SCDS211C -AUGUST 2006-REVISED DECEMBER 2009

0.75-Ω SPDT ANALOG SWITCH WITH INPUT LOGIC TRANSLATION

Check for Samples: TS5A6542

FEATURES

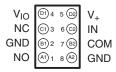

- Specified Break-Before-Make Switching
- Low ON-State Resistance (0.75 Ω Max)
- Control Inputs Referenced to V_{IO}
- Low Charge Injection
- Excellent ON-State Resistance Matching
- Low Total Harmonic Distortion (THD)
- 2.25-V to 5.5-V Power Supply (V₁)
- 1.65-V to 1.95-V Logic Supply (V_{IO})
- Latch-Up Performance Exceeds 100 mA Per JESD 78, Class II
- ESD Performance Tested Per JESD 22
 - 4000-V Human-Body Model (A114-B, Class II)
 - 1000-V Charged-Device Model (C101)
 - 400-V Machine Model (A115-A)

- COM Port to GND
 - 8000-V Human-Body Model (A114-B, Class II)
 - ±15-kV Contact Discharge (IEC 61000-4-2)

APPLICATIONS

- Cell Phones
- PDAs
- Portable Instrumentation

YZP PACKAGE (BOTTOM VIEW)

DESCRIPTION/ORDERING INFORMATION

The TS5A6542 is a single-pole double-throw (SPDT) analog switch that is designed to operate from 2.25 V to 5.5 V. The device offers a low ON-state resistance with an excellent channel-to-channel ON-state resistance matching, and the break-before-make feature to prevent signal distorion during the transferring of a signal from one path to another. The device has excellent total harmonic distortion (THD) performance and consumes very low power. These features make this device suitable for portable audio applications.

The TS5A6542 has a separate logic supply pin (V_{IO}) that is characterized to operate from 1.65 V to 1.95 V. V_{IO} powers the control circuitry, which allows the TS5A6542 to be controlled by 1.8-V signals.

Table 1. ORDERING INFORMATION(1)

T _A	PACKAGE ⁽²⁾		ORDERABLE PART NUMBER	TOP-SIDE MARKING (3)
–40°C to 85°C	NanoFree™ – WCSP (DSBGA) 0.23-mm Large Bump – YZP (Pb-free)	Tape and reel	TS5A6542YZPR	JH7

⁽¹⁾ For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at www.ti.com.

(2) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

⁽³⁾ YZP: The actual top-side marking has three preceding characters to denote year, month, and sequence code, and one following character to designate the wafer fab/assembly site. Pin 1 identifier indicates solder-bump composition (1 = SnPb, • = Pb-free).

SUMMARY OF CHARACTERISTICS(1)

Configuration	2:1 Multiplexer/Demultiplexer (1 x SPDT)
Number of channels	1
ON-state resistance (r _{on})	0.75 Ω max
ON-state resistance match (Δr _{on})	0.1 Ω max
ON-state resistance flatness (r _{on(flat)})	0.1 Ω max
Turn-on/turn-off time (t _{ON} /t _{OFF})	25 ns/20 ns
Charge injection (Q _C)	15 pC
Bandwidth (BW)	43 MHz
OFF isolation (O _{ISO})	-63 dB at 1 MHz
Crosstalk (X _{TALK})	-63 dB at 1 MHz
Total harmonic distortion (THD)	0.004%
Leakage current (I _{NO(OFF)} /I _{NC(OFF)})	20 nA
Package option	8-pin WCSP

(1) $V_+ = 5 V$, $T_A = 25$ °C

FUNCTION TABLE

IN	NC TO COM, COM TO NC	NO TO COM, COM TO NO
L	ON	OFF
Н	OFF	ON

ABSOLUTE MAXIMUM RATINGS(1) (2)

over operating free-air temperature range (unless otherwise noted)

			MIN	MAX	UNIT
V_{+} V_{IO}	Supply voltage range ⁽³⁾		-0.5	6.5	V
$V_{NC} V_{NO} V_{COM}$	Analog voltage range ⁽³⁾ (4) (5)		-0.5	V ₊ + 0.5	V
I _{I/OK}	Analog port diode current ⁽⁶⁾	V_{NO} , $V_{COM} < 0$ or V_{NO} , $V_{COM} > V_{+}$	-50	50	mA
I _{NC}	On-state switch current		-450	450	
I _{NO} I _{COM}	On-state peak switch current ⁽⁷⁾	V_{NO} , $V_{COM} = 0$ to V_{+}	-700	700	mA
V_{I}	Digital input voltage range (3) (4)		-0.5	6.5	V
I _{IK}	Digital input clamp current	V _I < 0	-50		mA
I ₊ I _{GND}	Continuous current through V ₊ or GND)	-100	100	mA
T _{stg}	Storage temperature range		-65	150	°C

⁽¹⁾ Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

(2) The algebraic convention, whereby the most negative value is a minimum and the most positive value is a maximum

THERMAL IMPEDANCE RATINGS

				UNIT
θ_{JA}	Package thermal impedance ⁽¹⁾	YZP package	102	°C/W

(1) The package thermal impedance is calculated in accordance with JESD 51-7.

Copyright © 2006–2009, Texas Instruments Incorporated

³⁾ All voltages are with respect to ground, unless otherwise specified.

⁽⁴⁾ The input and output voltage ratings may be exceeded if the input and output clamp-current ratings are observed.

⁽⁵⁾ This value is limited to 5.5 V maximum.

⁽⁶⁾ Requires clamp diodes on analog port to V₊

⁽⁷⁾ Pulse at 1-ms duration < 10% duty cycle

ELECTRICAL CHARACTERISTICS FOR 5-V SUPPLY⁽¹⁾

 $V_{+} = 4.5 \text{ V}$ to 5.5 V, $V_{IO} = 1.65 \text{ V}$ to 1.95 V, $T_{A} = -40 ^{\circ}\text{C}$ to 85 $^{\circ}\text{C}$ (unless otherwise noted)

PACKAGE OPTION ADDENDUM

20-May-2013

PACKAGING INFORMATION

Orderable Device		Package Type	Package Drawing	Pins	Package Qty	Eco Plan	Lead/Ball Finish	MSL Peak Temp	Op Temp (°C)	Device Marking	Samples
	(1)		Diawing		Qty	(Z)		(3)		(4/5)	
TS5A6542YZPR	ACTIVE	DSBGA	YZP	8	3000	Green (RoHS & no Sb/Br)	SNAGCU	Level-1-260C-UNLIM	-40 to 85	(JH7 ~ JHN)	Samples

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes. **Pb-Free** (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

- (3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.
- (4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.
- (5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

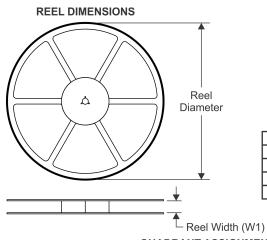

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

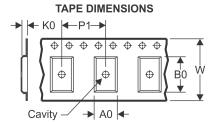

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have *not* been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
