

3.1/2 DIGIT SINGLE CHIP A/D CONVERTER WITH DISPLAY HOLD

GENERAL DESCRIPTION

The NJU9203B/9204B are low-power-consumption, high-performance 3.1/2 digit single chip A/D converters with display hold containing a voltage reference, oscillator, 3.1/2 digits A/D converter, 7-segment decoder, display driver and control circuits.

The NJU9203B is designed for direct LCD driving and the NJU9204B for LED direct driving.

The NJU9203B/9204B can be operated on simple application circuits as they require only few external components, therefore they are most suited for digital multimeter, digital thermometer and other likes.
