TRANSIENT VOLTAGE SUPPRESSOR 500 WATT SERIES
Glass Passivated Die Plus Dual Heat Strips

Features:

- **Low Profile**
- **Broad Voltage Range Available - - 6.8 to 200 Volts**
- **Broad Spectrum Transient Suppression**
- **Rapid Response - - 4 nanoseconds typical**
- **Built-in Heat Absorbing Terminations**
- **Electrically Similar to Mil-Prf-19500/516**

Applications:

- **Connector I/O Surge Suppression**
- **Data Line Protection**

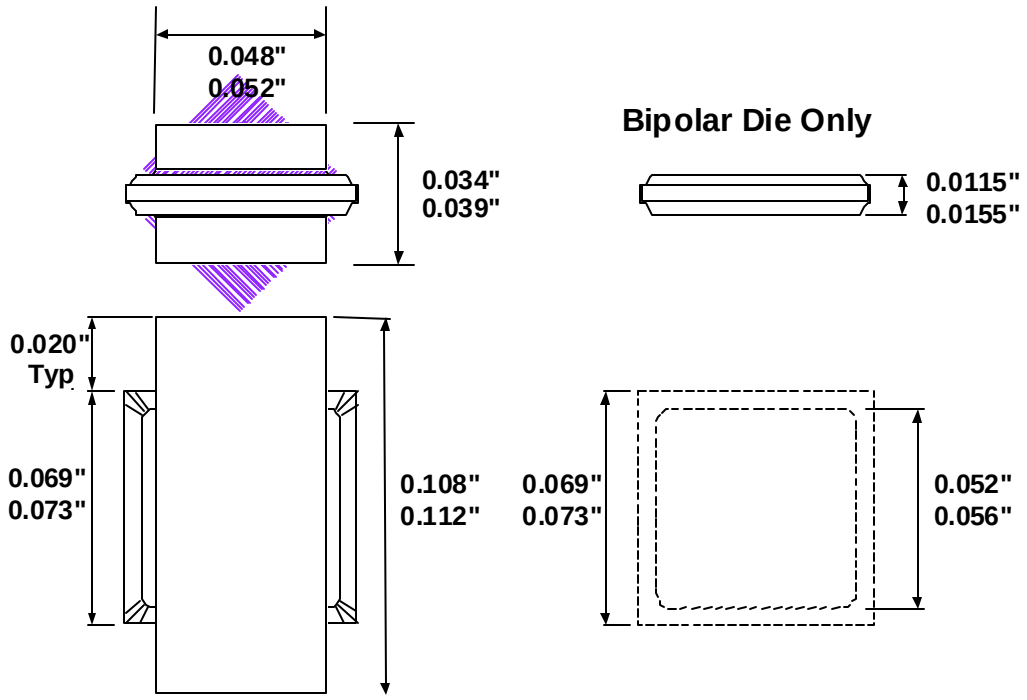
Description:

This is a bipolar transient voltage suppressor series extending from 6.8 volts to 200 volts intended for surface mount applications.

Each device comes as a "Cell" with its own heat absorbing terminals pre-bonded at high temperature. This permits mounting on printed circuit boards that cannot provide their own heat sinking. Each terminal is silver plated and is solderable permitting solder down attachment with a very small footprint. Each unit is bi-symmetrical so any orientation can be used.

ELECTRICAL CHARACTERISTICS

PARAMETER	SYMBOL	Test Conditions	Min	TYP	Max.	Units
Response Turn-on Time	ton			2	5	ns
Transient Energy Pulse (Cell)	Ep 1	10uS rise, I= 0.5Ip at t=100us (exponential decay)	1500			W
Transient Energy Pulse (Cell)	Ep 2	10uS rise, I= 0.5Ip at t=1.0mS (exponential decay)	500			W
Transient Energy Pulse (Cell)	Ep 3	10uS rise, I= 0.5Ip at t=10mS (exponential decay)	150			W
Transient Energy Pulse (Cell)	Ep 4	10uS rise, I= 0.5Ip at t=50mS (exponential decay)	70			W
Transient Energy Pulse (Cell)	Ep 5	10uS rise, I= 0.5Ip at t=50mS (step pulse)	50			W
Electrical Parameters				See Table		
Maximum Solder Temperature	Tmax	10 second exposure			300	ºC
Thermal Resistance (J-C)	T_{JC}	Assume heat sink on terminal strip ends		18	30	ºC/W



Note 1: "Die Only" configuration requires user to provide adequate energy absorption.

Note 2: Terminal strips are 0.009" to 0.011" thick copper with nickel and silver plate.

DISCLAIMER:

1- The information given herein, including the specifications and dimensions, is subject to change without prior notice to improve product characteristics. Before ordering, purchasers are advised to contact the Sensitron Semiconductor sales department for the latest version of the datasheet(s).
2- In cases where extremely high reliability is required (such as use in nuclear power control, aerospace and aviation, traffic equipment, medical equipment, and safety equipment), safety should be ensured by using semiconductor devices that feature assured safety or by means of users' fail-safe precautions or other arrangement.
3- In no event shall Sensitron Semiconductor be liable for any damages that may result from an accident or any other cause during operation of the user's units according to the datasheet(s). Sensitron Semiconductor assumes no responsibility for any intellectual property claims or any other problems that may result from applications of information, products or circuits described in the datasheets.
4- In no event shall Sensitron Semiconductor be liable for any failure in a semiconductor device or any secondary damage resulting from use at a value exceeding the absolute maximum rating.
5- No license is granted by the datasheet(s) under any patents or other rights of any third party or Sensitron Semiconductor.
6- The datasheet(s) may not be reproduced or duplicated, in any form, in whole or part, without the expressed written permission of Sensitron Semiconductor.
7- The products (technologies) described in the datasheet(s) are not to be provided to any party whose purpose in their application will hinder maintenance of international peace and safety nor are they to be applied to that purpose by their direct purchasers or any third party. When exporting these products (technologies), the necessary procedures are to be taken in accordance with related laws and regulations.
