the market an extended generation of versatile soldering/desoldering, SMD rework stations and tools. Performance has been increased with soldering irons and desoldering irons up to 150 W.

Choose between Weller stations with powerful in-built pumps, or smaller units without pumps that allow you to connect to your own factory line.

All Weller stations easily connect to a variety of new and existing Weller tools and accessories to provide even greater flexibility. The matrix below makes selection easy, and puts you firmly in control of all your workbench needs.

Weller Multi-Digital Rework Station WMD 3 (With In-Built Pump)

Weller WMD 3 state-of-the-art technology simultaneously provides multi-digital control of working temperatures when reworking conventional ICs and SMDs.

A soldering iron, desoldering iron and hot air pencil can all be operated simultaneously because of the WMD 3's in-built micro-processor that infinitely controls each tool's set temperature and airflow. The display visually monitors each chosen working temperature and times preset hot gas pencil operations.

Technical Data

Dimensions:	240 x 270 x 105 mm (W x D x H)
Line Voltage:	230 V, 50 Hz
Power Input:	310 W
Safety Class:	1 and 3
Fuse:	T 1,5 A located at the power entry module
Controlling Tolerance:	Soldering/Desoldering iron $\pm 2\%$ of the final value Hot air pencil $\pm 30^{\circ}\text{C}$
Temperature Control with zero Voltage cross switching:	Soldering/Desoldering iron continuously 50°C – 450°C (WSP 150 150°C – 550°C) Hot air pencil continuously 50°C – 550°C
Pump:	Max. low pressure 0,7 bar; max. conveyance 20 l/min Hot air: max. 10 l/min
Potential Balance:	Via 3,5 mm switch jack socket on the back of the unit

Weller Multi-Digital Hot Air Station WMD 1A (With In-Built Pump)

Weller®

The multi application ability of this station makes it ideal for use in situations where the maximum amount of flexibility is required. The station has an in built pump to provide the air movement for the hot air pencil and the vacuum for the desoldering tool and can be used to rework both surface mounted and through hole components.

The WMD 1S control unit is the base and incorporates a micro processor controlled system to regulate the solder processes. The processor can also identify which tool is being used and calibrate the output automatically without the need for manual adjustment.

By use of the WCB 2 control box, additional functions can be programmed into the base unit such as, temperature lock, set back time, temperature offset, deg C/deg F, factory setting reset.

Technical Data

Dimensions:	240 x 270 x 105 mm (W x D x H)
Line Voltage:	230 V, 50 Hz
Power Input:	175 W
Safety Class:	1 and 3
Fuse:	Glass tube fuse Ø 5 x 20; T 800 mA located at the power entry module
Controlling Tolerance:	Soldering/Desoldering iron $\pm 2\%$ of the final value Hot air pencil $\pm 30^{\circ}\text{C}$
Temperature Control with zero Voltage cross switching:	Hot air pencil continuously 50°C – 550°C
Pump:	Max. low pressure 0,7 bar; max. conveyance 20 l/min Hot air: max. 10 l/min
Potential Balance:	Via 3,5 mm switch jack socket on the back of the unit
Foot switch connector:	over adapter as accessories

Weller Multi-Digital Desoldering Station WMD 1D (With In-Built Pump)

The multi application ability of this station makes it ideal for use in situations where the maximum amount of flexibility is required. The station has an in built pump to provide the vacuum for the desoldering tool and can be used to rework both surface mounted and through hole components.

The WMD 1S control unit is the base and incorporates a micro processor controlled system to regulate the

desolder processes. The processor can also identify which tool is being used and calibrate the output automatically without the need for manual adjustment.

By use of the WCB 2 control box, additional functions can be programmed into the base unit such as, temperature lock, set back time, temperature offset, deg C/deg F, factory setting reset.

Technical Data	
Dimensions:	240 x 270 x 105 mm (W x D x H)
Line Voltage:	230 V, 50 Hz
Power Input:	175 W
Safety Class:	1 and 3
Fuse:	Glass tube fuse Ø 5 x 20; T 800 mA located at the power entry module
Controlling Tolerance:	Soldering/Desoldering iron $\pm 2\%$ of the final value Hot air pencil $\pm 30^{\circ}\text{C}$
Temperature Control with zero Voltage cross switching:	Soldering/Desoldering iron continuously $50^{\circ}\text{C} - 450^{\circ}\text{C}$, (WSP 150 $150^{\circ}\text{C} - 550^{\circ}\text{C}$) Hot air pencil $50^{\circ}\text{C} - 550^{\circ}\text{C}$
Pump:	Max. low pressure 0,7 bar; max. conveyance 20 l/min Hot air: max. 10 l/min
Potential Balance:	Via 3,5 mm switch jack socket on the back of the unit
Foot switch connector:	over adapter as accessories

Weller Multi-Functional, Digital Desoldering Station WDD 161V

Weller®

The WDD 161V rework station is a dual output unit supplied with soldering and desoldering tools. It features a micro processor controlled system which allows independent temperature control of both tools. The station will automatically recognize the tool in use and calibrate itself for that tool. Vacuum for the desoldering tool is generated by an internal venturi driven from an external compressed air source.

The selected operating temperatures are displayed on a digital display switchable between tools. By use of the WCB 2 control box, additional functions can be pro-

grammed into the base unit such as, temperature lock, set back time, temperature offset, deg C/deg F, factory setting reset.

Technical Data

Dimensions:	115 x 166 x 101 mm (W x D x H)
Power Input:	165 W
Temperature Control:	Soldering/Desoldering iron continuously 50°C–450°C
Compressed Air:	Inlet pressure 500 KPA–600 KPA (58–87 psi) oil-free, dry compressed air
Compressed Air Converter:	Air consumption 35 l/min
	Vacuum 55 KPA (8 psi)
Compressed Air Connection:	Compressed air hose of 6 mm (0.24") external diameter
Safety Class:	1 (control unit), 3 (soldering tool)
Foot switch connector:	over adapter as accessories

Multi-digital display shows the set and read temperature of DSX 80 or other connected tool.

Microprocessor controlled channel. Automatically recognizes the DSX 80 and other connected tools and sets the appropriate control parameters.

Antistatic coating on housing meets ESD safety specifications

Mains switch.

LED showing heating pulses.

Seven-pin connector for connecting the DSX and other soldering tools.

Connector for vacuum

Connector for potential balance

Holder AK 20 for DSX 80 desoldering iron.

Holder WPH 80 for soldering pencil WSP 80.

DSX 80 Desoldering iron.

Finger switch to control vacuum.

"Longlife" tiplets. Different interchangeable types available.

WSP 80 soldering pencil.

Weller Multi-Functional, Digital Desoldering Station WDD 81V

The Weller WDD 81V Desoldering station features digital process control for exact temperature set. The in-built microprocessor circuitry automatically recognizes all Weller soldering irons and provides the optimal settings of the connected tool. The station comes with the DSX 80 Desoldering iron. A range of desoldering suction triplets enables solder to be removed from a wide variety of solder joints. The Weller CSF rework heads can also be

interchanged to provide total flexibility in the rework of most Flat Packs. An internal maintenance-free compressed air converter provides the vacuum for the desoldering iron. The WDD 81V requires a compressed air supply.

The Weller WCB 2 Calibration unit can be connected to the WDD 81V to further enhance programme setting or for PC interface.

Technical Data	
Dimensions:	115 x 166 x 101 mm (W x D x H)
Power Input:	95 W
Temperature Control:	Soldering/Desoldering iron continuously 50°C–450°C
Compressed Air:	Inlet pressure 500 KPA–600 KPA (58–87 psi) oil-free, dry compressed air
Compressed Air Converter:	Air consumption 35 l/min Vacuum 55 KPA (8 psi)
Compressed Air Connection:	Compressed air hose of 6 mm (0.24") external diameter
Safety Class:	1 (control unit), 3 (soldering tool)
Foot switch connector:	over adapter as accessories

Weller Multi-Functional, Digital Hot Air Station WAD 101

Weller®

The Weller WAD 101 Hot air station features digital process control for accurate temperature set. The in-built microprocessor circuitry automatically recognizes all Weller soldering irons and provides the optimal settings of the connected tools as well as the HAP 1 that comes as standard with the station. A wide range of nozzles and tools makes the WAD 101 ideal in many soldering and desoldering applications of surface mount devices.

The WAD 101 requires a compressed air supply with oil-free, dry air or nitrogen (N₂) where the airflow is manually controlled.

The Weller WCB 2 Calibration unit can be connected to the WAD 101 to further enhance programme setting or PC interface.

Technical Data

Dimensions:	134 x 166 x 101 mm (W x D x H)
Power Input:	105 W
Temperature Control:	Hot air pencil 50°C–550°C
Flow Rate:	Approx. 0–10 l/min
Compressed Air:	Inlet pressure 400 KPA (58 psi) oil-free, dry compressed air or nitrogen (N ₂)
Compressed Air Connection:	Compressed air hose of 6 mm (0,24") external diameter
Safety Class:	1 (control unit), 3 (soldering tool)
Foot switch connector:	over adapter as accessories

WSP 80IG Inert Gas Soldering Iron

for lead free soldering

For use in applications when soldering under an atmosphere of inert gas is required (prevention of joint oxidation). Driven from the WAD 101 station, inert gas is fed through the heating element of the iron to envelop the solder joint. The station controls the temperature of the iron and regulates the volume of gas supplied. The Stop + Go bench holder will automatically start the gas flow when the iron is removed from the holder and stop the gas flow when the iron is replaced.

The Set consists of:

- WSP 80 IG soldering iron with inert gas connection
- Stop+Go support WPH 81T
- Soldering tip LT B
- Connection hose: soldering iron – power unit (1.5 m)

Technical data WSP 80IG:

Temperature range:	50°C–450°C
Power:	80 W
Soldering tips model:	LT series
Order No.	005 33 158 99

Weller Flexibility.

Refer to the matrix to make your choice of connecting tools for the WMD 3, WMD 1A + D, WDD 161V, WDD 81V + VIL and WAD 101 (see matrix page 2).

HAP 1 Hot air pencil

HAP 1
005 33 114 99

The HAP 1, 100W/24V, provides a directional hot airflow that is adjustable and static-free. Electronically temperature controlled from 50°C to 550°C. Different nozzles available as accessories. Finger switch controls speed adjustable pump. Hot air pencil set, consisting of HAP 1 with finger switch, KH 27 Support for pencil, nozzle 1,2 and 3,0 mm, key and nutdriver for nozzle changing.

DSX 80 Desoldering iron and service kit

DSX 80 (DS 80 UNC*)
005 33 138 99
(005 13 191 99)

An 80W/24V desoldering iron for electronics rework. Electronically temperature controlled. Micro-finger switch controls quick-start, fast action vacuum pump. Different interchangeable tiplets, plus several CSF devices are available as accessories. DSX 80 set, consisting of DSX 80 Desoldering iron AK 20 Support, cleaning tool, glass collector, two desoldering nozzles, gasbet, anti-bloc paste, filter.

DXV 80 Desoldering iron

DXV 80
005 13 181 99

Connectable to all 80W desoldering stations. Handle utilizes the nonreturnable tin collector to hold the extracted solder. Use off thred less DX nozzles. DXV 80 set, consisting of DXV 80 Desoldering iron, and Support for iron.

LR 21 Antistatic soldering pencil

LR 21
005 33 112 99

Electronically temperature controlled 50W/24V soldering pencil. LR 21 set, consisting of LR 21 Antistatic soldering pencil, KH 20 Support for pencil.

LR 82 Antistatic soldering iron

LR 82
005 33 113 99

An 80W/24V soldering iron for high mass soldering. Dual sensor, electronically temperature controlled. LR 82 set, consisting of LR 82 Antistatic soldering iron, KH 27 Support for iron.

WSP 80 Micro soldering pencil

WSP 80
005 29 161 99

A micro soldering pencil, 80W/24V. This soldering pencil can be universally used in all situations from extremely delicate soldering to those where there is a greater temperature requirement. WSP 80 set, consisting of WSP 80 Micro soldering pencil with WPH 80 Support.

WSP 80IG Inert Gas Soldering Iron

WSP 80IG
005 33 158 99

For use in applications when soldering under an atmosphere of inert gas is required (prevention of joint oxidation). Driven from the WAD 101 station, inert gas is fed through the heating element of the iron to envelop the solder joint. The station controls the temperature of the iron and regulates the volume of gas supplied.

WSP 150 Soldering iron

WSP 150
005 33 135 99

The WSP 150, 150W/24V, soldering iron was specially developed for soldering tasks with extremely high heat requirements. The 150 W heater power combined with optimal transfer of heat to the soldering iron bit guarantee the high performance capability of the soldering iron. WSP 150 set, consisting of WSP 150 Soldering iron, KH 27 Support for iron.

WST 20 Thermal wire stripper with support

WST 20
005 25 030 99

The WST 20, 50W/24V, copes with all known thermoelastic plastics. Adjustable for a stripping length up to 30 mm. Additional blades available for stripping flat cables and shrinking.

WST 82 Thermal wire stripper with support

The WST 82 is the 80 W equipment of the WST 20. Adjustable for a stripping length up to 30 mm. Additional blades available for stripping flat cables and shrinking.

MPR 80 Antistatic Peritronic soldering pencil

MPR 80
005 33 131 99

An 80W Antistatic Peritronic soldering pencil that gives all-round vision when making intricate connections. Anti-static cord and handle. Electronically temperature controlled. Consists of MPR 80 Antistatic and KH 25P Support.

WMP Micro soldering pencil

WMP
005 33 155 99

The 65W micro pencil is up to the task with superior performance for both heat-up and thermal efficiency. Suitable to handle all micro components and fine pitch tasks. The WMP provides an extremely short tip-to-grip distance. The heater is integrated into the handle. When the tip wear out the heating element goes on. WMP set consisting of WMP micro soldering pencil and WPHM holder for WMP.

WHP 80 (80W/24V) Preheating plate

WHP 80
005 27 028 99

With a heating surface of 80 x 50 mm, they preheat IC boards prior to micro rework.

WTA 50 Tweezer

WTA 50
005 33 133 99

This tweezer is used to desolder SMD components. The tweezer has two moveable heating elements. WTA 50 set, consisting of WTA 50 Tweezer, AK 51 Support for Tweezer.

WSB 80 Solder bath

WSB 80
005 27 040 99

The WSB 80 is a very useful rework preparation tool. The solder bath is temperature controlled continuously from 50°C to 450°C via an existing 80W power source. The solder bath can be used to tin wire ends and clean leads of all extraneous solder particles in preparation for reworking. (Usable for lead free solder.)

WSB 150 Solder bath

WSB 150
005 27 042 99

The WSB 150 solder bath is optimally suited to tin coating and preparation of soldering components. It has a temperature range of 50°C–550°C with heat output of 150W, making the WSB solder bath an ideal accessory to the Weller WSD 150 soldering station. To guard against dripping solder residue, the solder bath is placed in a V2A tray, supplied as an optional extra. (Usable for lead free solder.)

WCB 2 Calibration unit

WCB 2
005 31 180 99

The intelligence of the digital Weller units can be further enhanced by being programmed by the WCB 2 Calibration unit. The WCB 2 feature temperature lock-out and off-set capabilities up to +40°C. The WCB 2 has the added ability to PC interface (RS 232) and a thermoelement type K and measuring tip.

Accessories

For easier rework and repair, Weller has a large range of desoldering nozzles and soldering nozzles.

Threadless nozzles for desoldering iron DSX 80, DSXV 80 and DXV 80

The new X series nozzle feature a threadless fixture system whereby the nozzle is inserted into the head and locked into place by applying a 1/4 turn. This feature allows the nozzles to be quickly and easily exchanged and also improves the rate of thermal transfer from the head to the nozzle.

* **HPB solder** = solder with high consumption of lead for special applications

** **Lead free solder** = the LF soldering tips have thicker layer of iron. This improves the lifetime and makes them ideal for working with lead free solder. Regular soldering tips can be used with lead free solder but it reduces their lifetime for physical reasons.

Additional Safety Rests

Safety rests with Stop+Go Function

The safety rests with Stop+Go function have an integrated micro switch which is activated when the soldering iron is picked up or put down. The operator can decide between an immediate or delayed (20 min) temperature reduction (SETBACK) to 150°C (300°F) and programme the power unit accordingly. The SETBACK time can be changed with the optional calibration box WCB 2. The temperature reduction extends the lifetime of the tips.

When working with the inert gas soldering iron WSP 80IG together with the hot air station WAD 101 the Stop+Go safety rest will start and stop the inert gas flow.

All Weller digital soldering stations and the WAD 101 hot air station automatically recognize the Stop+Go safety rests.

WPHT (WPHT)

Safety rests with Stop+Go Function for WMP

WPH 81T (005 15 144 99)

Safety rests with Stop+Go Function for WSP 80, WSP 80IG und MPR 80

Standard Safety rests

complete with sponge

AK 1 (005 15 010 99)

Support for DSX 80 (DS 80UNC) Desoldering iron, HAP 1 Hot air pencil, LR 21 and LR 82 Antistatic soldering pencils

AK 20 (005 15 030 99)

Support for DSX 80 (DS 80 UNC) Desoldering iron and HAP 1 Hot air pencil
