The modular MSM terminal block Series for printed circuit boards satisfies the user's mounting needs with the following possibilities:

- using individual single mold terminal blocks from 2 to 25 poles;
- combining single mold terminal blocks from 2 to 25 poles to obtain any number of poles; all MSM products, including single mold versions, have dovetail capabilities;
- minimizing the stock by storing only some base terminal blocks (ex. 2 - 3... 25 poles) to enable combinations as described above;
- being included in a custom Kit package to simplify the product management (part-numbers reduction), to minimize the stock, to improve the assembly and to reduce production errors.

Les borniers modulaires pour C.I. de la Série MSM répondent aux exigences de montage des utilisateurs en offrant les possibilités suivantes:

- l'utilisation singulière des borniers à base monolithique de 2 à 25 pôles;
- l'assemblage de plusieurs borniers à base monolithique de 2 à 25 pôles afin d'obtenir le nombre de pôles désirés;
- la gestion d'un stock minimum de borniers de base (ex. 2 - 3... 25 pôles) afin d'obtenir le cas de figure voulu;
- l'utilisation d'emballages en Kit qui simplifie la gestion interne du produit (réduction du nombre des code-articles), du stock, de l'assemblage et qui permet également une réduction des risques d'erreurs de montage.
