PA0368.125NL	1:125	4	10.4	4	1900	500

NOTES:

- The maximum current rating is based on temperature rise of the component and represents the DC current which will cause a typical temperature rise of 40°C with no airflow.
- To calculate the value of the terminating resistor (Rt) use the following formula: $R_t (\Omega) = V_{REF} \cdot N / (I_{peak\ primary})$
- The peak flux density of device must remain below 2000 Gauss.
To calculate the peak flux density for a uni-polar current, use the following formula: $B_{pk} = 64.9 \cdot V_{REF} \cdot (Duty\ Cycle\ Max) \cdot 10^{-5} / (N \cdot Freq\ kHz)$
*for bi-polar current applications divide Bpk (as calculated above) by 2.
- Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number (i.e. PA0368.050NL becomes PA0368.050NL^T). Pulse complies to industry standard tape and reel specification EIA481.
- The "NL" suffix indicates an RoHS-compliant part number. Non-NL suffixed parts are not necessarily RoHS compliant, but are electrically and mechanically equivalent to NL versions. If a part number does not have the "NL" suffix, but an RoHS compliant version is required, please contact Pulse for availability.
- The temperature of the component (ambient plus temperature rise) must be within the stated operating temperature range.
