

# 1.25mm Pitch Miniature Crimping Connector

## DF13 Series

|                  | Type | Mounting Type                                                                       | Mounting Height(h) |
|------------------|------|-------------------------------------------------------------------------------------|--------------------|
| Straight Type    | DIP  |  | 5.3mm              |
|                  | SMT  |  | 5.8mm              |
| Right Angle Type | DIP  |  | 3.6mm              |
|                  | SMT  |  |                    |

## ■Features

### 1. Miniature Size

Designed in the low profile at mounting height 5.8mm.  
(SMT mounting straight type)  
(For DIP type, the mounting height is to 5.3mm to the straight and 3.6mm at the right angle)

### 2. Multi-contact

The double row type achieves the multi-contact up to 40 contacts, and secures 30% higher density in the mounting area, compared with the single row type.

### 3. Correspond to Automatic Mounting

The header provides the grade with the vacuum absorption area, and secures automatic mounting by the embossed tape packaging.  
In addition, the tube packaging can be selected.

### 4. Integral Basic Function Despite Miniature Size

The header is designed in a scoop-proof box structure, and completely prevents mis-insertion.  
In addition, the surface mounting (SMT) header is equipped with the metal fitting to prevent solder peeling.

## ■Applications

Note PC, mobile terminal, miniature type business equipment, and other various consumer equipment, including video camera

Correspond to Automatic Mounting  
Secure the automatic plain area for the absorption type automatic mounting machine.

Figure 1

| 1. Insulation Resistance             | 500M ohms min.                                                          | 100V DC                                                                                      |                                                                                                |
| 2. Withstanding voltage              | No flashover or insulation breakdown.                                   | 500V AC/1 minute                                                                             |                                                                                                |
| 3. Contact Resistance                | 30m ohms max.                                                           | 100mA                                                                                        |                                                                                                |
| 4. Single Insertion/Extraction Force | 0.3N (30gf) min., 3N (300gf) max.                                       | Measured at the square steel pin of 0.35±0.002mm                                             |                                                                                                |
| 5. Vibration                         | No electrical discontinuity of 1μs or more                              | Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.    |                                                                                                |
| 6. Humidity (Steady state)           | Contact resistance: 30m ohms max. Insulation resistance: 500M ohms min. | 96 hours at temperature of 40°C and humidity of 90% to 95%                                   |                                                                                                |
| 7. Temperature Cycle                 | Contact resistance: 30m ohms max. Insulation resistance: 500M ohms min. | (-55°C: 30 minutes→ 5 to 35°C: 10 minutes→ 85°C: 30 minutes→ 5 to 35°C: 10 minutes) 5 cycles |                                                                                                |
| 8. Durability (Mating/un-mating)     | Contact resistance: 30m ohms max.                                       | Tin plating: 30 cycles<br>Gold plating: 50 cycles                                            |                                                                                                |
| 9. Resistance to Soldering heat      | No deformation of components affecting performance.                     | Flow: 250°C for 10 seconds                                                                   |                                                                                                |
|                                      |                                                                         | Manual soldering: 300°C for 3 seconds                                                        |                                                                                                |
|                                      |                                                                         | Reflow: At the recommended temperature profile                                               |                                                                                                |
|                                      |                                                                         | Manual soldering: 300°C for 3 seconds                                                        |                                                                                                |

Note 1: Includes temperature rise caused by current flow.

Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

Note 3: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

## ■Material

| Product                     | Part          | Material        | Finish                           | Remarks |
|-----------------------------|---------------|-----------------|----------------------------------|---------|
| Crimping Socket             | Insulator     | Polyamide       | Beige                            | UL94V-0 |
| Crimping Contact for Socket | Contact       | Phosphor copper | Tin plated or gold plated        | ———     |
| Pin Header (Through hole)   | Insulator     | Polyamide       | Beige                            | UL94V-0 |

Precautions</p>                                    | <p>Refer to Nylon Connector Use Hand book.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |            |                             |           |                                                                   |

## ◆Precautions

### <Precautions at Time of Insertion>

Align with the connector form and press down  
continue pressing until there is a tactile click.

#### Handling

Method: Lightly grasping the base the cable, press the  
connector with your finger and insert it.

#### Insertion Angle

Caution: Do not insert at an angle of 30° or greater.  
Doing so will cause contact deformation or  
case damage.

Method: Insert with the connector parallel.

### <Precautions at Time of Disconnection>

Align with the connector form and press down  
continue pressing until there is a tactile click.

#### Handling

Method: Grasp the cable so that the entire cable is  
pulled evenly and it out.

#### Angle of Removal

Caution: Do not remove at an angle of 30° or greater.  
Doing so will cause contact deformation or  
case damage.

Method: Remove with the connector parallel.
