Mounting Kits

Mounting Kits

Pre-packaged in heat-sealed plastic bags for use on assembly line.

Stock mounting hardware using one number for better control and identification. Part number can be printed on the bag if requested.

Standard kit contains Thermalfilm insulator. For high maximum operating temperatures (550 °C), order a mica insulator by adding suffix letter "M" to the part number. For electrical isolation and excellent thermal resistance, use In-Sil-8 for an insulator by adding suffix letter "S" to the part number.

Other insulator materials available include: hard anodized aluminum and aluminum oxide.

Refer to proper product section for drawings of insulators and shoulder washers used in the mounting kits.
