

AN7310N

Dual Pre-Amplifier for Car Radio

■ Description

The AN7310N is a monolithic integrated circuit designed for dual pre-amplifier suitable for car stereo, portable stereo and portable cassette tape recorder. Stabilized characteristics can be obtained for high gain, low distortion, low noise and high output voltage, etc owing to the fact that 2 channels are built-in one chip.

■ Features

- High gain, low distortion and low noise
- Power ON/OFF noise suppression
- Easy for designing due to single-in-line package
- Good channel separation
