

Volatile Corrosion Inhibitor Capsule

Features:

- VCI stands for “volatile corrosion inhibitor”
- In brief, the VCI method functions such that the VCI capsule slowly emits a vapour and adheres to metal surfaces, interrupting the electro-chemical action, commonly referred to as corrosion
- The condensed VCI molecules prevent corrosion, or reduce it to a minimum on iron, steel, copper, brass and aluminium

Capsules works as follows:

- When one or more capsules are placed within an enclosure, the vapours are dispersed to all the accessible surfaces by convection
- Then provide the protection described
- Two complete air changes a day are allowed for in the useful life times
- In addition to capsules a range of tube strips are available

Specifications:

Useful Life : 1year

Operating Temperature Max. : 70°C

Part Number	External Depth	External Length / Height	External Width	Protective Radius (M)	Volume Protected (M ³)
VC1-1	25	20	50	0.3	0.012
VC2-1	30	25	55	0.6	0.95

Part Number Table

Description	Part Number
Capsule, Anti Corrosion	VC1-1
	VC2-1
