Products

Light Pipes

Bright•Pipes™ Optical Lightpipes produce bright, even indication based on optical ray tracing. They conveniently and economically conduct light from SMT LEDs through angles and distances to a viewable front lense surface in order to provide an attractive, bright and even indication of equipment of function status with a minimal attenuation of light output through the optical fibers that join the base, at the LED light source, to the lens front.

Part Number: 7511B65

Serial Number: 7511

LED type: SMD LED

Type: Right Angle, 2 High

Mounting: PCB Press-In Pin

Works with: 7016X Series

Housing ul rating: UL 94-V0

RoHS Status: Yes
