

FEATURES AND SPECIFICATIONS

Features and Benefits

Molex Premise Networks PowerCat 6 Patch Panels are designed to provide a simple, orderly and efficient means for cross connecting between vertical and horizontal cabling. Fully assembled 24 port (1U) and 48 port (2U), PowerCat 6 Patch Panels are supplied with a rear cable management tray for cable strain relief and neat cable dressing. The front and rear of the panels are marked with the port numbers and individual ports may be colour coded for site-specific network administration by fitting connector icon labels. A protected labelling feature is also provided for clear panel identification.

PowerCat 6 Patch Panels feature the DataGate Plus™ Category 6 connector. This superior RJ45 IDC includes a unique integral shutter that not only protects the connector from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The DataGate Plus connector is dual colour coded for either 568A or 568B wiring schedules and is RJ11 compatible.

Suitable for high-speed data transmission, the DataGate Plus Category 6 connector has been designed to exceed the highest electrical performance standards in the industry and has been independently tested and verified by ETL SEMKO for Category 6 component compliance. The DataGate Plus connector is also backwards compatible with CSE systems.
