GEMboard™ **Display Controller Board**

Introduction:

GEMboard™ (CBC-2) is a production display controller board for many popular LCD panels ranging from 5.7" to 10.4" with resolutions up to 640x480 (VGA). GEMboard™ affords greater speed in prototyping, maximizes design flexibility while shortening the time to market. GUI integration has never been easier. The GEMboard™ contains the complete bill of material including support for backlight (LED or CCFL) and touch panels.

Features:

- Amulet AGB75LC04-QU-E 208 PQFP GEM Graphical OS Chip™
- Storage Capacity – 32megabit Serial Flash for storing GUI pages
- 64megabit SDRAM (frame buffer)
- Integrated resistive 4 or 5 wire touch panel decoder, multiple touch panel connections (auxiliary pads/ headers) plus dedicated connectors
- Multiple Serial Interfaces – 3.3v UART, TWI & USB
- 33 pin FPC connector with auxiliary pad for 31pin FPC
- Backlight Support - LED backlight circuit with PWM, optional headers with dedicated connectors. Dedicated CCFL backlight header for inverters w/ PWM control
- Touch Panel calibration feature with dedicated switch and/or software
- Two boards to choose from (-01 and -02) depending on backlight power requirement
