NOTE2) When shifting the sensor output from L to H, please make sure the magnetic field applied to the sensor becomes higher than the above operating magnetic field (H_{on}) through your designing.

NOTE3) When shifting the sensor output from H to L, please make sure the magnetic field applied to the sensor becomes lower than the above operating magnetic field (H_{off}) through your designing.

NOTE4) Sensitivity selection of this product is performed at $V_{cc}=3\text{V}$. Operating magnetic field can possibly change when applying the supply voltage other than 3V. Please consult with us for technical assistance when you consider the supply voltage other than 3V, as a special attention needs to be given in the design.
