

## 1.5 A adjustable and fixed low drop positive voltage regulator

Datasheet - production data

### Description

The LD1086 is a low drop voltage regulator capable of providing up to 1.5 A of output current. Dropout is guaranteed at a maximum of 1.2 V at the maximum output current, decreasing at lower loads. The LD1086 is pin-to-pin compatible with older 3-terminal adjustable regulators, but has better performance in terms of drop and output tolerance. Unlike PNP regulators, where a part of the output current is wasted as quiescent current, the LD1086 quiescent current flows into the load, increasing efficiency. Only a 10  $\mu$ F (minimum) capacitor is needed for stability. The device is available in a TO-220, D<sup>2</sup>PAK, D<sup>2</sup>PAK/A, DPAK or DFN8 (4x4) package. On-chip trimming allows the regulator to reach a very tight output voltage tolerance; within  $\pm 1\%$  at 25 °C.

### Features

- Typical dropout: 1.3 V at 1.5 A
- Three-terminal adjustable or fixed output voltage: 1.8 V, 3.3 V, 5 V
- Output current guaranteed up to 1.5 A
- Output tolerance:  $\pm 1\%$  at 25 °C and  $\pm 2\%$  in full temperature range
- Internal power and thermal limit
- Wide operating temperature range - 40 °C to 125 °C
- Package available: TO-220, D<sup>2</sup>PAK, D<sup>2</sup>PAK/A, DPAK and DFN8 (4x4)
- Pinout compatibility with standard adjustable voltage regulators

## 2 Pin configuration

Figure 2. Pin connections (top view)

*Note:* The TAB is physically connected to the output (this is valid for the TO-220 package too).

### 3 Maximum ratings

**Table 1. Absolute maximum ratings**

| Symbol    | Parameter                  | Value              | Unit |
|-----------|----------------------------|--------------------|------|
| $V_I$     | DC input voltage           | 30                 | V    |
| $I_O$     | Output current             | Internally Limited | mA   |
| $P_D$     | Power dissipation          | Internally Limited | mW   |
| $T_{STG}$ | Storage temperature range  | -55 to +150        | °C   |
| $T_J$     | Junction temperature range | -40 to +150        | °C   |

*Note: Absolute maximum ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied.*

**Table 2. Thermal data**

## 7 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK is an ST trademark.

|-------------|----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 16-May-2006 | 14       | Order codes updated and new template.                                                                                                                                                                                                                                                   |
| 19-Jan-2007 | 15       | D <sup>2</sup> PAK mechanical data updated and add footprint data.                                                                                                                                                                                                                      |
| 05-Apr-2007 | 16       | Order codes updated.                                                                                                                                                                                                                                                                    |
| 07-Jun-2007 | 17       | Order codes updated.                                                                                                                                                                                                                                                                    |
| 19-Jul-2007 | 18       | Add note on Figure 2.                                                                                                                                                                                                                                                                   |
| 03-Dec-2007 | 19       | Modified: Table 18.                                                                                                                                                                                                                                                                     |
| 31-Jan-2008 | 20       | Added new order codes for Automotive grade products.                                                                                                                                                                                                                                    |
| 18-Feb-2008 | 21       | Modified: Table 18 on page 39.                                                                                                                                                                                                                                                          |
| 14-Jul-2008 | 22       | Modified: Table 1 on page 7 and Table 18 on page 39.                                                                                                                                                                                                                                    |
| 10-Mar-2010 | 23       | Added: Table 12 on page 26, Figure 30 on page 23, Figure 31 on page 25, Figure 31 and Figure 32 on page 27.                                                                                                                                                                             |
| 15-Nov-2010 | 24       | Modified: RthJC value for TO-220 Table 2 on page 7.                                                                                                                                                                                                                                     |
| 11-Jul-2011 | 25       | Modified: Figure 24, Figure 25 on page 20 and Table 18 on page 39.                                                                                                                                                                                                                      |
| 10-Feb-2012 | 26       | Added: order code LD1086V-DG Table 18 on page 39.                                                                                                                                                                                                                                       |
| 15-Mar-2012 | 27       | Added: new order code LD1086PUR Table 18 on page 39 and new package mechanical data DFN8 (4x4 mm) Table 16 on page 36, Figure 38 on page 35, Figure 39 on page 36, Figure 40 on page 37 and Figure 41 on page 38.                                                                       |
| 19-Oct-2012 | 28       | Added: RthJA value for DPAK Table 2 on page 7.                                                                                                                                                                                                                                          |
| 13-Feb-2013 | 29       | Modified: Output voltage in Voltage reference parameter Table 8 on page 14 and Table 10 on page 16.                                                                                                                                                                                     |
| 01-Mar-2013 | 30       | Modified: DFN8 (4 x 4) pin configuration Figure 2 on page 6.                                                                                                                                                                                                                            |
| 17-Jun-2013 | 31       | Added Table 8: Electrical characteristics of LD1086B# and Section 7.7: DFN8 (4x4) packing information.<br>Updated Section 7: Package information and Table 18: Order code.<br>Minor text changes.                                                                                       |
| 22-Oct-2013 | 32       | RPN LD1086xx changed to LD1086.<br>Updated the Description in cover page.<br>Cancelled Table 1: Device summary.<br>Updated Figure 2: Pin connections (top view), Section 5: Electrical characteristics, Section 7: Package information and Table 18: Order code.<br>Minor text changes. |
| 18-Dec-2014 | 33       | Updated Table 6.: Electrical characteristics of LD1086#50, Section 7: Package information and Section 7.7: DFN8 (4x4) packing information.<br>Minor text changes.                                                                                                                       |
| 10-Feb-2015 | 34       | Updated Table 18: Order code.<br>Minor text changes.                                                                                                                                                                                                                                    |

**Table 19. Document revision history (continued)**

| Date        | Revision | Changes                                                                                                            |
|-------------|----------|--------------------------------------------------------------------------------------------------------------------|
| 16-Nov-2015 | 35       | Updated Section 7: Package information and Table 18: Order code<br>Minor text changes.                             |
| 19-Dec-2017 | 36       | Updated $T_J$ value in Table 1: Absolute maximum ratings.                                                          |
| 17-May-2021 | 37       | Removed 12 V options in the document.<br>Updated Figure 15, Figure 16, Figure 17, and Figure 18.                   |
| 10-Jul-2024 | 38       | Updated features, description on the cover page and <a href="#">Table 18</a> .<br>Added <a href="#">Table 15</a> . |
