5-V LOW-DROPOUT VOLTAGE REGULATOR

Check for Samples: TLE4275-Q1

FEATURES

- **Qualified for Automotive Applications**
- **Output Voltage 5 V ± 2%**
- **Very Low Current Consumption**
- **Power-On and Undervoltage Reset**
- **Reset Low-Level Output Voltage < 1 V**
- **Very Low Dropout Voltage**
- **Short-Circuit Proof**
- **Reverse-Polarity Proof**

DESCRIPTION/ORDERING INFORMATION

The TLE4275 is a monolithic integrated low-dropout voltage regulator offered in a 5-pin TO package. An input voltage up to 45 V is regulated to V_{OUT} = 5 V (typ). The device can drive loads up to 450 mA and is short-circuit proof. At overtemperature, the TLE4275 is turned off by the incorporated temperature protection. A reset signal is generated for an output voltage, $V_{OUT,rt}$, of 4.65 V (typ). The reset delay time can be programmed by the external delay capacitor.

The input capacitor, C_{IN}, compensates for line fluctuation. Using a resistor of approximately 1 Ω, in series with C_{IN}, dampens the oscillation of input inductivity and input capacitance. The output capacitor, C_{OUT}, stabilizes the regulation circuit. Stability is specified at C_{OUT} ≥ 22 µF and ESR ≤ 5 Ω, within the operating temperature range.

The control amplifier compares a reference voltage to a voltage that is proportional to the output voltage and drives the base of the series transistor via a buffer. Saturation control as a function of the load current prevents any oversaturation of the power element. The device also incorporates a number of internal circuits for protection against:

- Overload
- Overtemperature
- Reverse polarity

ORDERING INFORMATION(1)

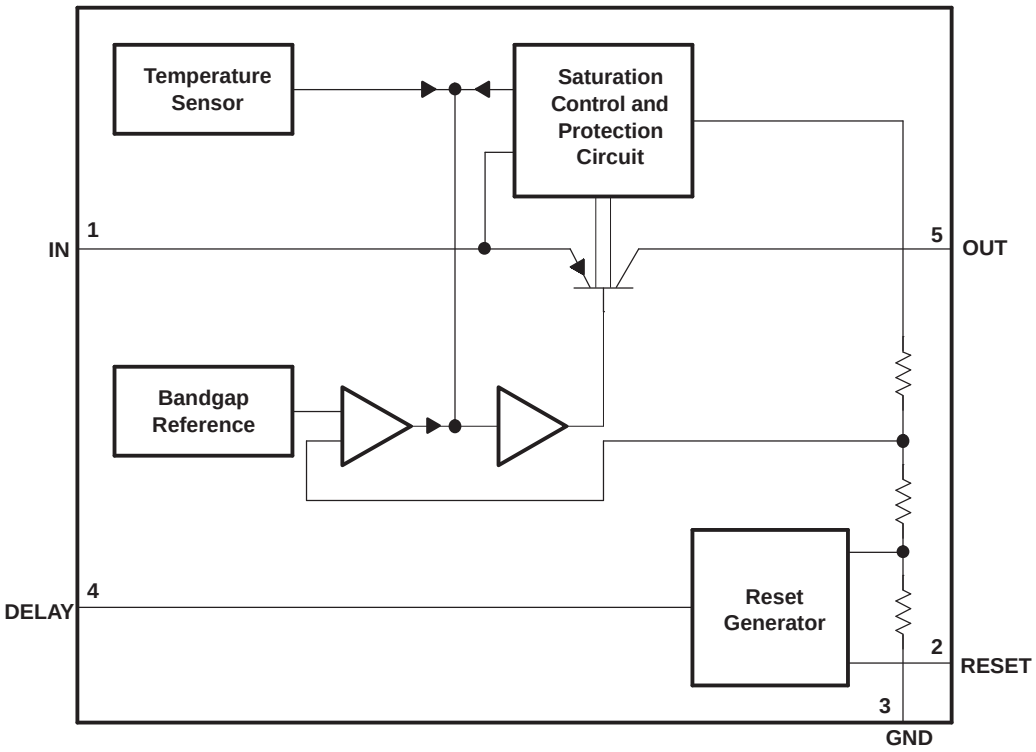
T_J	PACKAGE(2)		ORDERABLE PART NUMBER	TOP-SIDE MARKING
–40°C to 150°C	TO-252 (DPAK) – KVU	Reel of 2500	TLE4275QKVURQ1	TLE4275Q
	TO-263 – KTT	Reel of 500	TLE4275QKTTRQ1	TLE4275Q

(1) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI web site at www.ti.com.
(2) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

TERMINAL FUNCTIONS

NO.	NAME	DESCRIPTION
1	IN	Input. Connect to ground as close to device as possible, through a ceramic capacitor.
2	RESET	Reset output. Open-collector output.
3	GND	Ground. Internally connected to heatsink.
4	DELAY	Reset delay. Connect to ground with a capacitor to set delay time.
5	OUT	Output. Connect to ground with ≥22-µF capacitor, ESR < 5 Ω at 10 kHz.

FUNCTIONAL BLOCK DIAGRAM



ABSOLUTE MAXIMUM RATINGS(1)

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V_I	Input voltage range(2)	IN	–42	45	V
		DELAY	–0.3	7	
V_O	Output voltage range	OUT	–1	16	V
		RESET	–0.3	25	
I_I	Input current	DELAY		±2	mA
I_O	Output current	RESET		±5	mA
θ_{JA}	Package thermal impedance, junction to free air(3) (4)	KTT package		26.5	°C/W
		KVU package		38.6	
T_J	Operating junction temperature range		–40	150	°C
T_{stg}	Storage temperature range		–65	150	°C
ESD	Electrostatic discharge rating	Human-body model (HBM)(5)		6000	V
		Machine model (MM)(6)		400	

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) All voltage values are with respect to the network ground terminal.
(3) Maximum power dissipation is a function of $T_J(max)$, θ_{JA}, and T_A. The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(max) – T_A)/\theta_{JA}$. Operating at the absolute maximum T_J of 150°C can affect reliability.
(4) The package thermal impedance is calculated in accordance with JESD 51-7.
(5) HBM ESD rating tested per JESD22-A114.
(6) MM ESD rating tested per JESD22-A115.

RECOMMENDED OPERATING CONDITIONS

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
V_I	Input voltage	5.5	42	V
T_J	Junction temperature	–40	150	°C

ELECTRICAL CHARACTERISTICS

over recommended operating free-air temperature range, V_I = 13.5 V, T_J = −40°C to 150°C (unless otherwise noted) (see Figure 1)

PARAMETER		TEST CONDITIONS		MIN	TYP	MAX	UNIT
V_O	Output voltage	I_O = 5 mA to 400 mA, V_I = 6 V to 28 V		4.9	5	5.1	V
		I_O = 5 mA to 200 mA, V_I = 6 V to 40 V		4.9	5	5.1	
I_O	Output current limit			450	700	950	mA
I_q	Current consumption $I_q = I_I - I_O$	I_O = 1 mA	T_J = 25°C		150	200	µA
			$T_J \le$ 85°C		150	220	
		I_O = 250 mA			5	10	mA
		I_O = 400 mA			12	22	
V_{DO}	Dropout voltage(1)	I_O = 300 mA, $V_{do} = V_I - V_O$			250	500	mV
	Load regulation	I_O = 5 mA to 400 mA			15	30	mV
	Line regulation	ΔV_I = 8 V to 32 V, I_O = 5 mA		–15	5	15	mV
PSRR	Power-supply ripple rejection	f_r = 100 Hz, V_r = 0.5 V_{pp}			60		dB
$\frac{\Delta V_O}{\Delta T}$	Temperature output-voltage drift				0.5		mV/K
$V_{O,rt}$	RESET switching threshold			4.5	4.65	4.8	V
V_{ROL}	RESET output low voltage	$R_{ext} \ge$ 5 kΩ, V_O > 1 V			0.2	0.4	V
I_{ROH}	RESET output leakage current	V_{ROH} = 5 V			0	10	µA
$I_{D,c}$	RESET charging current	V_D = 1 V		3	5.5	9	µA
V_{DU}	RESET upper timing threshold			1.5	1.8	2.2	V
V_{DRL}	RESET lower timing threshold			0.2	0.4	0.7	V

(1) Measured when the output voltage V_O has dropped 100 mV from the nominal value obtained at V_I = 13.5 V

SWITCHING CHARACTERISTICS

over operating free-air temperature range (unless otherwise noted) (see Figure 2)

PARAMETER		TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_{rd}	RESET delay time	C_D = 47 nF	10	16	22	ms
t_{rr}	RESET reaction time	C_D = 47 nF		0.5	2	µs

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

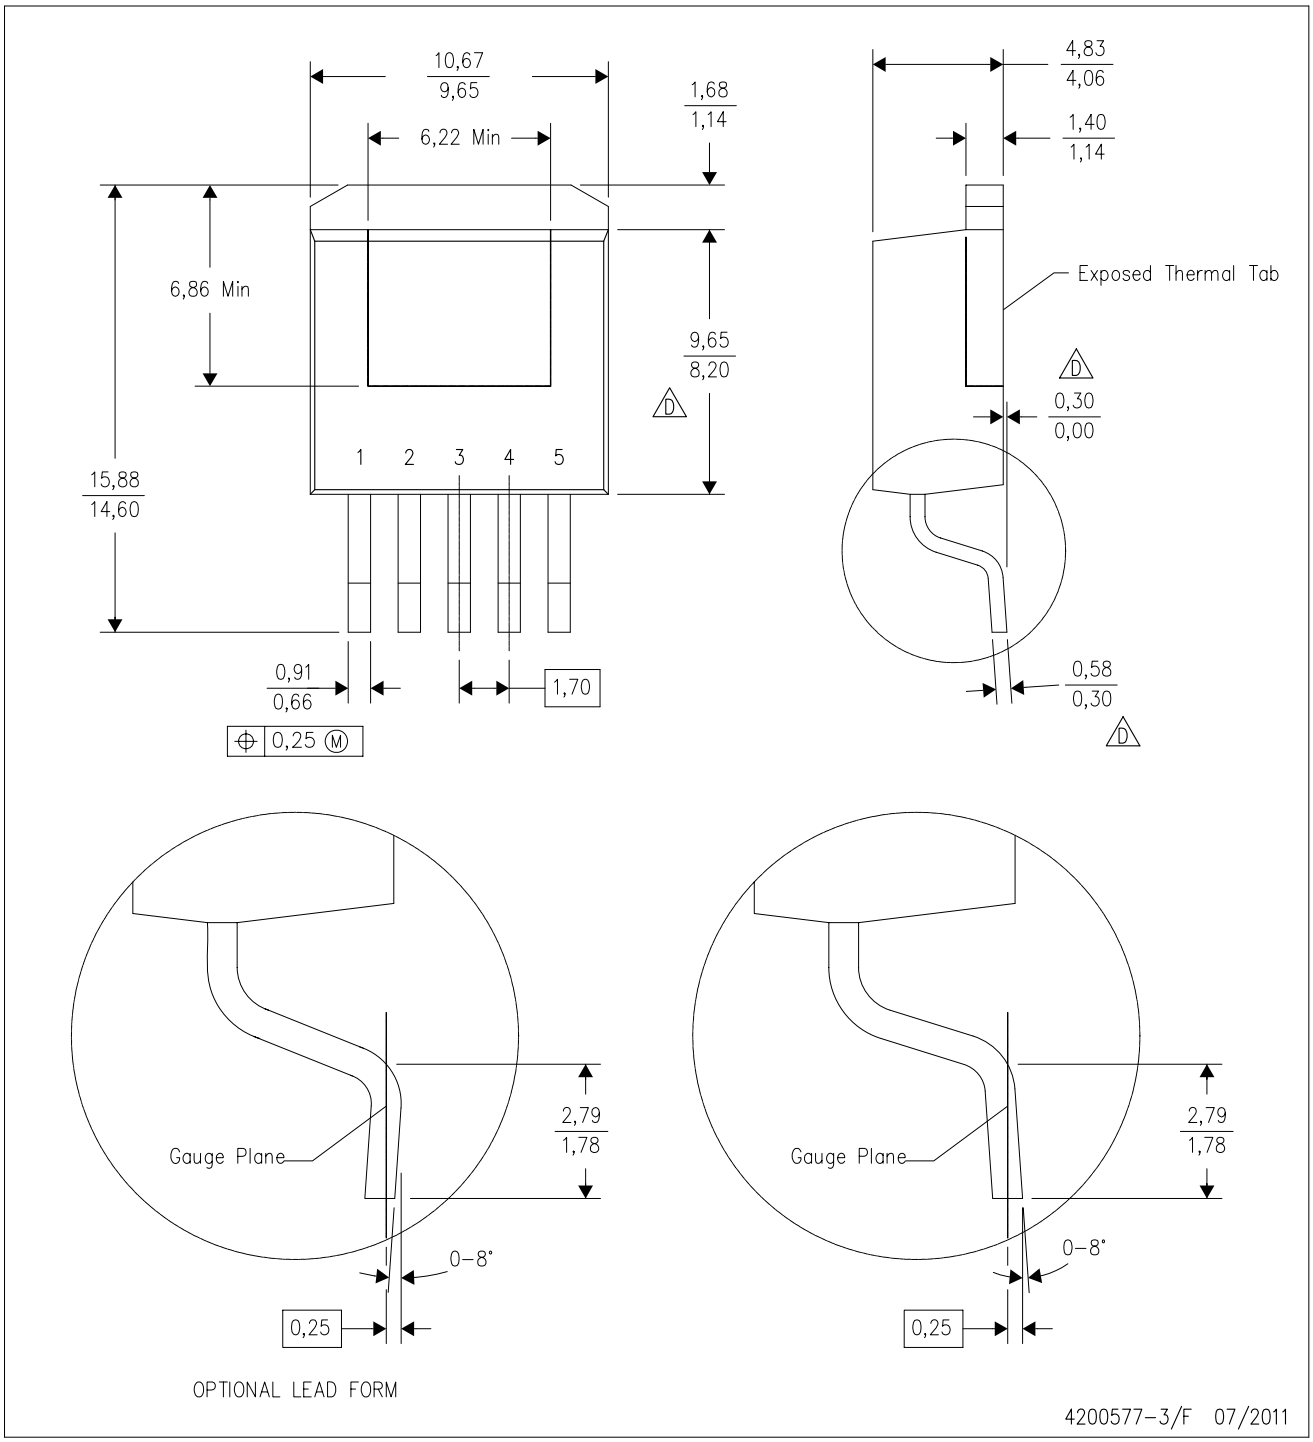
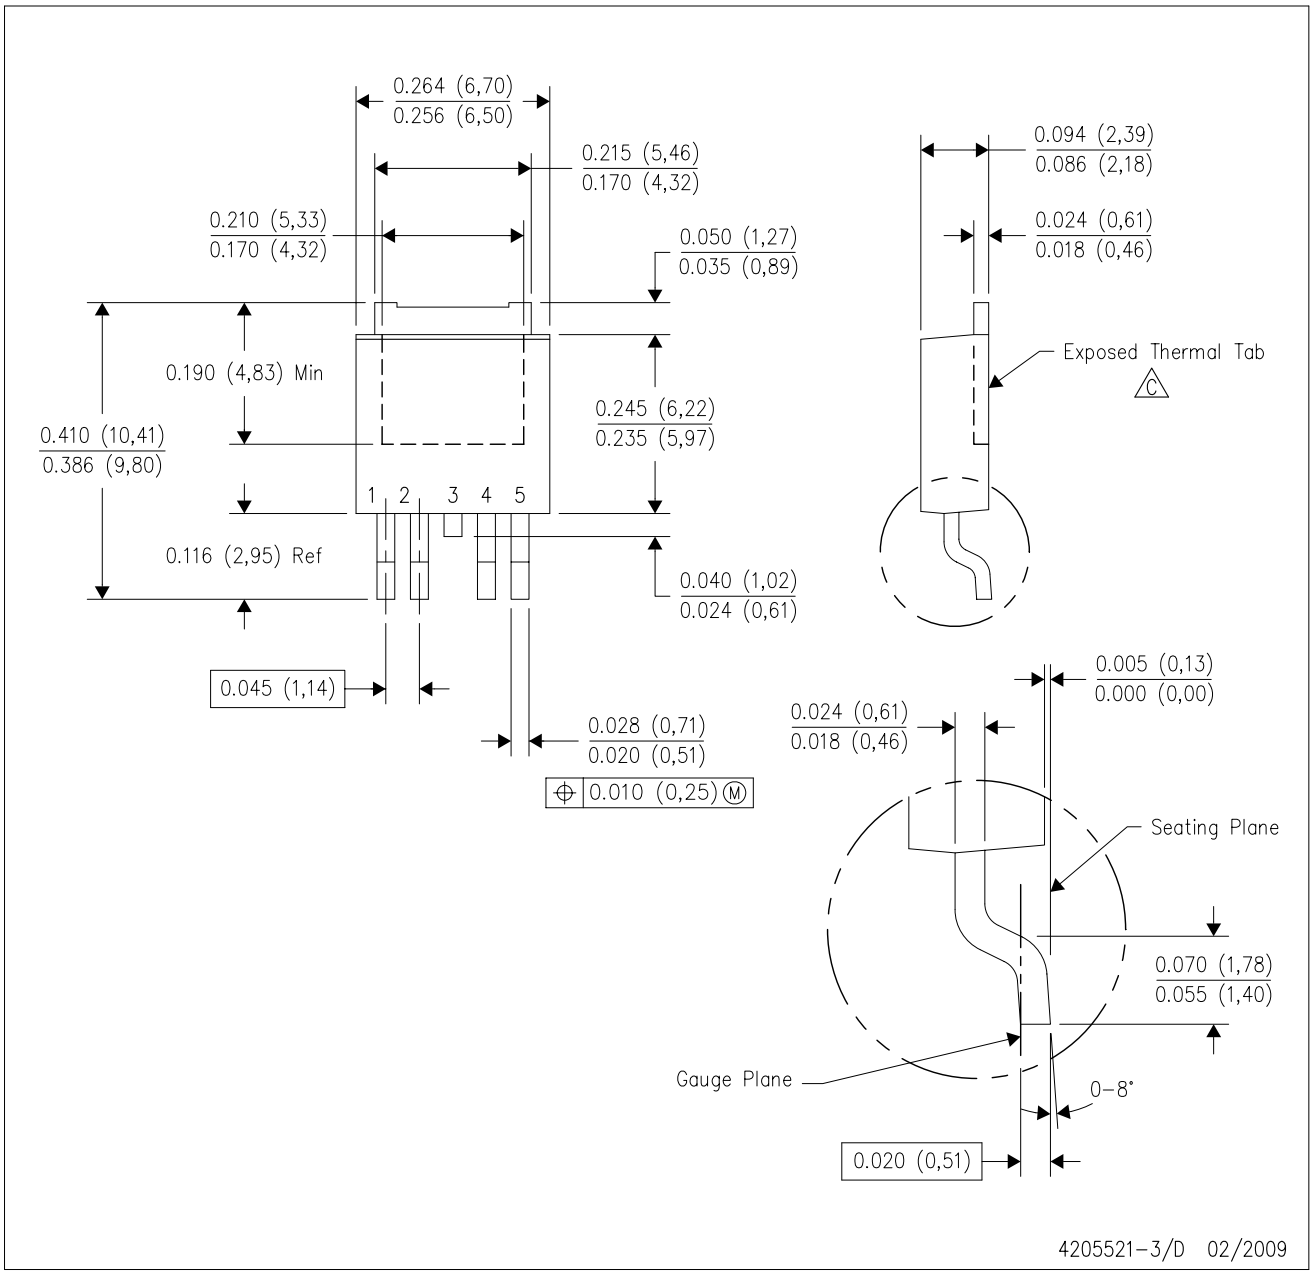
KTT (R–PSFM–G5) PLASTIC FLANGE–MOUNT PACKAGE



NOTES:
A. All linear dimensions are in millimeters.
B. This drawing is subject to change without notice.
C. Body dimensions do not include mold flash or protrusion. Mold flash or protrusion not to exceed 0.005 (0,13) per side.
D. Falls within JEDEC TO–263 variation BA, except minimum lead thickness, maximum seating height, and minimum body length.

KVU (R–PSFM–G5) PLASTIC FLANGE–MOUNT PACKAGE



NOTES:
A. All linear dimensions are in inches (millimeters).
B. This drawing is subject to change without notice.
C. The center lead is in electrical contact with the exposed thermal tab.
D. Body Dimensions do not include mold flash or protrusions. Mold flash and protrusion shall not exceed 0.006 (0,15) per side.
E. Falls within JEDEC TO–252 variation AD.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
