Part Number : TPFLXIC016 - HexWax USB-FileSys-DIL

USB-FileSys is a low cost USB FAT file system. Its memory area is easily accessed by a host controller using SPI commands, and, when plugged into a USB port, simultaneously appears on a PC like a file system on a removable disk. USB-FileSys uses the Mass Storage Device (MSD) USB profile. It works without drivers on PCs running Windows (ME or later), Mac (OS 9 or later) or Linux (4.0 or later). USB-FileSys-DIL is the dual-in-line version suggested for evaluation purposes.
