

110/216-Series

The 110/216-Series toggle switches utilize a quick-make, quick-break contact mechanism and are available in both single and double pole. These switches are 125-250 volts AC/DC rated and suitable for shallow back panel applications. They are available in a range of circuits, terminations and bushing/toggle configurations.

- Specifications**
- Certifications*: UL, CSA
 - Dielectric Strength: 1,000V (minimum)
 - Insulation Resistance: 100 Megohms (minimum)
 - Base Material: Phenolic
 - Actuator Material: Brass/Nickel Plate
 - Bushing Material: Brass/Nickel Plate

* Due to ongoing technological advances, consult factory for certification specifics.
