

General-Purpose Prototyping Board

Prototyping boards with punched holes are convenient, economical tools for assembling circuit components as well as cost-effective alternatives to custom designs.

Features:

- Board Thickness: 0.062"
- Hole Spacing: 0.10"
- Pad size: 0.08"
- PCB Material: Epoxy Glass
- Size (W" x L"): 2.42 x 4.10
- Power/Ground perimeter bus with pad per hole
- Double-sided plated through-hole pads
- Number of Holes x Diagonal: 647 x 0.040"
- Number of Mounting Holes x Diameter: 4 x 0.120"
- Weight: 0.04 lbs. (0.64 oz.)
