Freedom NEMA**Auxiliary Contacts****NEMA Sizes 00–2**

The auxiliary contacts listed below are designed for installation on Freedom Series starters and contactors. Snap-on design facilitates quick, easy installation.

These bifurcated design contact blocks, featuring silver cadmium alloy contacts, are well suited for use in very low energy (logic level) circuits.

Product Selection**Side-Mounted****Top-Mounted**

Notes

NCI = Normally Closed early opening designed for use in reversing applications. EC = Early Closing. LO = Late Opening.

^① For reference only—not part of catalog number. See **Page V10-T15-3**.

Contact Configuration Code

This two-digit code is found on the auxiliary contact to assist in identifying the specific contact configuration.

The first digit indicates the quantity of NO contacts and the second indicates the quantity of NC contacts.

Heater Pack Selection

Heater packs H2001B to H2017B and H2101B to H2117B are to be used only with Series B overload relays Catalog Numbers C306DN3B (Part No. 10-7016) and C306GN3B (Part No. 10-7020). The load lugs are built into the overload relay base to allow load wiring prior to heater pack installation. The

previous heater design had integral load lugs. The Series B heater packs are electrically equivalent to the previous heater design. Heaters H2018-3 to H2024-3 have not changed.

Note: The series of a starter is the last digit of the listed catalog number. Example: AN16DN0A**B**.

Notes

① Heater packs are shipped three to a carton. Catalog numbers are for three heater packs.

② Sizes 5–8 use the 32A overload relay with current transformers.

DC Magnet Coils

When Ordering Specify

Conversion Kit for Field Assembly

- Catalog number

Factory Installed DC Coil

- For factory installed DC magnet coil on AC contactors or non-combination starters (open type only), substitute the code suffix from table below for the magnet coil identifier in the device catalog number.

Example: For Size 0 AC contactor with a 24 Vdc coil, change CN15BN3AC to CN15BN3T1C

Application

- Connect for separate control
- Not for use with cover control switch operators
- Use twin break, heavy-duty pilot devices
- Designed for +10%, -20% rated voltage, continuous duty operation

Non-Reversing Kit Consists of:

- One encapsulated DC magnet coil
 - One NCI or NO/NCI side-mounted auxiliary contact
- Note:** These kits are supplied with a NO/NCI side-mounted auxiliary contact in place of the NCI contact.
- Two blue colored connection wires
 - One instruction publication

Operation

These DC coil kits have separate pickup and seal windings. A **special** (side-mounted) early-break NCI auxiliary contact is used to either disconnect the pickup winding or insert the seal winding in series with the pickup winding, depending on the frame size of the contactor. DC coil kits come in two styles, a suffix **1** and a suffix **4**. The 1 suffix contains only the **special** (side-mounted) early break NCI auxiliary contact. The 4 suffix contains a NO contact in the same package as the **special** (side-mounted) early-break NCI auxiliary contact.

Note: NEMA Sizes 00 and 0 contactors may use either suffix 1 or 4 DC coil kits; starters

may use suffix 4 DC coil kits only. For NEMA Sizes 1 and 2, both contactors and starters may use a suffix 4 DC coil kit only.

On the above sizes only, when the **special** auxiliary package is mounted on the side of a contactor or starter, **no** standard auxiliary contact may be mounted on the same side.

Note: For NEMA Sizes 3–5, the special coil NCI clearing contact is an add-on auxiliary (**must** mount on a base mount auxiliary contact; normally a 1NO). This arrangement will normally account for two of the three contact positions on the side of each contactor or starter.

See figure on **Page V10-T15-9**.

Notes

- ① Factory installed DC coils on NEMA contactors and starters include a NO/NC top-mounted auxiliary contact on each contactor for electrical interlocking.
- ② Kit does not include mechanical interlock or crossover wiring. Two NO/NCI top-mounted auxiliary contacts are supplied for electrical interlocking.
- ③ Available factory assembled only.
- ④ 1NO available in suffix 4 kits only.

Remote Reset Module (32A Overload Relay)

The C316RR remote reset module for the C316F, C316S and C316U overload relays allows remote resetting of tripped (32A) overload relays by means of an electrical solenoid attachment that mounts on the side of the overload relay.

Product Selection

Remote Reset Module Operating Voltage	Catalog Number
24V 50/60 Hz	C316RR1U
110V 50/60 Hz	C316RR1A

Dimensions

Approximate Dimensions in Inches (mm)

Note: The operating coil is not suitable for a continuous duty. Recommended impulse duration 0.2–0.35 seconds with 15 operations maximum per hour.

Mechanical Interlock and Reversing Kits

Mechanical interlocks and reversing kits are designed for field assembly of reversing contactors or starters from Freedom Series components. The reversing kits include a mechanical

interlock, stabilizer bar and a pre-cut, trimmed and formed wire set. Auxiliary contacts, if required, must be ordered separately. See **Page V10-T15-2**.

Solid-State Timers**Solid-State ON DELAY Timer—Side-Mounted on Freedom Series NEMA 00-2 and C25D, C25E and C25F Frame**

This timer is designed to be **wired in series with the load** (typically a coil). When the START button is pushed (power applied to timer), the

ON DELAY timing function starts. At the completion of the set timing period, timer and series wired load will both be energized.

Solid-State Timer**Mounted Timer Product Selection**

Timing Range	Catalog Number ④⑤⑥
0.1–1.0 seconds	C320TDN1_
1–30 seconds	C320TDN30_
30–300 seconds	C320TDN300_
5–30 minutes	C320TDN2000_

Pneumatic Timers—Top-Mounted

Attachment mounts on top of any NEMA Size 00-2 Freedom Series starter or contactor (top-mounted auxiliary contacts can not be installed on device when timer

is used). Timer unit has 1NO-1NC isolated timed contacts—circuits in each pole must be the same polarity. Units are convertible from OFF to ON DELAY or vice-versa.

Pneumatic Timer**Product Selection**

Timing Range	Catalog Number
0.1–30 seconds	C320TP1
10–180 seconds	C320TP2

Maximum Ampere Ratings

Description	Volts AC			
	120	240	480	600
Make	30	15	7.5	6
Break	3	1.5	0.75	0.6

Notes

- ① Without cross-wiring.
- ② For use with latest series product.
- ③ Kit includes two NC auxiliary contacts.
- ④ Add operating voltage suffix to catalog number. **A** = 120V, **B** = 240V, **E** = 208V.
- ⑤ Rated 0.5A pilot duty—not to be used on larger contactors.
- ⑥ Terminal connections are quick connects only. Two per side.

Locking Cover for Overload Relay—C306 Only

Snap-on transparent or opaque plastic panel for covering access port to the overload relay trip setting

dial—helps prevent accidental or unauthorized changes to trip and reset setting.

Locking Cover**Product Selection**

Control Circuit Fuse Block

These panel mounted fuse holders, designed for control circuit protection or other similar low current requirements, have extractor type fuse caps. The Class CC rejection type fuses (KTK-R) used in these holders are intended for use with

equipment designated as being suitable for use on systems having high available fault currents. If branch circuit protective device is 45A or greater, C320FBR fuse kit may be required for control circuit protection per NEC 430-72.

Control Circuit Fuse Block**Product Selection**

Dimensions

Approximate Dimensions in Inches (mm)

Control Circuit Fuse Block**Transient Suppressor Kits****NEMA Sizes 00–2**

These kits limit high voltage transients produced in the control circuit when power is removed from the contactor or starter coil. There are three separate suppressors for use on 24–120V, 208–240V or 277–480V coils respectively.

These devices mount directly to the coil terminals of Freedom Series contactors or starters NEMA Sizes 00–2 and lighting contactors 10–60A. Reversing devices will require two.

Transient Suppressor NEMA Sizes 00–2**Product Selection**

Description	Coil Voltage 50/60 Hz ③	Catalog Number
Transient suppressor	24–120V	C320TS1
	208–240V	C320TS2
	277–480V	C320TS3

NEMA Sizes 3–5

This device mounts on top of any side-mounted auxiliary contact on Freedom Series NEMA Sizes 3–5 and lighting contactors 100–300A. It connects across coil terminals on any 120V contactor or starter magnet

coil (reversing starters or contactors require 2).

Limits high voltage transients produced in the circuit when power is removed from the coil.

Transient Suppressor NEMA Sizes 3–5**Product Selection**

Description	Coil Voltage	Catalog Number
Transient suppressor	120V	C320AS1

Shorting Bar Kits

These kits provide phase-to-phase power connections of contactors for field assembly. The kits include bus

connections and mounting hardware. The shorting bars connect all three phases of a single contactor.

Product Selection

Description	Catalog Number	Description	Catalog Number
NEMA Size 3	C321SB18	NEMA Size 5	C321SB21
NEMA Size 4	C321SB19	NEMA Size 6	C321SB22

Notes

- ① A fuse is not supplied, but holder will accept a Bussman Type KTK or KTK-R (13/32 in x 1-1/2 in) fuse, 600V maximum.
- ② Includes a 5A, 600V KTK-R fuse.
- ③ Suppressor is compatible with coil voltages/ranges as shown, 50 and 60 Hz.

DC/AC Interface Module

The catalog number C320DC Interface Module is an optically isolated solid-state switch which provides a means of operating AC coils with 5–48 Vdc control signal. It acts as a space saving interposing relay which can switch a specified 50/60 Hz AC source to the contactor or starter coil.

Design Characteristics

- DC Input: 5–48 Vdc at mA nominal
- AC operating voltage: 240 Vac (360 VA) $\pm 10\%$ 50/60 Hz
- DC operating voltage: 30 Vdc maximum (0.5A)
- AC current rating
 - 10A make (inrush)
 - 1A break (sealed)

The module may be directly attached to the coil terminals of any Freedom Series contactor or starter—NEMA Sizes 00–3 and lighting contactors 10–100A. It also has provisions for DIN rail mounting.

The module will operate coils within the voltage ranges shown in the table below.

Controller Coil Voltage Ranges

Notes

^① These fuse clips are for Class R fuses.

^② Fuse clip "R" rejection members for use with Class R fuses are supplied loose in the fuse clip kits.

Kits do not include fuses.

Control Power Transformer Kits

These control transformer kits provide a convenient on-the-job addition of control transformers to the following Type 1, 3R, 4/4X and 12 enclosed starters. Adding or changing these kits does not affect the UL listing in most instances.

The transformer kit consists of:

- Control transformer
- Two primary and one secondary fuse
- Wires
- Mounting instruction publication

For Non-Combination Starters

These kits may be used for transformer voltage conversion on Freedom NEMA starters furnished from the factory with control transformers installed. Non-combination starters with CPTs factory installed are Class ECN07, ECA07, ECE07 and ECE11. These kits may also be installed in oversize enclosures that have been designed to accept transformers.

Combination Starters

Most combination starters have space for standard size (and 100 VA extra capacity) control power transformers. The panels are pre-drilled for mounting.

UL/CSA

Type J Auxiliary Contact

- Capable of being field mounted in a contactor or starter (Classes A200, A900 Sizes 00-6, V200, V201 vacuum and definite purpose controllers)
- Provides two separate electrical contact sets which wire vertically and are color coded; black designates NC and silver designates NO. Please note that the vertical wiring is contrary to the horizontal wiring of the L-56 auxiliary contacts
- Designed to fit within dimensions of starter; no additional panel space is required
- Provides circuit isolation (no polarity restrictions) and single break bifurcated contacts

Heater Selection

General Information on Heater Coil Selection

For maximum motor protection and compliance with Article 430-32 of the National Electrical Code, select heater coils from the tables in this section on the basis of motor nameplate full load current.

When the full load current is unknown, selection may be made on the basis of average full load currents. **Caution—The average ratings could be high or low for a specific motor and therefore**

selection on this basis always involves risk. For fully reliable motor protection, select heater coils on the basis of full load current rating as shown on the motor nameplate.

Heater coils are rated to protect 40°C rise motors, and open and drip-proof motors having a **service factor of 1.15** where the motor and the controller are at the same ambient temperature.

For other conditions:

1. For 50°C, 55°C, 75°C rise motors and **enclosed motors having a service factor of 1.0, select one size smaller coil.**
2. Ambient temperature of controller lower than motor by 26°C (47°F), use one size smaller coil.
3. Ambient temperature of controller higher than motor by 26°C (47°F), use one size larger coil.

Ultimate tripping current of heater coils is approximately 1.25 times the minimum current rating listed in the tables.

SS-56 Surge Suppressor

- Designed to be used with magnetic motor controllers through Size 4 in 120V, 60 Hz control circuit applications where electronic equipment is used
- Steady state coil volts: 120, 60 Hz, rms
- Peak input volts: 169.6, 60 Hz, maximum amplitude
- Maximum ambient temperature: 65°C
- Nominal limiting volts: 270 peak
- Nominal rate of volt rise: 0.5 per ms

SS-56 Surge Suppressor**Surge Suppressor** ^①

Type Mounting	Kit Catalog Number
Starter	SS-56

F-56 Fuse Block

- Facilitates installation of fuses (15A, 600V max.) in control circuits
- Utilizes Bussman type KTK fuses, or equivalent
- Mounts in same cavity as Type J auxiliary contact
- No tools or mounting hardware needed
- Fuse not included

Fuse Block

Mounting	Kit Catalog Number
Starter	F56
Panel	F56-P

R-56 Interposing Relay

The R-56AA interposing relay is a low energy solid-state device with a single NO solid-state contact. It can be used as a 120 Vac control relay, and will operate on as little as 40 Vac input. Is useful in

applications requiring long control wiring runs where excessive voltage drop would prevent the contactor or relay from energizing. Will operate a Size 4 contactor from 10,000 ft using 18 AWG wire.

Interposing Relay

Type Mounting	Kit Catalog Number
Starter or panel	R56-AA

Mechanical Interlock

- Prevents closing of one member of a reversing or multi-speed contactor until the opposite member is completely open
- Lever type mechanism assures positive action
- Can be factory assembled or field mounted on A200 and A900 starters and contactors

Mechanical Interlock

Contact Arrangement (Number of Poles, Horizontal or Vertical)	Continuous Size	Interlock Catalog Number
3 x 3 horizontal	0, 1	M-33-1B
4 x 4 horizontal	0, 1	M-33-1B
5 x 3 horizontal	0, 1	M-33-1B
All pole combination, vertical	0, 1	M-34-1A
3 x 3 horizontal reversing	2	M-33-2B
3 x 3 vertical reversing	2	M-34-2A
5 x 3 horizontal	2	M-35-2A
4 x 4 horizontal	2	M-36-2A
All pole combination horizontal	3, 4	M-33-3B
All pole combination vertical	3, 4	M-34-3

B3NO Bell Alarm Contact

- Isolated normally open bell alarm contact
- Mounts in Type B block-type overload relay

Bell Alarm Contact

Kit Catalog Number
B3NO-2
B3NO-4 ^②

Control Contact Ratings (B600)

AC Volts	Maximum Amperes	
	Make	Break
24–120	30	3.00
121–600	3600 VA	360 VA

Continuous current rating: 5A

Overload Relay Reset Extension

- Used to adjust overload reset rod depth of Class A200 Model J starters and current design overload relays to same dimensions as obsolete B200 starters and overloads identified by suffix **B**, that is BA13B

When replacing obsolete B200 device with Class A200 starter and Type B overload, order Style 6710C11H03. No charge.

When replacing obsolete B200 device with Class A200 starter and Type A overload, order Style 1490C15H10. No charge.

Notes

- ^① Can be used on Sizes 5 and 6 with 120V coil. Mounting bracket required—order separately. Mounting bracket 177C043G04.
- ^② For Size 3 and 4.

Power Pole Kit

- Adds 1NO or 1NC power pole to Size 00–1 A201 Class contactors
- Factory installed or field mountable in load side auxiliary cavities
- 600 Vac
- Continuous current rating of 18A for Size 0, 27A for Size 1

Overload Protection**Overload Protection Size 5 Starters**

Type B overload relay is a three-pole, block type, thermal ambient compensated device with manual reset mounted integrally. Current transformers

are enclosed in a protective case and integrally mounted to save panel space. Standard ratio is 300:5.

Overload Protection Size 6 Starters

Overload protection assembly consists of three current transformers, Type B three-pole block overload relay and an optional interposing relay. These parts are mounted on a panel which connects directly to the load terminal of the

contactor. Current transformers are 600:5 ratio as standard.

If automatic reset is required, the Type A, three-pole block, ambient compensated relay is available upon request.

Notes

① Do not use with DC operated contactors.

② Size 7 and larger use DC coils as standard.

Overload Relay Kits

Each kit includes three current transformers (standard ratio) and one Type B, three-pole block overload relay, ambient compensated with manual reset.

XTIEC**Auxiliary Contacts**

Front mounted snap-on auxiliary contacts for **XT** contactors are available with screw or spring cage terminals in a variety of contact configurations.

The 7–32A XTCE contactors have positively driven contacts between the integrated auxiliary contact and the auxiliary contact module as well as within the auxiliary contact modules.

The 40–65A XTCE contactors have positively driven contacts within the auxiliary contact module. Six auxiliary contacts are possible with a combination of side-mounted and front-mount auxiliary contacts.

Frame B–C contactors with 1NC built-in auxiliary are mirror contacts (XTCE...B01_–XTCE...C01_).

Notes

① Front- (top) mount tall version is for use with Frame B electrical wire bridges and link kits and toolless plug combination connection kits: XTCEXRLB, XTCEXSDLB, XTPAXTPCB, XTPAXTPCRB, XTPAX.

② Can be mounted to the left side of contactor only. Cannot be used in combination with front- (top) mount auxiliary contacts or mechanical interlocks.

③ One early-make contact (1NO_E), one late-break contact (1NC_L).

Interlocked opposing contacts, to IEC/EN 60947-5-1 Annex L (positively driven), within the auxiliary contact modules (not NO [early make] and NC [late break] contacts) and for the built-in auxiliary contacts of the XTCE007B_–XTCE032C_.

Auxiliary break contact can be used as mirror contact to IEC/EN 60947-4-1 Annex F (not NC [late break] contact).

No auxiliary contacts can be fitted between two contactors.

Notes

① One early-make contact (1NO_E), one late-break contact (1NC_L).

② To maintain proper terminal marking, XTCEXSCN_ should not be used with Frame D contactors and only used with Frame F–G contactors in combination with XTCEXSBN_.

Forced operation contact to IEC/EN 60947-5-1 Appendix L (positively driven), inside the auxiliary contact unit (not early close and late opening).

Auxiliary normally closed contact can be used as mirror contact to IEC/EN 60947-4-1 Appendix F (not late opening).

No auxiliary contacts can be fitted between two contactors.

Dummy Contact Block

Application	Catalog Number
Dummy contact block	C320KGSD

Notes

① In order to install cover control kits for NEMA Sizes 00–2 and IEC Sizes A–F, the starter must be provided with a **side-mounted** auxiliary contact or a separately ordered dummy contact block, **C320KGSD** from table above, to serve as a mounting base. **Note:** NEMA Size 00 open type devices **are not** supplied as standard with side-mounted auxiliaries.

② If 8 AWG wire is used with NEMA Size 1 starter, the enclosure should be changed to a Box 2 (C799B13).

③ Sub panel drilled for 50–200 VA CPTs.

④ Enclosure drilled for 150–300 VA CPTs.

Box 1 will **not** accept devices with top-mounted auxiliaries. Box 2 will accept NEMA Sizes 00 and 0 starters with top-mounted auxiliaries.

Lighting Contactors

Electrically Held Base Contactor for C30CN/ECC

The C30CNE20_0 electrically held base contactor contains a 2NO power pole as standard and will allow the addition of power poles to build an electrically held contactor up to 12 poles

maximum. A mechanically held module kit can also be added to convert the electrically held contactor into a mechanically held contactor in the field.

Electrically Held Base Contactor

Power Poles for C30CNM/ECC

The C30CNM contactor accepts up to a maximum six single- or two-pole (or combinations) power poles. These can be used to form up to:

- 12 NO poles maximum when 6 two-poles are used in NO positions (1–6) or
- 8 NC poles maximum with 4 two-poles in the NC position (1–4) and 4 NO poles with 2 two-poles in the 2 NO positions (5–6)

Power Poles

Power Poles

Note

- ^① When ordering, select required contactor by catalog number and replace the magnet coil alpha designation in the catalog number () with the proper code suffix from the Coil Base Voltage table above.

Auxiliary Contacts for C30CN/ECC

A mechanically held contactor with a two-wire control module uses 1NC auxiliary contact as standard for the control wiring circuit. The mechanically held contactor with a three-wire control

module uses 1NO-1NC auxiliary contacts as standard for the control wiring circuit. See the table below for possible additional auxiliary contact configurations.

Auxiliary Contact Configurations

Two-Wire	Three-Wire
None	1NC (two-pole)
1NO (single-pole)	1NO (two-pole)
2NO (two-pole)	1NO-1NC (two-pole)

Single-pole	C320AMH1
Two-pole	C320AMH2

Transient Suppressor Kits for CN35/ECL**10–60A Contactors**

These kits limit high voltage transients produced in the control circuit when power is removed from the contactor or starter coil. There are three separate suppressors for use

on 24–120V, 240V or 480V coils respectively.

These devices mount directly to the coil terminals of lighting contactors 10–60A.

C320TS2**Kits for 10–60A**

Description	Coil Voltage	Catalog Number
Transient suppressor	24–120V	C320TS1
	240V	C320TS2
	480V	C320TS3

100–300A Contactors

This device mounts on top of any side-mounted auxiliary contact on lighting contactors 100–300A. It connects across coil terminals on any 120V contactor magnet coil.

Limits high voltage transients produced in the circuit when power is removed from the coil.

C320AS1**Kits for 100–300A**

Description	Coil Voltage	Catalog Number
Transient suppressor	120V	C320AS1

Auxiliary Contacts for CN35/ECL

CN35 lighting contactors include a 1NO maintaining auxiliary contact mounted on right hand side (on 10A, two- and three-pole devices, auxiliary contact occupies fourth power pole position—no increase in width). The 10–60A devices will accept additional auxiliary contacts on the top and/or sides.

Auxiliary contact blocks are designed for snap-on installation—fast, easy installation (no tools required up to 60A). All auxiliary

contacts are of the bifurcated design with parallel circuit paths. This redundant path provides very high reliability. Auxiliary contacts can be snapped on the side (up to two circuits—per auxiliary contact) and on the top (up to four circuits). Auxiliary contacts for larger contactors, 100–400A sizes, will accept side-mounted auxiliaries only and easily attach to the side of the contactor with two screws.

Contact Configuration Code

This two-digit code is found on the auxiliary contact to assist in identifying the specific contact configuration.

The first digit indicates the quantity of NO contacts and the second indicates the quantity of NC contacts.

Break	3.0	1.5	0.75	0.6

Solid-State Timers for CN35/ECL**Solid-State ON DELAY Timer—Side-Mounted on CN35 Freedom Series Lighting Contactors Through 60A**

This timer is designed to be **wired in SERIES with the load** (typically a coil). When the START button is pushed (power applied to timer), the

ON DELAY timing function starts. At the completion of the set timing period, timer and series wired load will both be energized.

Solid-State Timer**Product Selection—Mounted Timer**

Timing Range	Catalog Number ^{④⑤⑥}
0.1–1.0 seconds	C320TDN1_
1–30 seconds	C320TDN30_
30–300 seconds	C320TDN300_
5–30 minutes	C320TDN3000_

Notes

- ① Available positions on contactors or starters other than what is factory installed.
- ② When a pneumatic timer is mounted on contactor, only side-mounted auxiliary contact positions are available. The solid-state timer, when added, takes up side-mounted auxiliary contact position.
- ③ For 100–400A contactors, a base auxiliary contact must be added in position L1 before additional contacts can be mounted.
- ④ Add operating voltage suffix to catalog number. **A** = 120V, **B** = 240V, **E** = 208V.
- ⑤ Rated 0.5A pilot duty—not to be used on larger contactors.
- ⑥ Terminal connections are quick connects only. Two per side.

Type J Auxiliary Contact for A202/ECL

- Capable of being field mounted in a contactor or starter (Classes A200, A900 Sizes 00–6, V200, V201 vacuum and definite purpose controllers)
- Provides two separate electrical contact sets which wire vertically and are color coded; black designates NC and silver designates NO. Please note that the vertical wiring is contrary to the horizontal wiring of the L-56 auxiliary contacts
- Designed to fit within dimensions of starter; no additional panel space is required
- Provides circuit isolation (no polarity restrictions) and single break bifurcated contacts

Auxiliary Contact Ratings

R-56 Interposing Relay for A202/ECL

The R-56AA interposing relay is a low energy solid-state device with a single NO solid-state contact. It can be used as a 120 Vac control relay, and will operate on as little as 40 Vac input. Is useful in

applications requiring long control wiring runs where excessive voltage drop would prevent the contactor or relay from energizing. Will operate a Size 4 contactor from 10,000 ft using 18 AWG wire.

Interposing Relay

Adapter Plates ^①	EMM13U

Vibration Plates for S801+/S811+

The vibration plates allow the soft starter to be applied in high shock and vibration applications. The vibration plate allows vibration up to 5g

and shock in up to 40g. The soft starter is mounted onto the vibration plate prior to installation in the panel.

Vibration Plates

Description	Catalog Number
Vibration plate N Frame	EMM14N
Vibration plate R Frame	EMM14R
Vibration plate T, U Frame	EMM14T
Vibration plate V Frame	EMM14V

Power Supplies

24 Vdc power supply that can be used with the S801+ or S811+ SSRV or as a standalone device.

Power Supplies

Description	SSRV	Catalog Number
115 Vac input	S801+/S811+	PSG240E
230 Vac input	S801+/S811+	PSG240E
380–480 Vac input	S801+/S811+	PSG240F

DIN Rail Power Supply Mounting Kit (35 mm)**DIN Rail Mounting Kit**

Description	Catalog Number
DIN rail mounting kit (35 mm)	PSSDIN

NEMA Vacuum Break Control**Lug Sizes**

- Size 4—12–4/0
- NEMA Size 5 and 6 and 320A, 540A and 610A—supplied without line or load lugs

Lug Kits—Consist of 6 Lugs

Size	Description	Catalog Number
5 and 320A	1/0–500 kcmil	C325KAL8
6, 540A and 610A	1/0–500 kcmil double barrel	C325KAL9
610A	1/0–600 kcmil double barrel	80-19825-2

Field Modification Kits**Auxiliary Electrical Contacts**

Size 4—Three Type J auxiliary contacts may be mounted on the top of Size 4 contactors to provide six auxiliary, isolated 600V, 10A contacts for use in control circuits.

Sizes 5–6—Two Type J auxiliary contacts may be mounted on each side of Size 5 and 6 contactors to provide four auxiliary, isolated 600V, 10A contacts for use in control circuits.

Auxiliary Electrical Contacts

	External reset with bell alarm	R49
	N3R reset boot added (Type 1/12 only)	R71
Reversing ^⑤	Reversing contactor/starter	R54
Overload relay mods	Anti plug-in	R53
DeviceNet interface	DeviceNet interface	R69
	Standard reset for DeviceNet	R65
	Lighted reset for DeviceNet	R66
	Trip indicator for DeviceNet	R67

Notes

① Features:

- Self-powered
- Phase loss protection
- Current adjustment knob
- ±1% repeat accuracy
- 1NO and 1NC isolated contacts

② Not UL Listed.

③ NEMA Size 5 starter available with 60–300A panel mounted CTs. Starter as an assembled unit with 1–5A C440 overload relay (C440A1A005SELAX or C440A2A005SELAX).

④ NEMA Size 6 starter available with 120–600A panel mounted CTs. Starter as an assembled unit with 1–5A C440 overload relay (C440A1A005SELAX or C440A2A005SELAX).

⑤ Not available for **XT** starters.

S—System Voltage, Selector Switches, Suppressor, Incomplete Sequence Protection, Single-Phase Jumper, Surge Capacitor, Speed Potentiometer

Modification	Description	Catalog Number Suffix
System voltage selection	System voltage selection for internal components	S1
	/H1 208V 60 Hz	
	/H2 240V 60 Hz	
	/H3 277V 60 Hz, single-phase	
	/H4 480V 60 Hz	
	/H5 600V 60 Hz	
	/H6 796V 60 Hz	
	/H7 220V 50 Hz	
	/H8 380V 50 Hz	
	/H9 415V 50 Hz	
	/H10 550V 50 Hz	
	/H11 660V 50 Hz	
	/H12 380V 60 Hz	
	/H13 1500V 60 Hz	
	System voltage selection—specify on order	S2
Selector switches ^①	HAND/OFF/AUTO	S3
	HAND/AUTO	S4
	HAND/OFF/AUTO selector switch with one red RUN pilot light	S5
	RUN/OFF/AUTO	S6
	AUTO/OFF/TEST	S7
	AUTO/OFF/TEST selector switch with one red RUN pilot light	S8
	AUTO/OFF/TEST selector switch with one red RUN pilot light and one green pilot light	S9
	OFF/AUTO	S10
	START/STOP	S11
	OFF/ON	S12
	HIGH/LOW	S13
	FAST/OFF/SLOW	S14
	SLOW/FAST	S15
	FORWARD/REVERSE	S16
	HIGH/OFF/LOW	S17
	HIGH/LOW/OFF/AUTO	S18
	Selector switch omitted (pumps only)	S19
	HAND/OFF/AUTO spring return from left	S21
	OPEN/OFF/CLOSE	S41
	FORWARD/OFF/REVERSE	S42
	FAST/OFF/SLOW/AUTO	S43
	Selector switch omitted (pump panels only)	S19
	Selector switch—order by description	S40
	RVSS/BYPASS (soft starters only)	S44
	LOCAL/REMOTE selector switch	S45
	RUN/OFF selector switch	S46
Suppressor	Transient suppressor mounted on magnet coil	S24
Surge suppression	MOV (IT)	S20
Sequence timer	Sequence timer (pump panels)	S26
Sequence protection	Incomplete sequence protection	S27
Pump	480V BP9000 pump	S28
Single-phase	Convert contactor or starter from three-phase to single-phase—install jumper	S29
	Single-phase rev. 120V	S30
	Single-phase rev. 240V	S31
Surge capacitor	Surge capacitor wired to disconnect line side	S37

Note

^① When using three-position selector switch with magnetic lighting contactor, mod **C20** must also be used (ECL04, ECL13, ECL15).

T—Timers, Time Delay Relays, Terminal Blocks, Terminal Points, Ring Lug Connections

Modification	Description	Catalog Number Suffix
Timers	Pneumatic timer installed on contactor, unwired, 30 seconds maximum	T1
	Pneumatic timer installed on contactor, unwired, 180 seconds maximum	T2
	Pneumatic timer mounted in enclosure, unwired, 180 seconds maximum	T3
	Solid-state ON delay timer (1–30 seconds)	T4
	Solid-state ON delay timer (30–300 seconds)	T5
	Timer—order by description	T25
Time delay relays	Time delay relay, 3 minutes maximum, unwired, ON DELAY	T6
	Time delay relay, 3 minutes maximum, unwired, OFF DELAY	T7
	Time delay low voltage release relay	T8
Terminal blocks	With one single circuit terminal block, unwired	T9
	With two single circuit terminal block, unwired	T10
Terminal points	With 6 terminal points, unwired	T11
	With 12 terminal points, unwired	T12
	With 18 terminal points, unwired	T13
	Terminal point per customer specification, unwired (price each)	T14
	Terminal point per customer specification, wired (unwired without customer diagram)	T15
	Three terminals mounted between contactor and overload for power factor capacitors—Sizes 0–2	T21
	Three terminals mounted between contactor and overload for power factor capacitors—Sizes 3–4	T22
	Quick-connect terminals added to DP contactor/starter	T23
Ring lug connections	Ring lug connections on power wires	T16 ①
	Ring lug connections on control wires	T17

15 U—Undervoltage Relay, Time Delay Undervoltage Relay

Modification	Description	Catalog Number Suffix
Undervoltage relays	Undervoltage relay, non-adjustable	U1
	Undervoltage relay, adjustable	U2
Time delay undervoltage relays	Time delay undervoltage relay, non-adjustable	U4
	Time delay undervoltage relay, adjustable	U5
Under- and overvoltage relay	Under- and overvoltage relay	U7

Note① Not available for **XT** starters.

V—Voltmeter, Varmeter, Vacuum Starter

Modification	Description	Catalog Number Suffix
Voltmeters	One panel type voltmeter wired L1–L2	V1
	Panel type voltmeter and selector switch wired to read three-line voltages	V2
	Miniature voltmeter wired L1–L2	V3 ^①
	Miniature voltmeter and selector switch wired to read three-line voltages	V4 ^①
	Switchboard type voltmeter wired L1 – L2	V5
	Switchboard type voltmeter and selector switch wired to read three-line voltage	V6 ^①
	Three panel type voltmeters wired in each phase	V7
	Three miniature voltmeters wired in each phase	V8 ^①
	Three switchboard type voltmeters wired in each phase	V9 ^①
	Voltmeter—order by description	V10
Varmeter ^②	Varmeter	V11
	Varmeter—order by description	V12
Vacuum starter ^②	Vacuum starter—1500V rating	V13

W—Wattmeter, Watt-Hour Meter, Wiremarkers, Wiring Diagram

Modification	Description	Catalog Number Suffix
Wattmeter ^①	Wattmeter	W1
Watt-hour meter ^①	Watt-hour meter	W3
	Watt-hour meter with demand attachment	W5
Wiremarkers	Wiremarkers	W7
	Wiremarkers—order per customer diagram or specifications	W8
	Wiremarkers—order by description	W9
WYE-Delta hp	See Tab 5	W10 ^②
Windows in enclosure	Enclosure windows	W11
Wiring diagram	Reduced copy of custom wiring diagram laminated on inside of door	W12

Notes^① Type 1/12 only.^② Not available for **XT** starters.
