

N-Channel Depletion-Mode Vertical DMOS FET in Single and Dual Options

Features

- Very low gate threshold voltage
- Designed to be source-driven
- Low switching losses
- Low effective output capacitance
- Designed for inductive loads
- Well matched for low second harmonic when driven by Supertex MD2130

Applications

- Medical ultrasound beamforming
- Ultrasonic array focusing transmitter
- Piezoelectric transducer waveform drivers
- High speed arbitrary waveform generator
- Normally-on switches
- Solid state relays
- Constant current sources
- Power supply circuits

General Description

The Supertex DN2625 is a low threshold depletion-mode (normally-on) transistor utilizing an advanced vertical DMOS structure and Supertex's well-proven silicon-gate manufacturing process. This combination produces a device with the power handling capabilities of bipolar transistors and with the high input impedance and positive temperature coefficient inherent in MOS devices. Characteristic of all MOS structures, this device is free from thermal runaway and thermally-induced secondary breakdown.

Supertex's vertical DMOS FETs are ideally suited to a wide range of switching and amplifying applications where high breakdown voltage, high input impedance, low input capacitance, and fast switching speeds are desired.

The DN2625DK6-G contains two MOSFETs in an 8-lead, dual pad DFN package. The DN2625K6-G in the 14-lead QFN package is not recommended for new designs, but may continue to be purchased for existing designs.

Ordering Information

	5.00x5.00mm body				I _{DS}	
Device		14-Lead QFN* 5.00x5.00mm body 1.00mm height (max) 1.27mm pitch	BV _{DSX} / BV _{DGX} (V)	V _{GS(OFF)} (max) (V)	(pulsed) (V _{GS} = 0.9V) (min) (A)	
DN2625	DN2625K4-G	DN2625DK6-G	DN2625K6-G	250	-2.1	3.3

⁻G indicates package is RoHS compliant ('Green')

^{*} This package obsolete. For single MOSFETs use the TO-252 D-PAK (K4), for dual MOSFETs use the 8-Lead DFN (K6) (dual pad).

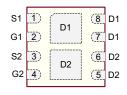

Absolute Maximum Ratings

	<i>)</i> -
Parameter	Value
Drain-to-source voltage	250V
Drain-to-gate voltage	250V
Gate-to-source voltage	±20V
Operating and storage temperature	-55°C to +150°C
Soldering temperature*	300°C

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.

Pin Configurations

8-Lead DFN (K6) (dual pad) (top view)

14-Lead QFN (K6)
(top view)
This package is not recommended for new designs.

^{*} Distance of 1.6mm from case for 10 seconds.

Product Marking

8-Lead DFN Package Outline (K6)

5.00x5.00mm body, 0.90mm height (max), 1.27mm pitch (dual pad)

Notes:

- A Pin 1 identifier must be located in the index area indicated. The Pin 1 identifier can be: a molded mark/identifier; an embedded metal marker; or a printed indicator.
- 2. Depending on the method of manufacturing, a maximum of 0.15mm pullback (L1) may be present.
- 3. The inner tip of the lead may be either rounded or square.
