

Liquidtight Flexible Metal Conduit Fittings

Our Liquidtight Line Is the End-All for Liquidtight Dust-Tight Connections.

All our high-performance products are designed to deliver excellent reliability as well as ease of installation in virtually any application. And you benefit from our expertise through our liquidtight and dust-tight connections available for a variety of conduits as well as portable cord.

Thomas & Betts offers the largest and most technologically advanced line of liquidtight fittings in the industry, including connectors for highly

specialized applications such as power and petrochemical plants, paper mills, robot manufacturers, packaging equipment, machine tool building, and other OEM and MRO applications. At Thomas & Betts, we integrate the latest manufacturing technologies with the highest quality materials available. So you can be assured of reliable, liquidtight products that offer improved on-the-job performance and reduced installation time and costs.

T&B Fittings

T&B makes liquidtight fittings for demanding situations.

Liquidtight Flexible Metal Conduit Fittings

Gland deflects water away from connector and prevents "pooling" of moisture. Look for the distinctive "Pumpkin" appearance of the gland nut.

Self-Cleaning Threads inside gland nut keep dirt and grime out of the threads as you tighten.

Double Beveled Sealing Ring is designed with five unique sealing mechanisms and cannot be installed backwards. Manufactured of high-temperature rated thermoplastic to demanding specifications. Look for the unique T&B blue color ensuring the highest quality fitting.

Safe Edge® Ground Cone provides superior bonding, stronger pullout, easy threading and conductor protection. Look for the distinctive "ski slope" appearance within the "pumpkin" gland nut.

Heat-Curled Insulator provides excellent wire protection and easier glide of conductors through and into the fitting. In addition, the heat-curved finish gives the insulator more strength than glue-in insulators. Look for the unique T&B blue color ensuring the highest quality fitting.

Precision Machined Rolled Threads provide smooth, easy installations.

Tempered Cast Locknut with Teeth provides superior strength and electrical bonding and can be installed without a wrench in the enclosure.

Revolver® Grounding Fitting

Saves time and money using our infinitely adjustable rotating ground lug. Simply align the lug in your preferred position and tighten the gland. You'll never need to worry about tightening it into an inconvenient position again.

T&B's Heat-Curled Insulator

Competitor's Glue-In Insulator

Add suffix -GR to the fitting catalog number to order the Revolver® Grounding version.

Liquidtight Flexible Metal Conduit Connectors

Liquidtight Connectors

Liquidtight Flexible Metal Conduit Fittings

Thomas & Betts Liquidtight fittings for flexible metal conduits are suitable for a wide range of installations, including heavy industrial applications. Our Liquidtight fittings are designed to stand up to demanding, wet or corrosive environments, including power and petrochemical plants, paper mills, and anywhere high performance is a requirement.

Features of Thomas & Betts Liquidtight Fittings include:

- Safe Edge® ground cone design that accepts variations in raceway convolutions and provides a positive bond
- Continuous sealing ring that completely surrounds the conduit to ensure a liquid-tight seal
- Zinc chromatic plating for longer life and exceptional appearance
- The broadest liquid-tight line in the industry, including PVC coated, externally grounded, aluminum series, Chase® style, nonmetallic Bullet series, wire mesh grips and more

T&B Fittings

Liquidtight Fittings for Special Applications

The Revolver® Externally Grounded Fitting

The Revolver liquidtight grounding fitting is our latest breakthrough in convenience to save time and money on the job while delivering a quality connection.

The grounding lug of the new Revolver connector can be rotated in a full circle for convenient positioning that doesn't change when you tighten it. Plus, it's available for the first time in aluminum. It's the newest innovation in Thomas & Betts' versatile line of Liquidtight Connectors — fittings you can count on for liquidtight and dust-tight connections, because all our products revolve around your needs.

Chase®-Style Fittings

Where space is tight, our Chase fittings enable for compact connections within an enclosure.

Sealing Gaskets

Thomas & Betts sealing gaskets are resistant to oil, coolants and hydraulic fluids as well as water, with a stainless steel retaining clip that ensures a quality seal. They're the ideal match to our Liquidtight connectors for a safe and secure seal.

Liquidtight Flexible Non-Metallic Conduit Fittings

When non-metallic, Type A or EFC conduits are called for, Thomas & Betts' XTRA FLEX® System has our outstanding Bullet fittings and conduits for liquid- and dust-tight connections.

Bullet Fittings

- Feature one-piece construction and a captive O-ring for ease of installation
- Provide a positive seal between the conduit and the connector
- Has tapered thread hub and sealing O-ring for a tight seal to the box or other enclosure

- Are constructed of nonburning, nondripping thermoplastic for high strength chemical resistance
- Feature a smooth insulated body for maximum dielectric strength
- Have a patented, serrated finger design that provides high mechanical pullout strength
- Include a complete range of flexible, non-metallic conduits — including both smooth and corrugated varieties — to complete our XTRA FLEX® System

5361 Series
Chase® Style

Application

- Used where flexible metal raceway is installed in outdoor or indoor locations where exposed to continuous or intermittent moisture
- To positively bond conduit to box or enclosure

Features

- Ability to install quickly with low torque effort
- Ground cone design offers the following advantages:
 - (1) Compresses metallic convolutions; provides high quality ground contact with low impedance and high raceway holding power (A)
 - (2) Single helical thread on ground cone is easy to install without cross thread; accepts variations in raceway diameters and convolution pitch (B)
 - (3) Rolled over edge protects conductors (C)

Sealing Ring Design Features

- (1) Grips and seals at leading and trailing edge — will not abrade raceway jacket (D)
 - (2) Provided with grooves on inside diameter for anti-sleeving (E)
 - (3) Shoulders on both ends for extra sealing (F)
 - (4) Symmetrical shape assures foolproof assembly
- Can be disconnected and reused.

- Watertight/oil tight installation at box or enclosure termination is assured by:

- (1) External taper thread hub on 5331 series and use of sealing gasket 5262 series (G)
- (2) Captivated sealing O-Ring on 5361 series (H)
- (3) Taper tapped hole on 5271 series

- Suitable for use in Class I Division 2, Class II Division 1 and 2 and Class III Division 1 and 2 Hazardous Locations per NEC Section 500

- Suitable as a grounding means per NEC Section 351-9 (up to 1¼" trade size on)

- ½" & 1¼" sizes laboratory tested to carry ground fault current of up to 1,000 amps RMS with duration of fault current 3 cycles

- Conforms with JIC requirements

- Available with imperial, ISO & PG threaded hub

Standard Material

5331-5361-5271 Series

Body, Gland, Locknut & Ground Cones: All steel or malleable iron

Sealing Ring and Insulator: All thermoplastic

Sealing Gasket: Stainless Steel and Santoprene™

5331SST-5331SSTHT Series

304 Stainless Steel insulated

Sealing Ring and Insulator: All thermoplastic

Sealing Gasket: Stainless Steel and Santoprene™

5231 AL Series

All Copper-free Aluminum (non-insulated)

Standard Finish

5331-5361-5271 Series

Electro Zinc Plated with Chromate Coating

5331ST-5331STH Series

Electro Zinc Plated with Chromate Coating

5231 AL Series

Copper-free Aluminum

Range

5331 Series ¾" through 6"* conduit
 5341 Series ¾" through 4" conduit
 5351 Series ¾" through 4" conduit
 5361 Series ¾" through 4" conduit
 5271 Series ¾" through 1¼" conduit
 5331SST Series ¾" through 2" conduit
 5331SSTHT Series ¾" through 2" conduit
 5231 AL Series ¾" through 4" conduit

*All hubs provided with taper pipe threads (NPT)

52® Series High-Temperature Flexible Metal Liquidtight Fittings

Where liquidtight flexible metal fittings are required in high-temperature environments up to 150° C:

T&B Fittings

T&B HT-Series Liquidtight Fittings are available straight, 45° and 90°.

- Fitting's body, gland, locknut and ground cone shall be constructed from steel or malleable iron, electro-zinc plated and chromate coated for corrosion protection
- Fitting's sealing ring and throat insulator will be molded from high-temperature nylon, suitable for temperatures up to 150° C and a minimum UL flammability rating of UL94-V2
- The fitting shall be constructed to accept high temperature flexible metal liquidtight conduit rated to 150° C
- The fitting shall have a plastic throat insulator to protect conductors

ATX Flexible Liquidtight Conduit

CAT NO.	CONDUIT SIZE	LENGTH (FT.)	INSIDE BEND RADIUS (IN.)
ATX038-TB	3/8"	100	1.5
ATX050-TB	1/2"	100	2.0
ATX075-TB	3/4"	100	2.5
ATX100-TB	1"	100	3.0
ATX125-TB	1 1/4"	50	3.5
ATX150-TB	1 1/2"	50	4.5
ATX200-TB	2"	50	5.5
ATX250-TB	2 1/2"	25	8.0
ATX300-TB	3"	25	10.0
ATX400-TB	4"	25	12.0

- The fitting shall have a steel ground cone to:
 - provide high quality ground contact
 - single helical thread for easy installation into conduit
 - rolled over edge to protect conductors
- The fitting shall have a plastic sealing ring to:
 - grip and seal at leading and trailing edge (double bevel up to 2") of conduit jacket
 - provide a watertight/oiltight seal
- The fittings shall be capable to terminate the conduit in either a threaded or threadless opening
- For applications where termination into a threaded opening is required, the fitting shall have external tapered NPT threads
- Fittings shall conform to UL 514B
- Accepted Manufacturers: Thomas & Betts — 5331-HT straight series, 5341-HT 45° series, 5351-HT 90° series; 5262 sealing ring series

Designed to resist corrosion.

LTA Flexible Aluminum Conduit

Use T&B LTA Flexible Aluminum Conduit with T&B Aluminum Liquidtight Fittings in corrosive environments or where weight is a major consideration — such as oil platforms, saltwater applications, pulp and paper, refineries, wastewater and food processing.

Specifications

- Construction: Utilizes the flexibility of a lightweight aluminum core, coupled with the advantage of a PVC jacket that is virtually unaffected by sunlight, acid and oil. WEEE and RoHS compliant
- Application: Used in situations where concerns of excessive weight and corrosion exist
- Standard Color: Machine tool gray
- Working Temperature: -20° C to +80° C
- Standard Materials/Finish: Conduit Core — Aluminum; Outer Jacket — PVC

Liquidtight Flexible Metal Conduit Fittings

The strength of steel — with superior corrosion-resistance!

Stainless Steel Liquidtight Conduit Connectors

Until now, there's been no ideal conduit fitting solution for use in heavily corrosive environments. Traditional metallic fittings corrode and require frequent replacement. Non-metallic fittings offer less strength, lower UV-resistance and don't stand up well in extreme temperatures. T&B® Stainless Steel Liquidtight Conduit Connectors are constructed of 304 stainless steel to resist corrosion while offering high strength, high UV-resistance and high endurance. Choose among a full range of fittings in straight, 45°, and 90° angled configurations for 3/8" to 2" conduit sizes. Look for the distinctive blue insulator and sealing ring for assurance of T&B quality.

- Ideal for industrial MRO and OEM applications in food and beverage, pharmaceutical, petrochemical, wastewater, salt water and other corrosive environments
- Connects metallic-cored liquidtight conduit to a box or enclosure
- Type 304 stainless steel body and gland-nut resist corrosion far better than other metallic fittings
- Stronger and more UV-resistant than non-metallic fittings
- Ground cones are available in 1 1/4", 1 1/2" and 2" sizes and are brass/nickel plated
- Available in straight, 45° and 90° angled configurations to fit conduit from 3/8" to 2"
- UL Listed Ratings: 3, 3R, 4, 4X
- Standard version (SST Series) rated for temperatures up to 105° C (221° F)
- Now available in a new high-temperature version (SSTHT Series) for applications up to 150° C (302° F)

NEW!

Liquidtight Flexible Metal Conduit Fittings

Sealing material resists oil, coolants and hydraulic fluids as well as water!

Liquidtight Sealing Gasket

The 5262 Series Sealing Gasket includes a stainless steel retaining ring to prevent elongation of the Santoprene® gasket, ensuring a superior seal.

Application

- When used with an externally threaded connector, provides a tight seal against oil, fumes or moisture at the knockout opening

Features

- Design locks resilient sealing material in steel
- Steel retainer protects seal from extruding out under torque and limits compression to an optimum predetermined value; provides high quality seal
- Resilient material flows and seals rough surfaces
- NEMA 3R, 4, 6 and 13

Standard Material

Retainer 316 Stainless Steel
Sealing Material Santoprene®
Thermoplastic Rubber

Range

¼" thru 4" Hub Size

For use with T&B Fittings.

Santoprene is a registered trademark of Advanced Elastomer Systems.

Provides a re-usable rain-, dust- and oil-tight seal for unused knockouts!

Liquidtight K.O. Plug

- No need to replace a NEMA 3R, 4, 6 or 13 box when a knockout is no longer used
- No tools needed to install — just push into knockout hole, and plug snaps in
- Made of flame-retardant Neoprene
- Meets UL 514 flammability test and NEMA 3R, 4, 6 and 13 requirements
- Temperature range – 30° C to 105° C

External Bonding Liquidtight Flexible Metal Conduit Connectors

Application

- Used where external bonding jumper is required around liquidtight flexible metal conduit
- To positively bond conduit to box or enclosure
- Used where flexible raceway is installed in outdoor or indoors location where exposed to continuous or intermittent moisture

Features

- Designed with provision to install bonding jumper in several positions
- Designed to accept mechanical or compression lug
- Ability to install quickly with low torque effort
 - (1) Compressed metallic convolutions; assures ground contact with low impedance and high raceway holding power (A)
 - (2) Single helical thread on ground cone is easy to install without cross thread; accepts variations in raceway diameters and convolution pitch (B)
 - (3) Rolled over edge protects conductors (C)
- Sealing ring design has following exclusive features:
 - (1) Grips and seals at leading and trailing edge — will not abrade raceway jacket (D)
 - (2) Provided with grooves on inside diameter for anti-sleeving (E)
 - (3) Shoulders on both ends for extra sealing (F)
 - (4) Symmetrical shape ensures foolproof assembly
- Can be disconnected and reuse
- Watertight/oil tight installation at box or enclosure termination is ensured by:
 - (1) External taper thread hub on 5331GR series and use of sealing gasket 5262 series (G)
 - (2) Taper tapped hole on 5271 series
- Suitable for use in Class I Division 2, Class II Division 1 & 2 and Class III Division 1 & 2 Hazardous Locations per NEC Article 500
- Suitable as a bonding means per UL 467 and NEC Article 351-9
- Conforms with JIC requirements

Standard Material

52/53GR Series

Lugs: High conductivity copper (for copper conductor only)
 Body, Gland, Locknut & Ground Cones: All steel or malleable iron
 Sealing Ring and Insulator: All thermoplastic
 Sealing Gasket: Stainless Steel and Santoprene
 Strap: Steel

52ALGR Series

Copper-free aluminum

Standard Finish

52/53GR Series

All Electro Zinc Plated and Chromate Coated except lugs
 Lugs: Bright Dipped

52ALGR Series

Zinc plating with clear chromate ground cones

Range

5331GR Series (straight connectors with male hub): 3/8" thru 6" conduit
 5341GR Series (45°): 3/8" thru 4" conduit
 5351GR Series (90°): 3/8" thru 4" conduit
 5232ALGR Series: 3/8" thru 1" conduit
 All hubs provided with taper pipe threads (NPT)

** 3/8" conduit fittings have 1/2" trade size hub. With safe-edge ground cone (through 4") and double bevel sealing ring (through 2").

UL Listed liquidtight; and CSA Certified watertight. Suitable for hazardous locations use in Class I, Div. 2; Class II, Div. 1 and 2; Class III, Div. 1 and 2, where general purpose equipment is specifically permitted per NEC Section 500-2(a). Available with DURA-PLATE® Finish. UL File No. E 3060 CSA File No. 638

*NOTE: 3/8"-1" fittings include Revolver® grounding device. For sizes 1 1/4" and up, fittings are supplied with a copper mechanical lug.

Liquidtight Flexible Metal Conduit Fittings

Liquidtight Union for Threaded Hub

41 Series

Steel, zinc plated and chromated. Ideal for angle fittings where swing clearance is not available.

Application

- To couple threaded end of a fitting or a pipe to a tapped opening in a box or enclosure where rotation of fitting or pipe is limited or restricted

Features

- Design provides high quality bond between fitting or pipe to the union
- Provided with resilient seal (A)
- Resilient seal subjected to controlled deformation; positive seal and reusability are ensured (B)
- Unique design centralizes throat openings of threaded hub and union (C)
- Provided with taper threaded hub for liquidtight assembly (D)
- Straight pipe threads on gland accept a straight or taper threaded hub on fitting or pipe to be coupled (E)
- Suitable for hazardous location use per NEC Article 501 Class I, Division 2, Article 502 Class II, Division 1 & 2 and Article III Division 1 & 2

Standard Material/Finish

Gland Steel/Electro Zinc Chromate Coated
Body Steel/Electro Zinc Chromate Coated
O-Ring Buna N/As Molded

Range

Hub (External Thread) 1/2" & 3/4" NPT
Gland (Internal Threads) 1/2" & 3/4" NPS

Liquidtight Flexible Metal Conduit Fittings

Provides a positive seal against water, oil and dust!

Steel Liquidtight Connectors for Type A Non-Metallic Flexible Conduit

- Steel or malleable iron construction with nylon-insulated throat
- Santoprene® sealing gasket with Type 316 stainless steel retaining ring
- NPT hub threads seal in female threads
- Offers high mechanical pull-out strength
- Supplied with sealing ring and steel locknut
- Available in straight, 45° and 90° in hub sizes from 3/8" to 2"

T&B Fittings

Straight Steel Liquidtight Connectors for Type A Conduit

CAT. NO.	CONDUIT SIZE	HUB THREAD	DIMENSIONS (IN.)	
			A	B
3720-TB*	3/8"	1/2 - 14 NPT	1 1/2	2
3721-TB	1/2"	1/2 - 14 NPT	1 3/4	2 1/8
3722-TB	3/4"	3/4 - 14 NPT	1 3/4	2 1/4
3723	1"	1 - 11 1/2 NPT	1 3/4	2 1/2
3724-TB	1 1/4"	1 1/4 - 11 1/2 NPT	2 3/4	2
3725	1 1/2"	1 1/2 - 11 1/2 NPT	2 3/4	3 3/8
3726	2"	2 - 11 1/2 NPT	3 1/2	3 3/8

Fittings for Liquidtight Flexible Non-Metallic Conduit Type A

Series 6302

Connectors for
Liquidtight Flexible
Non-Metallic
Conduit —
Straight Thermoplastic

Series 6322

Connectors for
Liquidtight Flexible
Non-Metallic
Conduit —
90° Thermoplastic

Series 6302SST

Connectors for
Liquidtight Flexible
Non-Metallic
Conduit —
Straight Stainless Steel

Application

- To provide a liquidtight, dust-tight connection between flexible, non-metallic conduit and a box or an enclosure

Features

- Serrated design provides high mechanical pull-out strength
- Unique component parts (body/gland) design ensures positive seal between conduit and connector
- Tapered thread hub and furnished Neoprene sealing O-ring provide a liquidtight, dust-tight seal to a box or enclosure
- Smooth insulated body throughout for maximum dielectric strength
- Captive O-ring and reduced number of parts save installation time

Standard Material

Body Thermoplastic or 304 Stainless Steel
Gland Thermoplastic or 304 Stainless Steel
O-Ring Neoprene (6302/6322)
Sealing Gasket 316 Stainless Steel and
Santoprene[®] Thermoplastic Rubber (6302SST)
Locknut Case-Hardened Steel (6302/6322) or
304 Stainless Steel (6302SST)

Standard Finish

Body, Gland & O-Ring As Molded
Locknut Electro Zinc (6302/6322)

Range

Conduit Size ½" thru 1¼"
Hub Size ½" thru 1¼" NPT
Santoprene is a registered trademark of Advanced Elastomer Systems.

Designed for Type A all-plastic raceways used in dynamic machine tool applications.

Thermoplastic Fittings for Liquidtight Flexible Non-Metallic Conduit Type A

- High-strength thermoplastic construction — even tougher than the raceway itself!
- Chemical-resistant — ideal for corrosive environments
- Non-burning, non-dripping thermoplastic material

CAT. NO.	CONDUIT SIZE	DIMENSIONS (IN.)		
		A	B	C

Liquidtight Flexible Metal Conduit Fittings

Stainless steel construction for unbeatable strength and corrosion resistance!

Stainless Steel Fittings for Liquidtight Flexible Non-Metallic Conduit Type A

- Type 304 stainless steel body, gland and locknut
- Supplied with Series 5262 Sealing Gasket (see p. A-113)
- UL Listed and CSA Certified for use with Type A conduit only

CAT. NO.	CONDUIT SIZE	DIA. (IN.)	LENGTH (IN.)
Straight Connector			
6302SST	1/2"	1.43	2.10
6303SST	3/4"	1.72	2.55
6304SST	1"	2.00	2.60
6305SST	1 1/4"	2.88	3.10

UL File No. E 23018

Ideally suited for continuous flexing applications or vibration.

Type A Non-Metallic Flexible Conduit

- No metal core to fatigue from flexing or vibration
- Smooth, seamless inner core of flexible PVC that is bonded to a covering of flexible PVC. Between these layers is a woven nylon mesh molded for reinforcement
- Available in sizes from 3/8" to 2"
- Working Temperatures: -20° C to 60° C
- Sunlight resistant
- UL Listed (conforms to UL Standard ANSI/UL 1660 Type A) UL file: E95745
- CSA Certified (conforms to CSA 22.2 No. 227.2 Type A)
- Meets NEC® Article 351, Part B (ANSI/NFPA-70) for flexible, liquidtight non-metallic conduit
