

ULC

UltracLens Cleaning Solvent

ULC is a special blend of solvents for cleaning for removal of many residues found in electro-mechanical applications. It is highly recommended for cold cleaning applications in conjunction with all types of electro-mechanical equipment. ULC is also ideal for use in cleaning tanks, as it has a low evaporation rate and high flashpoint.

- Removes stubborn residues; ideal for cleaning stencils
- Low evaporation rate; can be used in cleaning tanks
- High flash point; reduces the risk of fire caused by flammable solvents
- CO₂ propelled aerosol version available; 20% more active cleaner

Approvals	RoHS-2 Compliant (2011/65/EU): NATO Stock No (ULC25L):	Yes 6850-99-570-1210
Typical Properties	Boiling Point (°C) Freezing Point (°C) Flash Point (°C) Vapour Pressure @ 38°C (mmHg): Density @ 20°C (g/ml) Inhalation Toxicity (ppm) Residue on Evaporation (ppm) Evaporation Rate	173-193 -50 >60 3.75 0.79 300 10 66 (ether = 1)

Directions for Use

For safe, rapid cleaning of all types of electro-mechanical equipment where the use of water-based chemicals is inadvisable. Removes grease, oxides, flux and general dirt. ULC is harmless to metals and fabrics under normal conditions and safe to use on most plastics, however a small area should be tested before use. Immerse surface to be cleaned or spray onto surface to excess and allow to evaporate. A brush or foam tipped bud may be used to remove any stubborn deposits. For use on large scale production, ULC may be used in ultrasonic cleaning equipment which must be adapted for use with flammable liquids.
