

SecureDigital SDXC Class 10 64GB

The SDXC (SD eXtended Capacity) memory card is designed to handle large volumes of data at high speeds and provide users with portable storage and speed for their camcorders or digital cameras.

SDXC cards are able to handle significantly greater amounts of information due to two advances in technology. The exFAT file system enables the SDXC card to handle large volumes of data while the UHS-1 interface transfers movies, videos and

picture with ideal speeds of up to 104MB/sec*

*SDXC UHS-1 (Ultra High Speed Bus 1) memory cards can achieve the highest speeds only when paired with a UHS-1 device. For devices without the UHS-1 interface the guaranteed minimum data transfer rate for Class 10 will be 10MB/Sec.

Verbatim SDXC memory cards can only be used on SDXC host products featuring the latest SDXC technology. PC or laptop users need to download an SDXC compatible driver for the SD slot from the Microsoft Download Centre. Compatible with Windows XP SP2 onwards and Windows Vista SP1 onwards.

SDXC logo is a trademark.

Speed Class Rating:

The speed class rating is the official unit of speed measurement for SD Cards defined by the SD Association. It is equal to 8 MBit/s, and it measures the minimum write speeds based on "the best fragmented state where no memory unit is occupied".

Class 10: Guaranteed minimum data transfer rate of 80 Mbit/s (10 MByte/s).

More Green, Less Plastic.

This package contains on average 90% less plastic than previous packaging.

Product Number: 44024
Capacity: 64GB
Write Speed: 10MB/Sec
Read Speed: 10MB/Sec
