Performance Curve

DC 8025-03

The graph plots Static Pressure (in H₂O) on the Y-axis against Air Flow on the X-axis. The Y-axis has two scales: inches of water (0 to 0.3) and millimeters of water (0 to 8). The X-axis has two scales: CFM (0 to 60) and m³/min (0 to 1.5). Four performance curves are shown, labeled HL, H, M, and L, representing different fan speeds. All curves show a decrease in static pressure as air flow increases.

Air Flow (CFM)	Air Flow (m ³ /min)	HL Static Pressure (mm H ₂ O)	H Static Pressure (mm H ₂ O)	M Static Pressure (mm H ₂ O)	L Static Pressure (mm H ₂ O)
0	0.0	7.5	4.5	3.0	2.0
20	0.5	4.0	2.5	1.5	0.8
40	1.0	2.0	1.2	0.7	0.3
60	1.5	1.0	0.6	0.3	0.1
