

Small Flashlights

#2480 Emergency Lighting Station

Finding dependable lighting in a blackout situation is no longer a problem for the owner of the Pelican™ Products glow in the dark 2480 ELS (Emergency Lighting Station). The ELS houses a long lasting bright emergency flashlight in a clear jewel case, engineered for attachment to various surfaces. The photoluminescent body adds instant visibility in a black out situation. The titanium batteries give the light 90 hours of battery burn time and up to seven year shelf life. The five-LED array beam shines 21 lumens of brilliant light and is activated by a tail switch for easy one handed operation.
