

FIT68-6

Description:

The FIT68-6 toroidal inductor is specifically designed to minimize transients. It stores energy and therefore, conditions the output signal by leveling the current waveform providing a more stable current supply. Generally used in high frequency circuits, its standard design provides an economical solution in differential mode applications or as an output inductor.

Electrical Specifications (@25C):

Min. Inductance (μ H)		Rated DC Amps	Max DCR (m Ω)
No Bias	At Bias		
24.31	13.56	6.8	20.2

Note: No Bias inductance measured at .25V, 10KHZ.

Dimensions:

A	B	C	D	E	F	G
.875	.475	.950	.300	.474	.125	.036 $\pm$.003

Units: In inches

Weight: .026 lbs.

Technical Notes:

1. Nominal inductance values are typically 10% higher than minimal rating.
2. Biased inductance measured at rated DC amps.
3. Operation at rated current yields approximately 40°C temperature rise over 20°C ambient.

RoHS Compliance: As of manufacturing date February 2005, all standard products meet the requirements of 2011/65/EU, known as the RoHS initiative.
