Wooden and Nylon Prober Tools

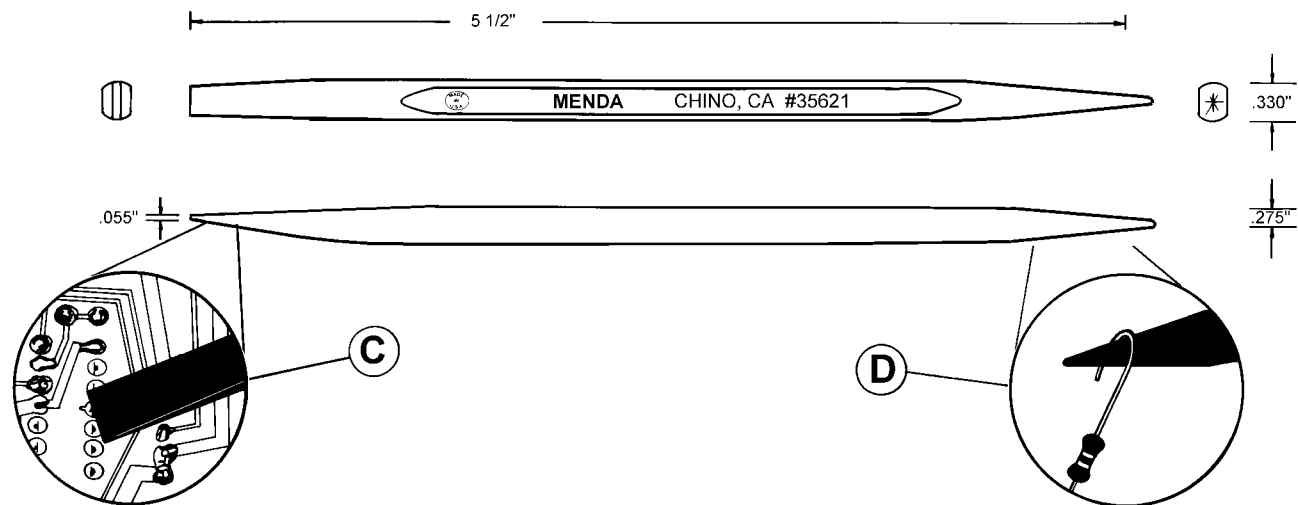

Characteristics:

- **Wood/Nylon Finish**
Will not mar delicate surfaces
- **Ideal Material for Use in ESD Protected Areas**
Minimal charge generation
- **Temperature Resistant**
Material will not melt
- **Made in America**
Superior quality

P/N	Description
35616	Wood Orange Stick, 7" long
35517	Birchwood Spudger, 7" long
35618	Nylon Lead Forming Tool, 7" long
35619	Nylon Orange Stick, 6-3/4" long
35621	Nylon Heavy Duty Spudger, 5-1/2" long
35622	Nylon Soldering Tool, 6" long

Drawings/Technical Bulletins:

- [35619](#) : Prober, Soldering Tool, Nylon, Orangestick, Replacement
- [35621](#) : Prober, Soldering Tool, Nylon
- [35622](#) : Prober, Soldering Tool, Nylon

A. MATERIAL: 15% Glass Filled Supertough Nylon

B.  The hygroscopic properties of Nylon will make this tool suitable for use around EOS/ESD sensitive components after a few minutes of handling the tool with bare hands. If used with gloves in a clean environment the tools must be dipped in a topical antistatic solution before use in sensitive areas. Topical treatment should

be repeated at six month intervals. Without exposure to moisture or antistatic treatment, Nylon will charge and the charge will not dissipate.

C. Flat "screwdriver" surface for spudging wire leads down flat on circuit boards.

D. Pointed end for forming wire leads or for use as pointer probe for holding objects for soldering.

Made in U.S.A.

Prober, Soldering Tool, Nylon
