

SE2598L: 2.4 GHz Power Amplifier with Power Detector

Preliminary Information

Applications

- DSSS 2.4 GHz WLAN (IEEE802.11b)
- OFDM 2.4 GHz WLAN (IEEE802.11g)
- OFDM 2.4 GHz WLAN (IEEE802.11n)
- Access Points, PCMCIA, PC cards

Features

- Single 3.3 V Supply Operation
 - 19 dBm, EVM = 3 %, 802.11g, OFDM 54 Mbps
 - o 23 dBm, ACPR < -32 dBc, 802.11b
- 28 dB Gain
- Integrated temperature compensated power detector
- Digital power amplifier enable pin (VEN)
- Lead Free, Halogen Free and RoHS compliant
- Small package: 16 pin 3 mm x 3 mm x 0.9 mm QFN, MSL 1

Product Description

The SE2598L is a 2.4 GHz power amplifier designed for use in the 2.4 GHz ISM band for wireless LAN applications. The device incorporates a power detector for closed loop monitoring of the output power.

The SE2598L includes a digital enable control for device on/off control.

The SE2598L temperature compensated power detector is highly immune to mismatch at its output with less than 1.5 dB of variation with a 2:1 mismatch.

Absolute Maximum Ratings

These are stress ratings only. Exposure to stresses beyond these maximum ratings for a long period of time may cause permanent damage to, or affect the reliability of the device. Avoid operating the device outside the recommended operating conditions defined below. This device is ESD sensitive. Handling and assembly of this device should be at ESD protected workstations.

Package Handling Information

Because of its sensitivity to moisture absorption, instructions on the shipping container label must be followed regarding exposure to moisture after the container seal is broken, otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly. The SE2598L is capable of withstanding a Pb free solder reflow. Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. If the part is manually attached, precaution should be taken to insure that the device is not subjected to temperatures above its rated peak temperature for an extended period of time. For details on both attachment techniques, precautions, and handling procedures recommended, please refer to:
