

SPLICE TAPE

Splice Tapes are used to join new reels to depleted reels in the SMT industry, to avoid downtime, and to increase efficiency.

The adhesive used in our range of splice tape products combines - high adhesive strength with superior shear strength making it particularly suitable for a variety of splicing applications. Furthermore the plastic liner is made from ESD safe material.

	Din Value	ASTM Value
Supporting Base:	Polyester Film	
Total Thickness:	0.055mm	2.2MIL
Colour:	Yellow or Blue	
Adhesive Strength:	4 N/cm	36oz / Inch
Tensile Strength	40 N/cm	23lbs/ Inch
Temperature Resistance:	Upto 130°C (266°F)	
ESD Properties:	50,000 – 100,000 Ohms / CM
