

Pine Tree Clips

This nylon pine tree clip with its triangular point will securely hold wood, particle board, metal, solid or foam plastic, and rubber panels. It is quick and easy to install and can be used with threaded or non-threaded holes as well as in blind hole assemblies. The clip has a patented twist-in multiple head design for blind mounting of panels, and has a 360° anchoring surface to provide a stronger hold on thin materials.

This light weight clip is non-corrosive and non-conductive as it is manufactured from nylon 6,6.

Hole Diameter (mm)	Panel Thickness (mm)	Clip Head Diameter (mm)	Point Length (mm)	Body Length (mm)	Clip Head Height (mm)	Order Code
