

DESCRIPTION

Microsemi's Powermite SMT package offers high efficiency ultra fast rectifiers with the power handling capabilities previously found only in much larger packages. They are ideal for SMD applications that operate at high frequencies.

The Powermite package's full metallic bottom eliminates the possibility of solder flux entrapment during assembly, and its unique locking tab acts as an integral heat sink. Its innovative design makes this device ideal for use with automatic insertion equipment.

KEY FEATURES

- High Power Surface Mount Package
- Ultra-fast Recovery Time (30ns)
- Low Forward Voltage
