

Record and Ultra: circular brushes for all-round power

When you need concentrated power choose the "Record" crimped wire or the "Ultra" twist knot range of brushes. In situations where extra aggression is required, the twist knot form of the Ultra will prove ultra-effective.

These specialised brushes work fast – smoothing down surfaces, smoothing-out those production problems. Designed for use on bench machines or portable power tools they are readily-available with a choice of fill materials, face widths and arbor hole diameters.

Fill types: RECORD

STD – Steel wire, natural hard, crimped.

INOX – Stainless steel wire, acid resistant, crimped.

MES – Brass wire (Cu-Zn), crimped.

Applications:

Applications include rust and paint removal, deburring, descaling, matt finishing and polishing.

Fill types: ULTRA

SUP – Steel wire, hardened, straight.

INOX – Stainless steel wire, acid resistant, straight.

Applications:

Weld preparation, deburring and heavy duty cleaning tasks such as the finishing of castings, the removal of hardened paint, scale, stubborn rust and rubber flashing.

Circular Brushes Record

Wear eye protection!
