1. When ordering, please specify a **packaging** code:

B0863-BL D

Packaging: **D** = 13" machine ready reel. EIA-481 embossed plastic tape (200 per full reel).

B = Less than full reel. In tape, but not machine ready. To have a leader and trailer added (\$25 charge), use code letter D instead.

- Inductance is for the primary, measured at 10 kHz, 0.1 Vrms, 0 Adc.
- DCR for the secondary is measured with the windings connected in parallel.
- Leakage inductance is for the primary and is measured with all other windings shorted.
- Turns ratio is with the secondary windings connected in parallel.
- Isolation is measured from the primary, reset and bias windings to the secondary and drive windings.
- Output is with the secondary windings connected in parallel.
- Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.

Secondary windings to be connected in parallel on PC board.
