

Handheld UV

Handheld UV Magnifier - perfect for the inspection of conformal coatings. Coatings glow brilliantly under UV black illumination especially when magnified through a 5-diopter (2.25X) optical-quality glass lens. Unique combination of (2) 4W UV black bulbs and (2) 4W fluorescent white bulbs is also ideal for the inspection of welds, solder joints, flux residues and hairline stress cracks.

- 5-diopter (2.25X) lens
- Combination of 2-4W UV black bulbs and 2-4W fluorescent white bulbs
- Wide rectangular viewing area (4" x 2.5")
- 10' cord with plug-in ballast
- Protective lens cover
- Ideal for the inspection of conformal coatings. Additional applications include inspection of surfaces and finishes in fields such as criminology, museum and artwork restoration, document authenticity, leak detection, currency verification and gemstone and mineral inspection.
- Color: Grey
