

CompoBus/S IP67 I/O Modules SRT2-□D0□CL(-1)

Waterproof input and output blocks make wiring a snap and replacement of sensors or actuators a quick twist of a connector. These IP67 rated blocks are perfect for plug-and-go applications and offer the high-speed performance of Omron's CompoBus/S distributed I/O network. 4-point and 8-point Input and Output blocks are available in both NPN and PNP versions. Pre-terminated cables prevent wiring errors and reduce installation time by over 50%.

- IP67 sealing enable installations in wet environments
- M12 connectors for all I/O connections and power
- LEDs provide visible diagnostics information at the block location
- Input and output versions available; choose NPN or PNP models
- Supports both high speed and long distance modes of operation
- Remove and insert under power
- Securely mount using two screws through the mounting holes
- Compact size: 160 X 54 X 45mm (8-pt models)
- UL, CSA and CE rated

Specifications

■ Communication Media/Distance

Communications medium	4-core cable (VCTF 0.75 mm ² -4)			
Communication distance	Communication mode	Trunk length	Branch line length	Total branch line length
	High-speed communication mode (See Note 1)	30 m max.	3 m max.	30 m max.
	Long distance communication mode (See Note 2)	Unrestricted branching up to a total cable length of 200 m		

- Note:**
1. If the number of slaves connected is 16 or less, communications are possible with a trunk line length of 100 m max. and a total branch length of 50 m max.
 2. There are no restrictions on the branching configuration, trunk line length, branch line length, or total branch length. Connect a terminating resistor to the node farthest from the Master.
 3. Use in combination with 2-core VCTF cables and dedicated flat cables is not possible.
