ITAxxB1

Bidirectional Transil™ array for data line protection

Features

- High surge capability Transil array: $I_{PP} = 40$ A (8/20 µs)
- Peak pulse power: 300 W (8/20 µs)
- Up to 5 bidirectional Transil functions
- Low clamping factor (V_{CL} / V_{BR}) at high current level
- Low leakage current
- ESD protection up to 15 kV

Complies with the following standards

- IEC 61000-4-2 level 4
  - 15 kV (air discharge)
  - 8 kV (contact discharge)
- MIL STD 883G- Method 3015-7: class 3B
  - 25 kV (human body model)

Applications

Differential data transmission line protection, such as:

- RS-232
- RS-423
- RS-422
- RS-485

Description

Transil diode arrays provide high overvoltage protection by clamping action. Their instantaneous response to transient overvoltages makes them particularly suited to protect voltage sensitive devices such as MOS technology and low voltage supplied IC's.

The ITA series combines high surge capability against energetic pulses with high voltage performance against ESD.

2   Application information

This monolithic Transil Array is based on 6 unidirectional Transils with a common cathode and can be configured to offer up to 5 bidirectional functions. This imposes a maximum differential voltage between 2 input pins (see *Table 3*).

4 Package information

● Epoxy meets UL94, V0

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.
