Description:

Desco's Statfree® Z2™ mat is a .125" thick, 3-layer, dissipative heat fused vinyl composite material. It is designed to provide a path-to-ground and eliminate static charge generation when used as a worksurface table mat, shelf liner, and cart shelf liner. The surface resistance ($1 \times 10^6 < 1 \times 10^9$ ohms Rtt) of the top layer meets ANSI/ESD S20.20 worksurface required limit and recommendation of ANSI/ESD S4.1 for contact with ESD susceptible items. The conductive ($<10^4$ ohms Rtt) middle layer reduces the resistance to ground (Rtg) from the surface layer of the mat to the groundable point ground and allows the mats to be used with [ESD workstation continuous monitors](#). The dissipative ($1 \times 10^6 < 1 \times 10^9$ ohms Rtt) cushioned bottom layer provides additional energy absorption for components susceptible to physical shock.

Grounding: This material must be properly grounded for optimum electrical performance. Ask for Technical Bulletin [TB-2000](#) for mat grounding instructions.

Cleaning: For optimum electrical performance, surface must be cleaned regularly using an ESD mat cleaner. We suggest using our [Reztore Surface & Mat Cleaner](#). Do not use cleaners with silicone. Silicone buildup will create an insulative film on the surface.
