

Signal-Quick™ Sensor Mounting Accessories

Cushioned Sensor Mounts

Sensor Mounts

Install tubular proximity sensors with a Cushioned Sensor Mount and protect against over-travel damage. Reduces replacement expenses and downtime.

Hubbell's Cushioned Sensor Mounts feature:

- Spring-loaded housing eliminates impact damage.
- Reduces downtime & replacement expenses.
- Reduces spare sensor inventories.
- Shielded & non-shielded end caps eliminate abrasion damage.
- Block style or threaded housing designs.
- Anodized aluminum or stainless steel.

When something out of the ordinary happens or targets over-travel, the sensor simply retracts to avoid damage. The sensor returns to its original position and the equipment continues to operate.

Specifications

Material:	Anodized aluminum housing
	Zinc-plated brass jam nuts
	CSM12LP is all Stainless Steel
