

CADET & ELF GD 2 ACCESSORY KIT

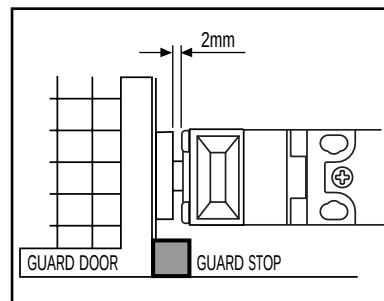

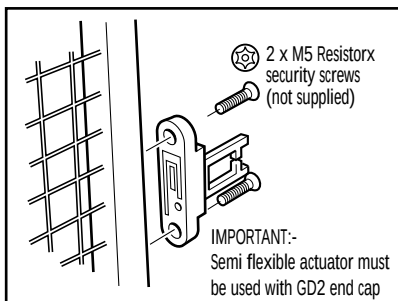

Description

The GD2 kit is intended for use with the Guardmaster Cadet and Elf interlock switches. The kit offers improved mechanical alignment, life and a reduction of minimum operating radius. Ideal for demanding applications.

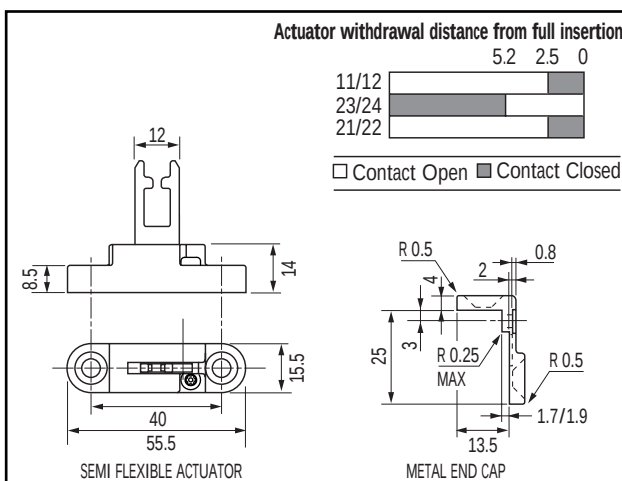

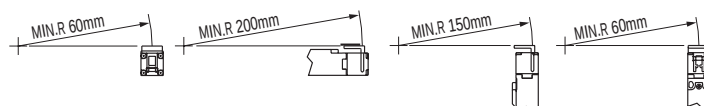

GD2 kit comprises of stainless steel end cap, 2 x fixing screws and 1 flexible actuator

IMPORTANT: The end cap fixing screws contained in this kit must be used.

Minimum Operating Radius Front-Entry using semi flexible GD2 actuator
