

# StarFinder

Electronical identification of voltage wires as well as horizontal and vertical studs.

- 1. Locating cables:** The position of live cables and wires can be precisely determined.
  - 2. Locating posts and beams:** In dry building work, enables you to reliably find stable fixing points, e.g. for wash basins, kitchen cupboards, shelves, heavy mirrors.
  - 3. Locating cavities:** Locating areas between uprights that are free from sub-structures, e.g. for making break-throughs (kitchen hatches, skylights).
  - 3. Reliable drilling:** Enables you to work with certainty and avoid drilling holes in the wrong places – so no need for subsequent repairs.
- Voltage warning: More safety when drilling! The AV voltage alarm warns continuously of live, unshielded wires.
  - Felt-covered base to protect surfaces.
  - 9 V block battery included.
