

World Class Medical Linears, Single- and Multi-Output

- Features
- 36 Models (Single, Dual and Triple Output)
 - Three Power Levels (5-92 Watts)
 - Approved to UL 544, IEC 601 and UL 2601
 - AC Input: 110/120/220/240 VAC, 47-63 Hz
 - Leakage Current: <10 µA
 - OVP on All 5 V Outputs

- Features (Continued)
- Meets EMI Per FCC/VDE B
 - Hermetically Sealed Power Transistors and ICs
 - MTBF 200,000+ Hours Per Mil Handbook 217D
 - 8 Hour Burn-In with AC Cycling
 - Try Before You Buy — Free Evaluation Samples Available
 - 2 Year Warranty

Specifications

AC Input: 100/120/220/240 VAC +10%, -13%, 47-63 Hz. Tolerance for 230 VAC operation is +15%, -10%. Derate output current 10% for 50 Hz operation. The L and LL case units have AC input of 95-132/190-264 VAC, 47-63 Hz. This range can be extended to 90-132/180-264 VAC by derating output current 20%.

Line Regulation: ±0.05% for a 10% change.

Load Regulation: ±0.05% for a 50% load change.

Output Ripple: 3 mV +0.05% of output voltage, peak to peak maximum.

Transient Response: ≤50 microseconds for 50% load change.

Short Circuit Protection: Automatic current limit/foldback.

Overload Protection: Built-in on all 5 V models, set at 6.2 V ± 0.4 V. Other models use optional overvoltage protection. OVP is not optional on L and LL case units; however, it is built-in on 5 V output models.

Remote Sensing: Provided on all models, 3 amps and above, open sense lead protection built-in.

Stability: ±0.05% for 24 hours after warmup.

Temperature Rating: 0 to 50°C full rated, derated linearly to 40% at 70°C.

Temperature Coefficient: ±0.01%/°C maximum.

Efficiency: 5 V units — 45%; 12 and 15 V units — 55%; 20 and 24 V units — 60%.

Vibration: Per Mil-Std-810D, Method 5143, Category 1, Procedure I.

Shock: Per Mil-Std-810D, Method 5163, Procedure III.

Remote Programming: Capability included on remote sense models.

Safety Specifications: All models are approved to the following safety specifications — IEC 601, VDE 0750, UL 544, CSA 22.2 #234, L3, UL 2601-1 pending.

EMI Specifications: All models are tested to meet or exceed the conducted emissions requirements of FCC 20870, Class B and VDE 0871, Class B without the addition of external filters.

125 Watt Global Performance Switchers — GPFC125 Commercial/GPFM125 Medical

— NEW —

- Features
- Compact 125 Watt Multiple Output
 - AC Input 90-264 Vac, 47-63 Hz Single Phase
 - Power Density of 4 Watts Per Cubic Inch
 - Power Factor Correction to Meet EN61000-3-2
 - Small Package 6.00" × 3.5" × 1.5"
 - Commercial Approved to UL1950, IEC950, CSA22.2 No. 950 and EN60950
 - Medical Approved to UL2601, IEC601-1, CSA22.2 No. 601-1, EN60601
 - CE Marked to LVD
