## Aluminium Transport & Storage Containers

This range of containers is manufactured from aluminium, giving tremendous strength combined with light weight. Ideal for transportation and storage of valuable or delicate items where weight is an important issue, such as air freight.

- Ribbed body for strength with light weight
- Stacking locators on each corner
- Tough plastic protected grip handles - weight capacity 35kg per handle
- Recessed base prevents ingress of moisture when stored on damp floor
- Retaining strap on lid prevents hinge damage
- Rubber seal between lid and box creates a shower resistant container

Corner Locators and Hasp

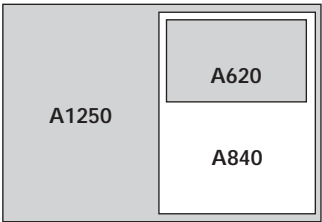

Lid restraint straps and handles

All boxes with the exception of the A833 and A930, are based around Europallet dimensions and are designed to stack and interstack.

2 x A620 boxes have the same base area as an A840 box, and 2 x A840 boxes have the same base area as an A1250 box.

Corner locators on each box ensure stacked boxes are firmly positioned.
