Introduction

With a high quality TFT LCD display, TPC-1570H is designed with Intel Celeron M 600MHz/ 1GHz processor as its core. The Intel Celeron M has low power consumption and 600 MHz / 1GHz operating frequency. This system is fanless although the kernel is powerful. In addition, spindle-free storage makes the TPC-1570H a durable and reliable platform. For applications where spindle-free storage is not critical, a fast-access HDD module can be used. The rich I/O portfolio meets diverse requests.
