AMPHE-POWER® CONNECTORS

HOW TO ORDER

Amphe-Power P-Lok Part Numbering

Amphe-Power 5015 Part Numbering

** Amphe-Power 5015 Connectors are based on the AC Threaded Series from Amphenol which incorporates 5015 contact arrangements. Within the AC family a reverse bayonet style is also offered, but the bayonet style is not currently offered with RADSOK sockets. See Amphenol catalog 12-025 for more information on the AC connector family.

AMPHE-POWER® CONNECTORS

HOW TO ORDER

Amphe-Power GT Part Numbering							
GT	C	00	A	36-5	P	W	(RDS)
<u>GT</u> designates GT Series, Reverse Bayonet Connectors <u>Contact Type and Insert Material</u> C = Crimp CN = Crimp with stainless steel CY = Crimp with Viton CL = Crimp with low smoke/flame retardant inserts No designation required for Neoprene components <u>Shell Style</u> 00 = Wall mount receptacle 01 = Inline receptacle 02 = Box mount receptacle 020 = Box mount receptacle with accessory threads 030 = Square flange receptacle - rear panel mount 06 = Straight plug 062 = Straight plug with deep serrated coupling nut* 064 = Panel mounted plug with heavy duty coupling nut 065 = Straight plug with long heavy duty coupling nut 07 = Jam nut receptacle - rear panel mount 070 = Jam nut receptacle with accessory threads 08 = 90 degree angle plug <u>Connector Class</u> Consult Amphenol GT Reverse Bayonet Connector catalog, 12-024 for full descriptions of classes <u>Shell Size and Arrangement</u> Shell sizes available in GT Series: 14, 16, 18, 20, 22, 24, 28, 32, 36, 40.
